

The SCD Datamart contains data from these statewide systems:

1. SFMA (Statewide Financial Management Application)

- a. SFMA data is updated weekly with a download Friday evening and an upload on Saturday evening.
- b. Mid-July through August (considered Period 13) the YE GL Detail, YE GL Summary, and Profile tables are updated three times per week from SFMA.

2. OSPA (Oregon Statewide Payroll Application)

- a. The payroll or OSPA data is updated monthly after the Final Run 2, approximately the 10th of each month. The data is available the morning after Final Run 2 is posted to R*STARS (see the OSPS Processing Calendar for specific dates throughout the year).

3. ORBITS (Oregon Relational Budget Information Tracking System)

- a. The Orbits or budget data is loaded weekly along with the normal SFMA load process.

4. PPDB (Position & Personnel Database)

- a. The PPDB data is loaded the first of every month.

5. PICS (Position Information Control System)

- a. The PICS information is loaded weekly along with the normal SFMA load process.
