## The Oregon Accountability Model

All department employees are responsible for upholding the mission of ODOC by promoting public safety, holding offenders accountable for their actions and reducing the risk of future criminal behavior. ODOC employees oversee and manage inmates in order to maintain safe, civil and productive institutions. They are responsible for the safety of inmates and protection of property at their work site. All department employees have a significant impact on the success of the ODOC mission and need to understand the fundamentals of the Oregon Accountability Model.

The Oregon Accountability Model encompasses the simultaneous, coordinated and efficient implementation of many Department of Corrections' initiatives and projects that provide a foundation for inmates to lead successful lives upon release.

The Oregon Accountability Model has six components. Each component stands on its own as a project or a part of the Corrections organization and culture. However, woven together these six separate components form a stronger fiber that strengthens the departments ability to hold inmates/offenders accountable for their actions and DOC staff accountable for achieving the mission and vision of the department.
