What's New in this Edition?

This edition of the *“Local Budgeting Manual”* has fairly extensive revisions from earlier editions. However few of the changes were made as a result of significant changes in the underlying Local Budget Law itself, or in the interpretation of those statutes by the Department of Revenue. Most of the changes were made to make the information more accessible and more easily understood by the reader. That is:

1. To make it easier to read, less repetitious, more specific, and to use plain language wherever possible;
2. To include material that we had been providing in our annual training workshops or by other means, but which was not in earlier editions of the manual;
3. To better organize the material in a way that we hope is more logical and better follows the flow of the process as you develop and manage your budget.

Significant changes

The significant changes in law or policy are as follows:

- Chapter 5 contains an expanded explanation of the arrangement of expenditure estimates by organizational unit or program and of the grouping of expenditure items by object classification. Chapter 11 contains a similar explanation of how appropriations must be categorized by organizational unit, program and the other appropriation categories listed in ORS 294.435.
- All discussions of bonds and borrowings have been updated to refer to the appropriate statute in ORS Chapter 287A, which replaced Chapter 287 in revisions made by the 2007 Legislature.
- A bond debt service fund that levies a separate property tax can now include as a requirement an amount to repay money you loaned to the debt service fund in the past from other revenues because collections from your debt service levy were insufficient to cover the debt service payments, and you may increase your debt service levy accordingly.
- Local governments in Washington County are now required to post a summary of their proposed budget on the county's internet web site. See Chapter 9.
- The instructions for certifying taxes to the county assessor now include information on how to certify if a local government imposes a tax that will be split between the Measure 5 Education and General Government categories. See Chapter 12.
- There is clarification that the “10 percent rule” on supplemental budgets only determines the process used to adopt a supplemental budget; not whether a supplemental budget is required. It is common to need a supplemental budget even if expenditures are changing by less than 10 percent.
- Because of Measure 56 (2008), ballot measures requesting a permanent rate limit, local option taxes or general obligation bond authority no longer require a “double majority” unless the election is in March or September. Ballot questions proposing formation of a new city or special district and at the same time requesting a permanent rate limitation may only appear in the primary or general election (May or November in even numbered years).
- The process for adopting a budget and certifying taxes when a tax ballot measure is scheduled for a September election is clarified. See Chapter 10.
- A local option tax or bonds approved after September of the first year of a biennial budget can be levied in the second year of the biennium if the governing body adopts a resolution or ordinance to impose and categorize the levy. Revenues from such levies may be expended if the governing body adopts a supplemental budget to make the appropriations.
- Unbudgeted interfund transfers can now be made from any fund to any other if authorized by resolution.
- Interfund loans for capital purposes can now be made for up to 10 years.

- County budgets must include a summary of revenues and expenditures for major programs funded in part by the state. The summary must identify the expenses paid from general county resources, state grants, federal grants, lottery, and other sources.

Introduction

Most local governments¹ in Oregon, from the smallest cemetery district to the largest city, must prepare and adopt an annual budget. Schools, education service districts, community colleges, counties, cities, urban renewal agencies, and most special districts are all subject to the same budget provisions.²

Oregon's Local Budget Law is found in Oregon Revised Statutes (ORS) 294.305 to 294.565. The full text of these statutes can be found on the Oregon Legislature web site at www.leg.state.or.us.

The law sets out several specific steps that must be followed during the budgeting process. The process must begin far enough in advance that it can be followed and the budget adopted before June 30 of the current fiscal year or the last June 30 of the current biennial budget period. Without a budget for the new fiscal period in place, the local government's authority to spend money or incur obligations expires on June 30. A local government's ability to impose a property tax is also contingent on following the budgeting process. Compliance with Local Budget Law is critical for local governments.

What is a budget?

A budget is a financial plan containing estimates of revenues and expenditures for a single fiscal year or biennial budget period.³

Budgeting allows a local government to evaluate its needs in light of the revenue sources available to meet those needs. A complete budget justifies the imposition of property taxes and the making of the appropriations that give the government its authority to spend public money.

Purpose of local budget law

Budgeting is not simply something a local government does once every year or two. It is a continuous process, taking 12 or 24 months to complete a cycle. The budgeting process has four parts. The budget is: 1) prepared, 2) approved, 3) adopted, and 4) executed. After adopting the budget, the governing body makes the necessary appropriations and certifies to the county assessor the tax to be imposed.

Oregon's Local Budget Law has several important objectives (ORS 294.321):

- To establish standard procedures for the preparation, presentation, administration and appraisal of budgets of municipal corporations;
- To provide for a brief description of the programs of a municipal corporation and the fiscal policy which is to accomplish these programs;
- To provide estimates of revenues, expenditures and proposed taxes;
- To provide specific methods for obtaining public views in the preparation of fiscal policy;
- To provide for the control of revenues and expenditures for the promotion of efficiency and economy in the expenditure of public funds; and
- To enable the public, taxpayers and investors to be apprised of the financial policies and administration of the municipal corporation in which they are interested.

Citizen involvement

To give the public ample opportunity to participate in the budgeting process, Local Budget Law requires that a budget officer be appointed and that a budget committee be formed that includes voters from the district.

¹Throughout this manual we use the terms "local government", "municipal corporation", "taxing district", and "district" interchangeably. For most purposes of Local Budget Law the terms have the same meaning.

²A few types of special districts are specifically exempted from Local Budget Law. See Chapter 3 for a list of these types of districts.

³Instead of budgeting by fiscal year, the governing body of a municipal corporation may adopt a 24-month, or "biennial" budget. For the differences that biennial budgeting entails, see "*Chapter 14-Biennial Budgets*". Throughout this manual, we refer to the budget period as a "fiscal year" but if a local government adopts a biennial budget, the period referred to is a 24-month period.

The budget officer draws together necessary information and prepares the proposed budget. The budget committee reviews and may revise the proposed budget before it is formally approved. After the budget committee approves the budget, the governing body publishes a summary of the budget and holds a public hearing, at which any person may appear for or against any item in the budget. These requirements encourage public participation in budget making. They also give public exposure to budgeted programs and fiscal policies before the governing body adopts the budget.

Citizen involvement in the budget cycle varies from one community to another. It is up to each local government to prepare a budget that clearly outlines its fiscal policies for the patrons of the district. If a budget is clear and concise, taxpayers have a better understanding of what services their tax dollars are buying. Local governments may find citizen input informative and rewarding.

The major steps of the budgeting process are outlined in Chapter 3. A more complete outline of the budget process, with cites to specific Oregon Revised Statutes and Oregon Administrative Rules, is in Appendix B.

Chapter 1—Who is Involved in the Budget Process?

Many state and local agencies and organizations are involved in the budget process. This chapter provides an overview of the duties and responsibilities of each.

The Oregon Department of Revenue

The authority of the Department of Revenue for its oversight role in the budgeting process is found in ORS 294.485 to ORS 294.510. ORS 294.495 gives to the department sole authority to interpret and administer Local Budget Law and to issue administrative rules for compliance. This statute also gives the department authority to ensure compliance with all other laws relating to the imposition of property taxes. However, ORS 294.490 prohibits the department from interfering with the fiscal policy of any local government. Local Budget Law is complex and ever-changing. It is important that local governments stay informed of law changes and other requirements. Anyone with questions about these laws can contact the Department of Revenue at 503-945-8293 for help.

Administrative rules

When a statute is unclear or does not provide sufficient detail for the smooth functioning of the property tax system, the department sometimes adopts an Oregon Administrative Rule (OAR). The process for adopting or amending administrative rules provides for consultation among the department's affected program areas, collaboration with interested persons, both public and private, review by legal counsel, management review, and a public hearing. The general rulemaking procedures are found in ORS 183.325 to 183.355. Once adopted, an OAR has the force of law of a statute adopted by the Oregon Legislature, and the department must follow the terms of the rule. The administrative rules for Local Budget Law can be found at http://arcweb.sos.state.or.us/rules/OARS_100/OAR_150/150_tofc.html.

Publications

Publications such as this manual provide detailed budgeting guidelines and statutory interpretations. The *“Basic Budget Book”* is a simpler guideline designed for the first-time budget officer. It walks through the basic steps for preparing a budget. *“Local Budgeting in Oregon,”* an overview of the budgeting process, is especially designed for the public and for budget committee members. Information circulars, distributed through county assessors' offices, provide information on specific issues. All of these publications are also available on the department's web site at <http://www.oregon.gov/DOR/PTD/LocalB.shtml>.

Forms

The Department of Revenue has the authority to prescribe forms to carry out Local Budget Law or any other law authorizing the imposition of property taxes. The department has developed budget and publication forms that follow the law. Local governments must use these forms or use the same formats for the forms they produce. In addition, school districts, community colleges, councils of governments and hospital or health districts have specific requirements for preparing their estimates of expenditures (ORS 294.356).

IMPORTANT: Beginning in 2009, The Department of Revenue will no longer mail a paper copy of the annual booklet *“2010-2011 Local Budget Law and Notice of Property Tax Forms and Instructions for Municipal Corporations”* or the corresponding booklets for education districts or urban renewal agencies, unless the local government requests a paper copy. If you want a paper copy of the 2010-11 annual forms booklet, you must request one by November 15, 2009. Otherwise we will assume that you will download your 2010-11 forms from our web site at <http://www.oregon.gov/DOR/PTD/LocalB.shtml>. You may request your paper copy by calling 503-945-8293, or by e-mail at finance.taxation@state.or.us. Be sure to give your district's name and the mailing address where your forms booklet should be sent. You will need to request a paper copy every year that you desire one.

The department also prescribes the forms used every year to certify your property taxes to the county assessor. Tax certification forms are revised annually. It is important that you use the current year tax certification forms. Outdated forms should be destroyed or the paper recycled.

Budget publications and forms are available from the department on paper upon request or from our internet site at <http://www.oregon.gov/DOR/PTD/LocalB.shtml>. Most of the forms found on the web site can be filled out online and printed, or downloaded in spreadsheet format and printed or saved on your personal computer.

Training in local budget law

The department's Finance and Taxation unit conducts training seminars in Local Budget Law every year, usually in February and March. The sessions are designed for budget officers, governing body members and appointed members of budget committees. The training is free. Training announcements are mailed to each local government in January and are e-mailed to individual subscribers of an e-mail mailing list called "localbudget". To subscribe to this e-mail list, go to <http://listsmart.osl.state.or.us/mailman/listinfo/localbudget>.

Secretary of State Audits Division

All Oregon local governments are subject to the Municipal Audit Law, ORS 297.405 to 297.555. The law requires an annual audit of the financial statements of counties and school districts.

A local government, other than a county or school district, with combined revenues and expenditures of less than \$150,000, and whose chief fiscal officer is bonded for the total amount of money received during the year may file unaudited financial statements with the Secretary of State within 90 days after its fiscal year ends.

Forms used to file unaudited financial statements are available at no charge from the **Audits Division** of the Secretary of State.

A local government, other than a county or school district, with combined revenues and expenditures of more than \$150,000 but less than \$500,000, and whose financial statements have been reviewed by a licensed municipal auditor may file "review reports" with the Secretary of State within 180 days after its fiscal or calendar year ends.

A local government, including counties and school districts, that must have its financial statements reviewed or audited, must contract with an accountant licensed as a municipal auditor by the **Oregon Board of Accountancy** to do the review or audit. The Board of Accountancy maintains a list of licensed municipal auditors. Write to the Board of Accountancy for a copy of this listing. Their address is 3218 Pringle Road SE, Suite 110, Salem OR 97302-6307. The web site is <http://www.oregon.gov/BOA/index.shtml>.

Audits and reviews must be made as directed by administrative rules adopted by the Secretary of State. The rules referring to reviews are known as "*Minimum Standards for Reviews of Oregon Municipal Corporations.*" These rules prescribe the financial statements that must be included in audit or review reports, the minimum procedures that must be followed, and the standards that must be followed in an audit or review. Copies of these rules may be obtained from the Secretary of State, Division of Audits, 255 Capitol Street NE, Suite 500, Salem OR 97310. The web site is <http://www.sos.state.or.us/audits/>.

Copies of all financial statements, whether unaudited, reviewed, or audited, must be filed with the Secretary of State. They are public records available for inspection by anyone who is interested. Copies of these reports may be obtained for a small charge.

A filing fee must accompany all reports filed with the Secretary of State. The amount of the fee is set by law. It is determined by the amount of expenditures of the municipal corporation. The Division of Audits uses the filing fee to administer the Municipal Audit Law. The Division of Audits offers technical help in accounting and financial reporting. Address written inquiries to the Secretary of State, Division of Audits, 255 Capitol Street NE, Suite 500, Salem OR 97310.

Tax Supervising and Conservation Commissions

Tax supervising and conservation commissions (TSCC) supervise local government budgeting and taxing activities. They are established under ORS 294.605 to 294.705, and are required in counties with a population of

500,000 or more.⁴ Currently, only Multnomah County has a tax supervising and conservation commission. The Multnomah County TSCC web site is <http://www.co.multnomah.or.us/orgs/tscc/index.php>.

The commission is directed by five commissioners appointed by the governor for four-year terms. They serve without compensation. The commission appoints administrative employees, and the attorney general serves as legal counsel. Operating expenses are limited by statute and are allocated through the county's general fund.

The commission's functions are:

1. To encourage providing enough public funds to operate local governments efficiently.
2. To oversee compliance with laws governing local budgets, taxes, and public debt.
3. To schedule public hearings where citizens may express views on financial plans and taxes.
4. To publish for voters, taxpayers, and investors an annual comprehensive report of budgets and other financial information, and to maintain permanent records of indebtedness of all municipal corporations in the county.

The commission reviews budgets from all units within its jurisdiction. For municipal corporations that have a population exceeding 200,000 the commission conducts the public hearing under ORS 294.430. Annual, biennial, and supplemental budgets are reviewed:

1. For compliance with local finance laws;
2. To examine program content;
3. To judge whether estimates are reasonable; and
4. To coordinate financial planning among the various local governments.

The commission must certify whether or not it has any objections or recommendations to make with respect to the budget before the local governing bodies can adopt the budget.

The commission must also conduct hearings on local option taxes and bond proposals. It has authority to inquire into the management, accounts, and systems used by local governments. It may call a joint meeting of taxing bodies to discuss financial planning and cooperative ventures. The commission stresses continuing consultation with local officials to improve financial management systems.

County Assessor

The county assessor is responsible for determining the value of all taxable real and personal property in the county (ORS 308.232). In more populous counties, the assessor supervises a staff of appraisers. In smaller counties, the assessor may do all of the appraisal work personally. An appraiser analyzes each new real property account and applies standardized appraisal methods to determine the property's real market value (RMV). Usually, existing real property accounts are not physically reappraised every year, but instead their values are trended, based on sales of similar properties. Personal property accounts are valued on the basis of annual returns that must be submitted by the owner of the property or the person in possession.

In addition to a property's RMV, the assessor calculates the property's maximum assessed value (MAV). Article XI, Section 11 of the Oregon Constitution (Measure 50) contains a formula for determining MAV. There are exceptions to the formula for things like building additions and major improvements or subdivided tax lots, that the assessor must consider. The assessor also adjusts the MAV for any exemptions or special assessments that are allowed by law, such as the exemption for the property of disabled war veterans and for specially assessed farmland. The lower of RMV or MAV is the property's taxable assessed value (AV). This is the value used to compute the taxes on the property.

⁴An alternative to forming a tax supervising and conservation commission for counties reaching 500,000 in population is to have all municipal corporations submit a copy of the financial summary prepared under ORS 294.386 to the county, before the date of the first budget committee meeting. The county is then required to post all of the financial summaries on its web site. Washington County has chosen this option. Local governments in Washington County should consult ORS 294.308 and <http://washtech.co.washington.or.us/financialsummaries/finalIntro.cfm> for instructions on submitting your budget summary to the county.

Local governments must submit their tax certification forms to the assessor by July 15. The assessor is responsible for checking the taxes imposed by local governments to make sure they are legal. If there is a question about whether a taxing district has the authority to impose a particular tax levy, the assessor will consult with the Department of Revenue, which has the authority to prevent an unlawful levy from being placed on the property tax roll.

The assessor is responsible for calculating the taxes for each taxable property within the county. Taxes are extended against individual properties as a tax rate per \$1,000 of assessed value. Some levies are certified to the assessor by the taxing district as a rate per \$1,000 and others are certified as a dollar amount. Levies for exempt bonds and fixed-dollar local option levies, for example, must be certified as dollar amounts. The assessor must convert these tax amounts into tax rates (ORS 310.090). A tax rate is calculated by dividing the levy amount by the assessed value of all of the property in the local government that is imposing the levy.

The tax rate for each district levy is combined with all other levy rates in the same tax code area, and this combined billing rate is multiplied by the assessed value of each property in the code area. During this process of extending taxes, the assessor must test to ensure that the tax calculated for a property is within the limits set by Article XI, Section 11b of the Oregon Constitution (Measure 5, 1990). Taxes are separated into two categories: for education and for all other government services. If the amount of tax calculated for a property is more than \$5 per \$1,000 of real market value for education, or \$10 per \$1,000 of RMV for all other government purposes, the taxes in the category are reduced (“compressed”) to fall within the limit.

After calculating the taxes to be imposed on all taxable property in the county, the assessor certifies the assessment and tax roll to the county clerk. The clerk issues a warrant to collect the taxes. The tax roll is then turned over to the tax collector.

County Tax Collector

The county tax collector is responsible for collecting all property taxes. The tax collector mails the property tax statements and receives the payments. If a taxpayer fails to pay on time, the tax collector computes the delinquent interest they owe and mails a notice of delinquency. After taxes on real property have been delinquent for three years, the tax collector begins foreclosure proceedings on the property. At the end of the foreclosure process, the property is sold to satisfy the tax lien. For personal property with delinquent taxes the tax collector issues a distraint warrant and records the warrant with the county clerk. The property can be seized and sold at auction to satisfy the tax lien. The tax collector can also seize or garnish other assets of a person owing taxes on personal property.

The tax collector prepares a tax percentage distribution schedule from the tax roll information provided by the assessor (ORS 311.390). The amount of tax imposed for each taxing district is divided by the total tax imposed in the county to determine each districts’ distribution percentage. The percentage distribution schedule is given to the county treasurer. When taxes are paid, the treasurer distributes a proportionate share to each taxing district according to the schedule. All districts also share the loss when refunds are made.

A county court may opt to make an advance distribution to a taxing district from the county general fund of the entire amount anticipated to be collected from that district’s taxes (ORS 311.392). If a county chooses this option, the tax collector revises the percentage distribution schedule so that collections that otherwise would have been distributed to the district go instead to the county. If a county makes the advance payment before December 1, the tax collector deducts a three percent discount from the amount distributed to the district.

County Treasurer

The treasurer distributes the tax money and the interest earned on it to the taxing districts using the percentage distribution schedule (ORS 311.390).

When disbursing tax moneys, the treasurer sends each district a statement showing the amount of taxes being distributed. The statement is broken down to show the amount of taxes collected for the current year and each previous year. Percentage distribution schedules differ from year to year and all distributions must be made according to the schedule for the year to which the tax applies.

A local government may designate the county treasurer as the paying agent for its bonded debt. Any tax collected for the local government to pay bonded debt is then transferred to the treasurer. The tax revenue is placed in a special account for paying principal and interest on the bonds. Interest earned in the account

through investments is credited to the account. The treasurer must send financial statements on the bond account to the local government. If the account is short of funds to make payments, the local government must transfer the needed funds to the treasurer to make up the shortfall.

County Clerk

The county clerk is the official keeper of all public records for the county. Tax liens on real property and distraint warrants on personal property are recorded with the clerk. The county clerk is also the chief elections official of the county. In this capacity, the clerk's office provides the forms and instruction for submitting ballot measures for new property taxing authority.

The names, telephone numbers, and addresses of county officials for most Oregon counties can be found through the individual county Internet web sites. Links to county web sites can be found at <http://bluebook.state.or.us/local/counties/counties.html>.

The Municipal Debt Advisory Commission and Bonds

Some local governments are authorized by their principal acts to issue voter-approved general obligation bonds. Disclosure concerning the issuance of municipal bonds is very important. It requires complete and accurate financial and economic information from all issuers. The Oregon Municipal Debt Advisory Commission (MDAC) was initially established to help local governments deal with the disclosure requirements and to provide technical assistance to local governments and state agencies in the marketing and sale of their bond issues in Oregon. The Commission consists of seven members: the State Treasurer; representatives from cities, counties, school districts, and special districts; and two public members. Staffing of the Commission is provided by the **Debt Management Division** of the Oregon State Treasurer. Please contact the Debt Management Division at 503-378-4930 if you wish to receive notice of upcoming MDAC meetings.

Local governments must give prior notice of proposed issuance of new bonds to the MDAC (ORS 287A.640). MDAC also publishes the "*Oregon Bond Manual*" which offers advice to issuers who wish to prepare for their own bond sale. The manual is available on the State Treasurer's web site: <http://www.ost.state.or.us/divisions/DMD/MDAC/Index.htm>.

Department of Administrative Services and Revenue Sharing

Counties and cities that levy property taxes are eligible for periodic distributions from monies raised from state taxes on motor vehicle fuels, tobacco products and alcoholic beverages. The **Oregon Department of Administrative Services** (DAS) makes these distributions based on apportionment formulas found in statute that consider population, property taxes per capita and income per capita. Before a local government can share in this money, the governing body must adopt a resolution or ordinance in which they elect to do so, publish notice, and hold at least two public hearings. At these hearings, citizens must be given the opportunity to provide written or oral comment on the possible uses of the money, including offset against property taxes. One of the two hearings is held by the budget committee, and the other is held by the governing body. The local government must certify its compliance with these requirements to DAS.

Because the two hearings are held by the budget committee and the governing body, many jurisdictions combine these hearings with the first meeting of the budget committee and with the budget hearing. The resolution or ordinance electing to receive these distributions is often adopted at the same meeting of the governing body in which the budget is adopted.

Chapter 2—Formation, Dissolution, and Boundary Changes

Before it can impose a property tax, a local government must be officially “formed” and have approved boundaries and a legal description that defines its territory. General requirements affecting formation of special districts (all local governments except cities, counties, school districts, community college districts and education service districts) are found in ORS Chapter 198. ORS 198.705 to 198.955 provide general requirements for formation of new special districts, dissolution procedures, and other boundary changes resulting from annexations, withdrawal of property, mergers, and consolidations. The definitions for each of these terms are provided in ORS 198.705. Specific requirements for each type of special district are found in the different “*principal acts*”—the enabling statutes for each type of district. Most types of special districts and their corresponding principal acts are listed in ORS 198.010, 198.180, 198.210, 198.335 or 198.710.

The responsibility for preparing documents for formation and changes of organization is outlined in ORS 198.780. This statute also requires copies of the documents to be filed with the Department of Revenue, the Secretary of State, and the clerk and assessor of each county in which a district is located.

ORS Chapter 202 describes boundary changes, formations, and dissolutions for counties. Counties under the jurisdiction of local government boundary commissions are covered in ORS Chapter 199.

ORS Chapter 222 describes boundary changes, mergers, and consolidations for cities.

ORS Chapter 330 describes boundary changes and mergers for school districts.

ORS Chapter 334 describes boundary changes for education service districts.

ORS Chapter 341 describes boundary changes for community colleges.

Important: To have boundary changes reflected on the property tax roll, the **Department of Revenue Cadastral Information Systems Unit** must approve all taxing district boundary changes as provided in ORS 308.225. A local government seeking approval for a boundary change must file the final legal description and map of its boundaries with the county assessor and the department by March 31. This filing is in addition to the requirements in ORS 198.780. If a local government fails to file for department approval by the deadline, the county assessor cannot reflect the boundary changes on the tax roll for the following fiscal year. If a boundary change is filed after March 31, no taxes can be collected for a new district or from new territory until the second following tax year.

Map and legal description need to be filed by March 31 even if the boundary change will be effective between April 1 and June 30. These are called “*proposed boundary changes*.” If the map and description are approved and the change becomes final on or before June 30, the assessor will be able to reflect the changes on the upcoming tax roll. Proposed boundary changes often result when the proposal is made in a May election.

To meet all of the requirements, a new district or a district with a major boundary change should check with the county assessor and the Department of Revenue’s Cadastral Information Systems Unit at 503-945-8297 **well before March 31**.

A good source for more information on this subject is the Department of Revenue publication “*Boundary Change Information*,” 150-504-405. See the publication at http://www.oregon.gov/DOR/PTD/ptd_pubs.shtml.

Chapter 3—The Budget Process

Budget basics

A budget is a financial plan that includes estimates of expenditures and revenues for a single fiscal year or biennium. The local budgeting process provides procedures for evaluating a local government's needs and identifying revenue sources to meet those needs. A completed budget provides a means of controlling expenditures and a justification for imposing property taxes.

A local government's budget is a public document. Anything connected with the budget is subject to public inspection. The budget is a guide to the financial management of the local government. It provides information that encourages public participation in government. Temper the detail of the budget with common sense to make the document as informative and uncomplicated as possible.

Budget period

The governing body of a local government may select one of two fiscal periods for its budget. A **fiscal year** begins July 1 and ends June 30 [ORS 294.311(17)]. A **biennial** budget period begins on July 1 and ends June 30 of the second calendar year next following [ORS 294.311(7)]. For a discussion of how a biennial budget differs from fiscal a year budget, see Chapter 14.

Basis of accounting

Local governments are required by ORS 294.445 to maintain accounting records by fund, using a cash, modified accrual, or accrual basis of accounting. The selection of the basis of accounting is up to each local government.

Any change in the basis of accounting must be explained in the budget message for the year in which the change is planned. You must explain the reasons for the change and its effect on the fiscal operations of the district. Once a basis of accounting is adopted, that basis must be used throughout the fiscal year or biennium for which the budget was prepared [ORS 294.445(2)].

Budget officer

Each local government must have a budget officer, either appointed by the governing body or designated by the local government's charter. The budget officer is under the supervision of either the executive officer or the governing body. The budget officer prepares the proposed budget for the coming fiscal year. As ORS 294.331 states:

"The governing body of each municipal corporation shall, unless otherwise provided by county or city charter, designate one person to serve as budget officer. The budget officer, or the person or department designated by charter and acting as budget officer, shall prepare or supervise the preparation of the budget document. The budget officer shall act under the direction of the executive officer of the municipal corporation, or where no executive officer exists, under the direction of the governing body."

The budget officer does not have to live within the boundaries of the local government, unless required to do so by the local government's charter or ordinance. The budget officer cannot be an appointive member of the budget committee because appointed members of the budget committee cannot be officers, agents, or employees of the local government [ORS 294.336(4)]. See Chapter 8 for more detail on the budget committee.

The budget officer must present a balanced budget to the budget committee. To be in balance, the resources in each fund must be equal to the expenditures and other requirements in that fund. The estimates of resources and expenditures must be made in "good faith." That is, they should be reasonable and reasonably likely to prove correct, based on the known facts at the time.

The budget officer is responsible for publishing all of the notices required by Local Budget Law. Most budget officers are also responsible for monitoring budget expenditures during the budget year and notifying the governing body of the need to make any budget changes required after adoption.

Budget message

A budget message is prepared annually by the executive officer of the district. If there is no executive officer, the budget message is prepared by the presiding officer of the governing body (ORS 294.391). The executive officer or presiding officer may delegate the preparation of the budget message to the budget officer. The extent of the budget message depends upon the size and complexity of the budget, and any changes in fiscal policy or financial position since the preceding year.

The budget message must:

- Explain the budget document.
- Include a brief description of the proposed financial policies for the coming fiscal year.
- Describe the important features of the budget document in connection with the financial policies of the local government.
- Explain the reason for changes from the previous year in appropriation and revenue items.
- Explain the major changes in financial policy.

Any change in the basis of accounting must be explained in the budget message for the year in which the change is planned [ORS 294.445(2)].

The budget message is delivered to the budget committee at its first meeting. The budget message must be in writing, since it is a part of the complete budget document. The message can be delivered by anyone the executive officer or presiding officer appoints.

Budget calendar

A budget calendar is not required by law, but is highly recommended. If you schedule the steps of budget preparation, you can be more certain to allow sufficient time to complete the entire budget process before June 30, as is required by ORS 294.396. Since budget calendars are built around mandated requirements, review and revise them if the laws change. An example of a budget calendar appears at the end of this chapter.

Base the calendar on the sequence of events that influence budget-making. Schedule appointment of budget committee members, budget committee meetings, hearings, and publication of notices. Schedule audit review and financial reporting. Tax elections need not fit into the sequence, but a financial plan should be considered before a ballot measure is scheduled. The success or failure of a local option tax or a bond issue can determine the direction a governing body will take in planning its budget.

The Department of Education provides a suggested budget calendar to guide school districts.

Outline of the Budget Process

1. **Appoint Budget Officer** (ORS 294.331).
2. **Appoint Electors to the Budget Committee** (ORS 294.336). The budget committee consists of the governing body of the local government and an equal number of electors appointed by the governing body.
3. **Prepare Proposed Budget** (ORS 294.331). The budget officer prepares or supervises the preparation of a proposed budget to present to the budget committee.
4. **Publish Notice of Budget Committee Meeting** (ORS 294.401). After the proposed budget is prepared, the budget officer publishes a "Notice of Budget Committee Meeting." The notice must contain the date, place and time of the budget committee's first formal meeting, and of the meeting in which public comment will be heard. It may contain notice of several meetings, if the budget officer anticipates that more than one meeting will be needed. If the notice is published in a newspaper, it must be published at least twice, five to 30 days before the scheduled budget committee meeting date. The two publications must be separated by at least five days. If the notice is hand delivered or mailed, only one notice is required, not later than 10 days before the meeting. See Chapter 9 for more detail on publication requirements.

5. **Budget Committee Meets** (ORS 294.401). The budget message is delivered at the first budget committee meeting. The budget message explains the proposed budget and any significant changes in the local government's fiscal policy or financial position. After the initial meeting, the budget committee may meet as many times as needed to revise and complete the budget. At least one meeting must provide the opportunity for questions and comments from any interested person. The budget committee is allowed to meet for training and advisory reviews throughout the year, but the budget may not be deliberated before the first meeting for which notice is published. All meetings are subject to Oregon's Public Meetings Law (ORS Chapter 192).

The budget officer may make the proposed budget available to the members of the budget committee at any time before the first meeting, or may distribute the budget at the first meeting. At the time the budget is given to the committee, a copy must be filed in the office of the district. The budget becomes a public record at this point and must be made available to anyone who is interested in viewing it.

6. **Budget Committee Approves Budget** (ORS 294.406). The budget committee considers the budget proposed by the budget officer and comments made by the public and may make additions or deletions. When the budget committee is satisfied, it approves the budget. The budget approved by the committee specifies the amount or rate of each ad valorem tax levy. Approval of the budget and of the amount or rate of tax should be by motion and be recorded in the minutes of the meeting.
7. **Publish Budget Summary and Notice of Budget Hearing** (ORS 294.421). After the budget is approved, the governing body of the local government must hold a budget hearing. The governing body must publish a *"Notice of Budget Hearing and Financial Summary"* five to 30 days before the scheduled hearing. This information must either appear in a newspaper of general circulation, be mailed or hand delivered. See Chapter 9 for more detail on publication requirements.
8. **Hold Budget Hearing** (ORS 294.430). The governing body must hold the budget hearing on the date specified in the public notices. The purpose of the hearing is to listen to citizens' testimony on the approved budget. Additional hearings may be held. All hearings must be open to the public.
9. **Adopt Budget, Make Appropriations, Impose Taxes, and Categorize Taxes** (ORS 294.435). The governing body may make changes in the approved budget before it is adopted. Before the beginning of the fiscal year to which the budget relates, the governing body can also make changes to the adopted budget. However, if the governing body wants to make any of the following changes, they must first publish a revised *"Notice of Budget Hearing and Financial Summary"* and hold another public hearing:
 - If the governing body increases taxes over the amount approved by the budget committee.
 - If the governing body increases estimated expenditures in a fund over the amount approved by the budget committee by more than \$5,000 or 10 percent, whichever is greater.
 - If the governing body increases estimated expenditures in a fund in a biennial budget over the amount approved by the budget committee by more than \$10,000 or 10 percent, whichever is greater.

After the budget hearing, and after considering public testimony, the governing body prepares a resolution or ordinance that formally adopts the budget, makes appropriations and, if property taxes are needed, levies and categorizes each tax. The budget is the basis for making appropriations and certifying the taxes. The resolutions or ordinances adopting the budget and making appropriations must be adopted no later than June 30 [OAR 150-294.435(4)]. See Chapter 11 for more information on making appropriations.

10. **Certify Taxes** (ORS 294.555). The next step in the budget cycle is to certify any property taxes to the county assessor. Taxes must be certified every year, even if the local government operates on a biennial budget.

The documents submitted to the assessor's office by a taxing district subject to Local Budget Law are:

- Two copies of the notice of levy and the categorization certification (Form LB-50, ED-50 or UR-50). This form authorizes the assessor to place the district's taxes on the property tax roll.

- Two copies of the resolution statements that adopt the budget, make appropriations, and impose and categorize taxes; and
- Two copies of any successful tax ballot measures for new taxes being imposed for the first time.

School districts also submit a copy of the budget and tax certification forms to their education service district and to the Oregon Department of Education. See Chapter 12 for more information on certifying taxes.

11. **Post-Adoption.** After the preceding steps have been completed, changes to the budget are restricted by statute:

- ORS 294.326 authorizes certain appropriations as an exception to the budget process.
- ORS 294.450 governs the transfer of appropriations within a fund or from the general fund to another fund.
- ORS 294.455 provides for the expenditure of funds to repair or replace property that has been damaged or destroyed. It also allows funds to be expended because of a civil disturbance or natural disaster.
- ORS 294.460 authorizes loans from one fund to another.
- ORS 294.480 specifies the conditions under which a local government may adopt a supplemental budget, and explains the process.
- ORS 294.483 provides exceptions to the budget process for certain debt service expenditures.

See Chapter 13 for more information on budget changes after adoption.

This is an overview of the budget cycle. For more detailed information on each stage of the budget process, refer to the section of this manual that is devoted to each specific stage and to Appendix B.

Local Governments Not Subject to Local Budget Law

Most local governments and other municipal corporations in Oregon are subject to Local Budget Law and must prepare and adopt a budget according to that law. There are a few exceptions. The following districts are totally or partially exempt from Local Budget Law requirements (ORS 294.316):

1. Drainage districts organized under ORS 547.
2. District improvement companies organized under ORS 554.
3. Highway lighting districts organized under ORS 372.
4. Irrigation districts organized under ORS 545.
5. Road districts organized under ORS 371.

Note: Road districts that impose a property tax must submit tax certification documents. County road districts organized under ORS 371.097 *are* subject to local budget law.

6. Soil and water conservation districts organized under ORS Chapter 568 that will not impose an ad valorem tax during the ensuing year. Those that do impose a property tax during the ensuing year or biennium are subject to Local Budget Law.
7. Municipal public utilities operating under separate boards or commissions, authorized under ORS Chapter 225 and city charters, and people's utility districts organized under ORS Chapter 261, both operating without ad valorem tax support during the ensuing year.
8. Housing authorities organized under ORS Chapter 456 that are not carrying out urban renewal activities using tax increment financing under ORS 457.440 during the ensuing year.

9. Water control districts, organized under ORS 553, that will not impose taxes during the ensuing year.
10. Hospital financing authorities organized under ORS 441.525 to 441.595.
11. Export trading corporations organized under ORS 777.755 to 777.800.
12. Diking districts organized under Chapter 551.
13. Health districts organized under ORS 440.315 to 440.410. Health districts may not adopt a biennial budget. Their budget process is outlined in ORS Chapter 440.
14. Intergovernmental entities or councils of governments formed under the provisions of ORS 190.010, unless they levy property tax. These organizations are subject to separate budget requirements found in ORS 294.900 to 294.930. Those that impose a property tax during the ensuing year or biennium are subject to Local Budget Law, ORS 294.305 to 294.565.

In addition to the local governments listed, a newly formed local government is not required to prepare a budget during the first fiscal year it is formed. If a local government is formed between March 1 and June 30, it does not have to prepare a budget for the upcoming fiscal year either [ORS 294.326(11)].

Local governments that are not required to follow Local Budget Law may choose to follow the process in preparing their budgets anyway. Local Budget Law provides a framework of sound budgeting practices.

Urban renewal agencies

Urban renewal agencies are subject to the Local Budget Law and must complete the process separately from the parent municipality (county or city).

Public meeting law: ORS 192.610 to 192.690

The Public Meeting Law policy statement (ORS 192.620) states:

“The Oregon form of government requires an informed public aware of the deliberations and decisions of the governing bodies and the information upon which such decisions were made. It is the intent of ORS 192.610 to 192.690 that decisions of governing bodies be arrived at openly.”

Local Budget Law meetings fall within the Public Meeting Law. Take a few moments to review these statutes. Follow the Public Meeting Law for all budget meetings where deliberations toward a decision are made. The *“Attorney General’s Public Records and Meetings Manual”* is available for a fee from the Oregon Department of Justice, 1162 Court Street NE, Salem OR 97310 or online at <http://www.doj.state.or.us/pros/manual.shtml>. This manual summarizes the requirements for regular, special, and emergency meetings, and for executive sessions. A section is included on the requirements for taking minutes and on enforcement provisions.

If a local government schedules budget committee meetings, budget hearings or other meetings in addition to those to which the special notice requirements of Local Budget Law apply, Public Meeting Law provides the requirements for public notice.

Public inspection of the budget document

ORS 294.401(8) provides:

“The budget officer shall file a copy of the budget document in the office of the governing body of the municipal corporation immediately following presentation of the budget document to members of the budget committee under subsection (6) or (7) of this section. The copy shall become a public record of the municipal corporation.”

ORS 294.401(9) states:

“The governing body shall either provide the means of duplicating the budget or part thereof . . . , or shall provide copies of the budget document or part thereof so that a copy of the budget document or part thereof may be readily obtained by any individual interested in the affairs of the municipal corporation.”

A local government may charge a reasonable fee for photocopying the budget document [ORS 192.440(3) and OAR 150-294.401(7)].

In addition, every local government is subject to the Public Records Law. The basic premise of this law is stated in ORS 192.420:

“Every person has a right to inspect any public record of a public body in this state, except as otherwise expressly provided by ORS 192.501 to 192.505.”

Anyone may examine any portion or all of the budget document. While disclosure is the prescribed policy, the Public Records Law makes it clear that agencies can *“adopt reasonable rules necessary for the protection of records and to prevent interference with the regular discharge of duties...”* ORS 192.430.

A good source of information on this subject is the *“Attorney General’s Public Records and Meetings Manual.”*

Sample Budget Calendar	Date
1. Appoint budget officer and budget committee	December 8
2. Prepare proposed budget	February 28
3. Publish 1st notice of budget committee meeting no more than 30 days before the meeting	March 16
4. Publish 2nd notice of budget committee meeting at least 5 days after 1st notice, but no less than 5 days before the meeting Note: If publishing by mail or hand delivery, only one notice is required, at least 10 days before the meeting	March 24
5. Budget committee meeting	March 30
6. Second budget committee meeting (if needed)	April 6
7. Publish notice of budget hearing 5 to 30 days before the hearing	April 19
8. Hold budget hearing	May 4
9. Board meeting to enact resolutions to adopt budget make appropriations impose and categorize taxes.....	June 15
10. Submit tax certification documents to the assessor by July 15.....	July 12
11. Submit copy of complete budget document to county clerk	September 30

Chapter 4—Types of Funds

A budgetary fund, as defined by Oregon Administrative Rule 150-294.352(1)-(A), is a fiscal and accounting entity of self-balancing accounts to record cash and other financial resources, related liabilities, balances and changes, all segregated for specific, regulated activities and objectives.

The use of funds for budgeting is required by state and federal laws and rules, and possibly by local government charters, resolutions and ordinances. The use of funds is a principle of sound budgeting and accounting practice.

New funds can be included in the budget being prepared for the ensuing year or added by supplemental budget during the year. A new reserve fund requires a resolution that specifies the purpose for which the reserve moneys can be spent.

The governing body may create whatever funds it feels are necessary to control the use of restricted or dedicated revenues. However, good budgeting practice is to maintain only those funds required to meet legal and operating requirements. Unnecessary funds complicate a budget, making it more difficult to understand and work with.

Several statutes which authorize local governments to impose taxes or to provide special services require that separate funds be created. Examples of such funds are: The Bancroft Bond Fund (ORS 223.285), County School Fund (ORS 328.005), and a reserve fund (ORS 294.525).

Major types of funds used in setting up budget and accounting records are:

- General Fund
- Special Revenue Fund,
- Capital Project Fund,
- Debt Service Fund,
- Internal Service Fund,
- Enterprise Fund,
- Trust and Agency Fund, and
- Reserve Fund.

Any of these fund types may be used, depending upon the complexity and type of activity of a local government. The choice of fund structure is a fiscal policy decision of the governing body.

General fund

The purpose of a general fund is to record financial transactions relating to all activities for which specific types of funds are not required. It is the general operating fund for the local government. Most local governments have a general fund. Many small districts have only a general fund.

Special revenue fund

Special revenue funds should be set up for dedicated local option tax levies, specific purpose grants and other revenues when required by statute, charter provision, or the terms of a grant. The number of such funds depends upon the activities of the local government and how it is funded. Some city home rule charters provide for a general fund and several other special funds. The general requirement is that dedicated revenues must be used for the specific purpose authorized, and separate funds should be established for them (ORS 311.350). Try to keep the number of special revenue funds to a minimum.

Separate special revenue funds for local option taxes

The Oregon Constitution, Article IX, Section 3, states: *“No tax shall be levied except in accordance with law. Every law imposing a tax shall state distinctly the purpose to which the revenue shall be applied.”*

Establish a separate special revenue fund for each local option tax providing money for a capital project or other specific purpose. The money received must be retained in such a fund and spent only for the purpose for which the tax was approved (ORS 280.040). This provides fiscal integrity for the local option tax and ensures that it is used to carry out the purpose described in its ballot measure. If expenditures from a specific purpose local option tax fund are no longer needed, the governing body may abolish the fund and transfer the balance and any future proceeds to the general fund (ORS 294.475). The tax imposed for the special fund then must be discontinued.

Revenue from local option levies for operations may be budgeted in the general fund.

Capital project fund

A capital project fund is a type of special revenue fund that is used to record the resources and expenditures used to finance the building or acquisition of capital facilities that are nonrecurring major expenditure items. Resources can include the proceeds from the sale of general obligation bonds, tax revenue from specific purpose local option taxes, grants, transfers from other funds, or other revenues authorized for financing capital projects. A capital project fund is normally established when a capital project or series of projects is authorized. It is dissolved when the project is completed. Several related projects financed from one bond issue may be accounted for in one fund if there are no provisions to the contrary in the bond contract.

Establish a capital project fund for the expenditure of bond sale proceeds. If voter approval is received after the regular budget is adopted and bonds are sold during the fiscal year, a supplemental budget is not required to expend the proceeds [ORS 294.326(5)]. However, it is good fiscal budgeting for the governing body to establish a capital project fund to account for the proceeds and to adopt a resolution or ordinance appropriating the expenditures.

If the bond sale receives voter approval before the adoption of the regular budget, then the capital project fund and the expenditure of the proceeds must be included in the regular budget. Also, if the bonds were sold in a preceding year and the proceeds carried forward to the current year, then the capital project fund and the expenditure of the proceeds must be budgeted in the regular budget.

Bond proceeds may be used to pay attorneys' fees and other expenses related to the preparation, authorization, issuance and sale of the bonds (ORS 287A.300). These expenses can be budgeted in the capital project fund or the general fund. These expenses cannot be paid from a debt service fund if the fund includes a property tax levy that is categorized as "excluded from limitation."

Debt service fund

A debt service fund is used to budget for the payment of principal and interest on all long-term debt, including that payable exclusively from revenue-producing enterprises [OAR 150-294.352(1)-(A)]. There may be several bond issues accounted for in one debt service fund, but you must establish separate funds for general obligation bonds and revenue bonds. Transactions to record the redemption of existing bonds with proceeds of refunding bonds are also recorded in debt service funds.

Taxes dedicated to repay bonds cannot be diverted or used for any other purpose [ORS 287A.140, 328.260(3), etc.].

Transfers from a debt service fund that levies taxes that are categorized as excluded from Measure 5 limitation are not allowed in most cases. There are two conditions under which a transfer may be made:

1. To repay an interfund loan that was made to the debt service fund from other moneys when collections of taxes levied for exempt bonded indebtedness were not sufficient (ORS 294.381). Such a transfer should be budgeted as a requirement in the debt service fund called "Loan repayment to _____ Fund."
2. If a surplus remains after all interest and principal of the bond are paid. The fund may be dissolved and the balance transferred to the general fund, unless other provision was made when the fund was created (ORS 294.475).

As stated above, attorneys' fees and other expenses related to the preparation, authorization, issuance and sale of the bonds cannot be paid from a debt service fund if the fund includes a property tax levy that is categorized as excluded from limitation.

Debt service funds may include a requirement for a debt service reserve (ORS 294.525 and ORS 287A300). If the bonded indebtedness is a tax credit bond or other bond that bears interest that is includable in gross income under the Internal Revenue Code, the debt service fund may include the deposits that the municipal corporation has agreed to make in a sinking fund that is dedicated to pay the bonded indebtedness (Or. Law 2009, Chapter 538).

Bancroft bond fund

A “*Bancroft Bond Redemption Fund*” is a type of debt service fund required to record the debt payments for principal and interest on Bancroft Bonds issued under ORS 223.205 to 223.295.

Internal service fund

An internal service fund finances and accounts for services furnished by one department or agency to another department or agency of the same local government. All such expenditures must be budgeted. Amounts expended from the fund are resourced from operating earnings or with transfers from other funds to the internal service fund.

Enterprise fund

An enterprise fund is a fund established to finance and account for acquiring, operating, and maintaining facilities and services which are primarily self-supporting from user charges and fees. A separate fund makes it possible to set up separate accounting data on the operations of the facility. This information can be used to determine what the service charges should be. It can also provide better controls and information on the management of the resources and expenditures. Examples of enterprise funds are for water, gas and electrical utilities, swimming pools, airports, parking garages and transit systems operated by cities, and some school food service operations. Separate funds may be established for each utility or enterprise.

Trust and agency fund

Assets are sometimes held, or revenue received, by local governments in a fiduciary capacity, to be used for a certain specified purpose. For example, you might receive a bequeath with the provision that the principal amount be invested and the interest income be used to aid the library or park system or to maintain the grounds of the cemetery. These revenues and expenditures are accounted for in a trust and agency fund. Most trust and agency funds are not exempt from local budget law. Expenditures can be made from these funds only if the funds are included in the adopted budget and appropriations made.

Reserve fund

A local government may set up a reserve fund to accumulate money for financing the cost of any service, project, property or equipment that the district can legally perform or acquire (ORS 294.525). Under Local Budget Law, a reserve fund is the appropriate way to save money from year to year. Expenditures can be appropriated and made directly from a reserve fund.

The resolution or ordinance creating a reserve fund should state the purpose for which the money in the fund can be spent. At least every 10 years after the establishment of a reserve fund, the governing body must review the fund to decide if it should be continued or abolished. Any unexpended or unobligated balance left in the fund when it is abolished can be transferred to the general fund or any other fund designated by the governing body.

Money in a reserve fund can only be used for the purpose for which the fund was established. Expenditures for that purpose may be budgeted and appropriated directly from the reserve fund. Transfers may not be made from a reserve fund unless the fund that receives the transfer uses the money for a purpose consistent with the purpose of the reserve fund. Interfund loans can be made from a reserve fund under ORS 294.460.

School districts have special statutory authority to set up reserve funds for the purchase of automotive equipment. Refer to ORS 328.470 for more details.

Chapter 5—Estimating Budget Resources and Requirements

Estimating resources

“Each municipal corporation shall estimate in detail its budget resources for the ensuing year by funds and sources” [ORS 294.361(1)]. Generally, an “estimate” is defined as an approximate calculation or an opinion formed from imperfect data. All resource and requirement estimates should be based on “good faith.” That is, they should be reasonable and be reasonably likely to prove correct, based on the known facts at the time.

The budget must be constructed so that the total resources in each fund equal the total requirements in that fund [OAR 150-294.352(1)-(B)]. When the resources are equal to the requirements, the fund is said to be “in balance.”

All known resources and requirements must be budgeted. The only exception is if all three of the following are true:

- (a) The municipal corporation holds the resources merely for safekeeping;
- (b) Expenditure of the resources is not under the control of the municipal corporation or a third party chosen by the municipal corporation; and
- (c) The resources are expended for a purpose other than that for which the municipal corporation levies a tax or expends funds [OAR 150-294.361(1)(A)].

Budget resources include but are not limited to: the cash balance, cash equivalents, and investments or net **working capital** that will be carried forward from the previous fiscal year, prior-year taxes, current-year taxes, fees, fines, interest on deposits or securities of any kind, endowments, annuities, sales of property or other assets, grants, interfund transfers, and revenues from any and all other sources [ORS 294.361(2)].

Budget resources do not include moneys accumulated under an approved employee deferred compensation plan and the interest earned on such moneys, the estimate for the ensuing year of discounts under ORS 311.505, or the estimates of uncollectible amounts of taxes, fees, or charges for the ensuing year [ORS 294.361(3)].

Beginning cash estimates (cash basis of accounting)

Estimate the beginning cash balance in a fund as follows:

1. Establish the cash balance on hand at the time the proposed budget is prepared. Include any investments or cash equivalents as well as cash and the money in your checking account.
2. To this amount, add the amount of revenue estimated to be received from all sources for the rest of the current fiscal year.
3. From the sum of 1 and 2, subtract a reasonable estimate of expenditures for the rest of the fiscal year.

The remainder will be the estimate of the beginning cash balance to be used in preparing the budget for the next fiscal year.

Current year property taxes

Many local governments rely heavily on local property taxes to finance the services they offer. In some cases, services are paid for entirely by property taxes. See *“Chapter 7 – Estimating Property Taxes Available as a Budget Resource”*, for an explanation of how to determine how much current year property tax revenue you can estimate as a budget resource.

Prior year taxes

Most local governments that impose a property tax receive revenue from the collection of delinquent taxes that were imposed in previous years. These prior years' taxes are treated as nontax resources in the budget.

The county tax collector can help you estimate the amount of prior years' taxes.

The amount of prior years' taxes can also be estimated using history. Prior year's taxes are disbursed by the county treasurer using the percentage distribution schedule from the year in which the taxes were levied. Most treasurers provide a statement to accompany each payment. The statement breaks down the payment to show the amount collected for the current year and the respective amounts for each prior year. The statement may also show how much is attributable to each tax levy (permanent rate, local option or bonds). If you save these statements, you will soon have a history of how much you receive from prior year taxes.

If complete information is not available, a local government can allocate property tax revenues on a percentage basis to each fund that imposed a tax, based on the amount of tax imposed for each fund (ORS 310.170). Proper accounting methods and records of tax collections provide accurate historical information to support resource estimates for the following fiscal years.

Local Governments that receive a "buy out" distribution of their entire year's property tax receipts from the county in one lump sum payment in November/December do not receive prior year's taxes in subsequent years.

Fees, fines, and assessments

Any revenues that result from the operation of a local government or that are paid by its customers for programs or services provided by it should be budgeted as a resource in the fund from which the operation or service is financed.

System development charges imposed under ORS 223.297 to 223.314 are a budget resource.

Interest on investments

Local governments must keep their cash, cash equivalents, and investments in interest bearing accounts. The interest earned is a resource for the fund in which the asset is budgeted. If interest earnings on assets in several funds are reported as a lump sum by the financial institution, the budget officer must estimate the amount of interest to allocate to each fund, based on the relative amount of interest-earning assets in each fund.

Grants and gifts

Grants, gifts, donations and bequests that are awarded to a local government before June 30 should be budgeted as a resource. If you have applied for a grant but it hasn't been awarded yet, you may still include that money as a resource. Alternatively, your policy may be to wait until after grants have been confirmed to add the grant proceeds to your budget.

Revenue sharing money from the State of Oregon is a resource for the cities and counties that receive it.

Budgeted interfund transfers

The budget may include transfers of revenue between funds. Money received in a fund through a transfer from another fund must be budgeted as a resource in the receiving fund. The originating fund budgets the transfer as a requirement (ORS 294.361).

Bond proceeds

The proceeds from the sale of bonds are a budget resource.

The principal act under which many types of local governments are formed allows for the issuance of general obligation bonds after voter approval. The principal act may also set limits on the amount of indebtedness a local government may incur, and provide for payment of bond principle and interest through the levy of taxes. ORS Chapter 287A relates generally to the borrowing and bonding authority of counties, cities, and special districts. Refer to the statute under which your local government was formed for more specific bonding information. "Appendix C" lists local governments' bond taxing powers and limitations.

Bancroft bonds

The Bancroft Bonding Act (ORS 223.205 and 223.210 to 223.295) is a financing method that may be used by cities, counties, and certain special districts with the specific authority to do so.

The purpose of the Bancroft Bonding Act is to provide a way for property owners to pay for improvements, such as streets, water supply systems, storm sewers, etc., in equal annual installments spread out over a period of years. These assessments are a budget resource.

Insurance proceeds

The expenditure of insurance proceeds received to repair or replace property after a casualty loss does not have to be budgeted in the year the proceeds are received. If any of the money is carried over to the following fiscal year, it should be budgeted as beginning fund balance.

Short-term borrowing

Local governments may contract short-term indebtedness by issuing revenue bonds, credit enhancement devices or short-term promissory notes for the purposes of meeting current expenses, retiring outstanding bonds, or paying the interest on bonds (ORS 287A.180, ORS 328.565, and ORS 341.715). Generally, any borrowing with a term of 13 months or less is considered short-term for the purposes of Local Budget Law.

Tax anticipation notes are a form of short-term borrowing. They are issued in anticipation of the collection of property taxes. Short-term loan or bond amounts are limited to 80 percent of the property taxes or other revenues, except grant monies, that are budgeted or otherwise reasonably expected to be available to repay the borrowing in that fiscal year. Before any formal action is taken by the governing body, consult ORS 287A.180 for more information.

Interest payments must be budgeted when a local government expects short-term borrowing. The principal and the repayment of the principal of short-term debt, however, need not be included as a budgeted resource or expense. The loan and repayment schedule may instead be reported in narrative form or as a footnote to the budget. The narrative or footnote must indicate that the principal and payments are liabilities of the fund from which they are made. (ORS 294.443).

Local Budget Law has no statutory limitations on any local government entering into an installment contract.

Local Budget Law does not authorize any local government to obligate itself to make payments for a period of more than one year. Any authority to enter into such an installment contract must be found elsewhere in the statutes or in the charter of the local government.

If the governing body obligates a local government beyond 13 months, the indebtedness could be considered an addition to the local government's outstanding long-term debt. Such debt is generally restricted by the Oregon Constitution, statute, or charter. Any indebtedness (including bonds and notes) is governed by the general indebtedness limitations of the charter or statutes. The proceeds of long-term borrowing must be budgeted as resources in the year of receipt.

Deficit or negative resources

Do not budget a negative resource [OAR 150-294.361(1)-(B)]. A negative line item entry distorts the actual total of revenues. Budget only the amount of revenue estimated to actually be received by a fund. If there is an anticipated deficit in a fund, budgeted expenditures should be reduced or other resources identified to maintain a balanced fund. Negative budgeted fund balances are a violation of Local Budget Law.

If actual resources fall short of the amount estimated, expenditures cannot be made in excess of available revenues. Although it is not required to do so, a governing body may, after holding a public hearing, enact a resolution or ordinance to adjust budgeted resources and reduce appropriations to reflect such a shortfall (ORS 294.435).

Special provisions for county budgets

County budgets must contain a summary of revenues and expenditures for major programs funded in part by state resources. The summary must include, at a minimum, functions related to assessment and taxation, community corrections, district attorneys, juvenile corrections and probation, public health, mental health and chemical dependency, veterans services, roads and economic development. The summary must provide the total expenses for each program and identify the revenues used to fund the program from general county resources, state grants, federal grants, video lottery resources, and other resources as applicable. The summary must include the revenues and expenditures in the adopted budget, revenues and expenditures in the prior year's adopted budget, and actual revenue and expenditure data from the two previous years.

"General county resources" means resources from property taxes, state and federal shared revenue, beginning balances available for expenditure and interest not required to be allocated to specific programs or activities.

Estimating and Classifying Expenditures

Each local government must prepare estimates of expenditures and other budget requirements by line item for the upcoming fiscal year.

Local Budget Law requires that expenditures and other requirements be shown in the budget in certain ways. The budget is broken down into funds which are discussed in Chapter 4. The expenditure line items for each fund must be identified in one of two ways, either by organizational unit or program, depending on how the district is structured and the services it provides. Subdividing a fund into organizational units or programs can make the budget more understandable.

Organizational unit

Some local government budgets are organized by organizational units. An organizational unit is an administrative subdivision of the local government which is responsible for specific services, functions or activities. These are usually identified as departments, divisions, offices, etc. [ORS 294.311(30)]. For example, a city may be structured into organizational units such as: Police Department, Public Works Department, Office of the City Recorder, etc.

Hospitals, school districts, ESDs, and community colleges may not use organizational units when preparing expenditure estimates. (ORS 294.356).

Program

Many local budgets are structured by program. A program is a group of related activities aimed at accomplishing a major service or function [ORS 294.311(32)]. Programs could include services and functions such as: fire protection, water, sewers, road maintenance, etc. Most special districts are formed to provide just one or two major services. The budgets of these districts are considered program budgets unless one or more of the funds are organized by organizational unit. School budgets that are organized according to the classification of accounts in the "*Oregon Department of Education's Program Budgeting and Accounting Manual for School Districts*" are considered program budgets.

Object classifications

The estimated expenditures in each fund must be arranged by organizational unit or program. Within each organizational unit or program, the estimates of line item expenditures must be categorized by the object classifications of personal services, materials and services and capital outlay. In addition, separate estimates must be made in each fund for special payments, debt service, interfund transfers, operating expenses and general capital outlays that cannot be allocated to one particular unit or program [ORS 294.352(3)].

Within each program function, school districts must detail expenditure estimates by object within each object classification [ORS 294.352(4)]. More information on this breakdown can be found in the "*Oregon Department of Education's Program Budgeting and Accounting Manual*" at <https://district.ode.state.or.us/docs/sfda/manuals/>.

Community colleges must detail expenditure estimates by sub-object classification. More information is in the "*Oregon Department of Community Colleges and Workforce Development's Community College Accounting Manual*" at http://www.oregon.gov/CCWD/pub_rpts.shtml.

Personal services

Personal services includes salaries, benefits, workers compensation insurance, Social Security taxes and other costs associated with having employees.

The estimated expenditures for personal services must include a listing of the salaries for each officer and employee, except hourly wage and part-time employees. Employees of like classification and salary range may be listed by the number of those employees, the limits of each salary range and the amount of their combined salaries [ORS 294.352(5)]. The number of employees may be stated in full time equivalents (FTE).

Personal services estimates may include a separate schedule detailing the salaries of persons who perform services for two or more organizational units or programs. For example, one staff member may provide services to the administration office and the police department. Non-education local governments should use the format of Form LB-40 at <http://www.oregon.gov/DOR/PTD/localform.shtml>.

Materials and services

Materials and services include contractual services (such as attorney or accountant fees), materials (such as office supplies, fuel, or repair parts), and other operating expenses (such as utilities, lease payments, fire insurance, or travel). Estimates should be detailed sufficiently to disclose all proposed expenditures, but may be combined into logical groupings such as office supplies, utilities, etc.

Capital outlay

Capital outlay is defined as expenditures that result in the acquisition of, or addition to, fixed assets. Fixed assets are defined as assets of a long-term character that are intended to continue to be held or used, such as land, buildings, machinery, furniture, and other equipment. Each local government may establish its own criteria or cost threshold for distinguishing capital outlay expenditures from other operating expenses.

Special payments

Special payments include payments of taxes, fees or charges collected by one entity and then made to another organization on a pass-through basis, grants made or distributed to others that will be expended by them, and other expenditures that do not fit into one of the other expenditure categories.

Debt service

Debt service includes the repayment of any loan, bond or other borrowing. Expenditures for repaying bond principal and interest for which a separate property tax levy is imposed should be in a debt service fund and should be separately shown for each bond issue, with separate amounts for principal and interest payments [ORS 294.352(7)]. Each bond issue should be identified by the bond issue date, and each payment by the exact payment date. Any unappropriated ending fund balance associated with a bond issue must be itemized by the payment date and amount, and separately identified by bond issue.

Repayment of other loans or borrowings may be identified less specifically. A debt service payment not requiring a separate tax levy may be included in the general fund or another fund.

Interfund transfers

Interfund transfers are budgeted transfers of resources from one fund to another. The fund making the transfer shows the amount transferred as a budget requirement. The fund receiving the transfer shows it as a fund resource. If the money is to be expended, the fund receiving the transfer also shows that expenditure as a requirement. In that case, the money may be said to be "counted twice" in the budget; once as the transfer out and once as the actual expenditure.

General operating contingency

An estimate for **general operating contingency** may be included in any operating fund. The estimate is based on the assumption that operations may necessitate spending during the year on items that cannot be specifically identified at the time the budget is being prepared. The contingency is not a separate fund. It is a line item

within an operating fund, separate from any of the other major object classifications. Its purpose and proper use are explained in Oregon Administrative Rule 150-294.352(8).

Each operating fund (each fund from which operating expenses are paid) is allowed one appropriation for a general operating contingency. A non-operating fund cannot have an appropriation for a contingency. The expenditures in non-operating funds can usually be accurately estimated and are not subject to unexpected variations arising from operations. A debt service fund is an example of a non-operating fund that cannot contain an operating contingency.

The contingency estimate must be reasonable, based on past experience, and consistent with the purpose of the particular fund involved. It cannot be made in place of an estimate for expenditures which are known to be necessary and can be anticipated. It must not be used to cover up improper or loose budgeting practices. It must not be used as a "savings account" in which to sequester excess revenues.

During the fiscal year, money budgeted and appropriated as contingency must be transferred to another appropriation category before it can be expended. A resolution or ordinance or a supplemental budget must be passed before any of the contingency can be transferred. If the expenditure is to be made from another existing appropriation category, a resolution or ordinance may often be used to authorize the transfer and expenditure. The operating contingency then is reduced and the receiving appropriation category increased by the same amount so the fund remains in balance. If there is no existing appropriation category suitable for the expenditure, then a supplemental budget is required to create the appropriation category and transfer the resources from contingency.

There is no statutory limit on the amount which may be budgeted and appropriated for general operating contingency. However, the amount which may be transferred from contingency by resolution over the course of a year is limited to 15 percent of the amount originally appropriated in the fund [ORS 294.450(2)]. Transfers which in total exceed 15 percent of the original appropriation may be made only after adopting a supplemental budget for that purpose.

For example, if the total appropriation in a fund is \$100,000, including \$20,000 for the general operating contingency, only 15 percent, or \$15,000, of the appropriation may be transferred from the contingency appropriation by resolution or ordinance. The remaining \$5,000 can be transferred only through a supplemental budget.

Unappropriated ending fund balance

Budgeted requirements may include an **unappropriated ending fund balance**. The purpose of an unappropriated ending fund balance is to provide the local government with a cash or working capital balance with which to begin the fiscal year following the one for which this budget is being prepared (ORS 294.371 and OAR 150-294.371).

When calculating the amount of an unappropriated ending fund balance, determine your cash requirements between July 1 of the fiscal year following the one for which you are budgeting, and the time sufficient revenues will become available from other sources to meet cash flow needs. The maximum amount that should be budgeted in an unappropriated ending fund balance is the difference between the cash requirements and the other resources available during that period. Do not use an unappropriated ending fund balance as a "savings account" in which to sequester large amounts of excess funds.

Do not include an unappropriated ending fund balance in the resolution or ordinance making appropriations. No expenditures can be made from an unappropriated ending fund balance during the year in which it is budgeted. The only exception to this is in an emergency situation arising during the year by involuntary conversion (theft, vandalism, accident, etc.), civil disturbance or natural disaster. If such an emergency occurs and the revenue in the unappropriated ending fund balance is needed to replace the damaged property, it may be appropriated with a resolution or ordinance or through a supplemental budget after that event occurs (ORS 294.455).

Toward the end of the fiscal year in which an unappropriated ending fund balance is budgeted, the budget officer should monitor actual cash flow carefully. A revenue shortfall during the year may mean that spending may have to be reduced to have sufficient cash in the unappropriated ending fund balance. If expenses cannot be reduced, then the actual amount in the unappropriated ending fund balance may be less than planned. This is allowed as long as expenditures remain within the fund's budgeted appropriation authority and there has been a revenue shortfall.

Reserved for future expenditure

An amount “**reserved for future expenditure**” may be included in a reserve fund or in another fund when specifically allowed by statute. A reserve for future expenditure is a line item requirement which identifies funds to be “saved” for use in future fiscal years.

Since the initial intent when the budget is adopted is not to spend the amount reserved for future expenditure, do not include it in the resolution or ordinance making appropriations. If the need arises during the fiscal year to spend this money, a supplemental budget may be adopted to appropriate the expenditure.

An exception to this is in an emergency situation created when property is destroyed by involuntary conversion, civil disturbance or natural disaster. ORS 294.455 describes when and how any available moneys, including reserved amounts, can be used to make such expenditures.

Debt service reserves

A debt service fund can include a line item for a debt service reserve if one is required by the bond sales agreement. Alternatively, a separate reserve fund can be created for such debt service reserves. A debt service reserve cannot be funded by a property tax levy that is excluded from the Measure 5 limitations. If a reserve is held in such a debt service fund, it must be funded with a portion of the bond proceeds, a transfer from the general fund or another fund, or some other source of revenue.

An exception is if the bonded indebtedness qualifies as a “tax credit bond” or other bond that bears interest that is includable in gross income under the Internal Revenue Code. In that case, the debt service fund may include a reserve that is dedicated to pay the bonded indebtedness and this reserve may be funded by a property tax levy that is excluded from the Measure 5 limits (ORS 294.381 as amended by Or. Law 2009, Chapter 538).

Interfund loan repayment

During a fiscal year the governing body may loan money from one fund to another.

Operating loans must be repaid no later than the fiscal year following the year in which they were made. If the loan is an operating loan and it is not repaid in the fiscal year in which it was made, the repayment must be budgeted as an expenditure in the upcoming fiscal year. An operating loan is any interfund loan, or portion thereof, that is not a capital loan, and that is made for the purpose of paying operating expenses.

A capital loan is any interfund loan, or portion thereof, made for the purpose of financing the design, acquisition, construction, installation, or improvement of real or personal property and not for the purpose of paying operating expenses. If a loan is a capital loan, it must be repaid in full over a term not to exceed 10 years. The resolution or ordinance that authorizes the loan must state a schedule for repayment and a rate of interest (ORS 294.460). The interest rate can be any rate that the governing body determines, including zero.

If an interfund loan is repaid in a subsequent year, in the year the loan is repaid, budget the repayment as a resource in the fund that made the loan. In the fund that received the loan, budget the repayment as a debt service requirement.

Advance refunding bonds

Local governments may sell new bonds to retire an older bond issue before the right to call or otherwise retire the old bond issue arises (ORS 287A.360). This is known as current or advance refunding.

The proceeds of the advance refunding bond sale are sometimes used to buy low-risk government securities to place in escrow to secure the old bonds. If a tax could be levied to pay the old bonds, a tax may be levied to pay the principal and interest on the advance refunding bonds (ORS 287A.380). The public body is prohibited from levying a tax to pay on the old bonds after the amount owed on the old bonds is secured by the advance refunding bond proceeds.

Debt service on the new bonds must be budgeted, because it will be paid by a tax levy or from the advance refunding bond proceeds and interest. The advance refund bond proceeds may also be used to pay administrative costs, expenses, or fees in connection with the advance refunding transaction (ORS 287A.375). Proceeds from a debt service tax levy may not be used to pay those expenses (ORS 294.381).

Revenues irrevocably placed in escrow for the purpose of defeasing and paying the bonds, or revenues received as a result of prepayments or other unforeseen circumstances used to redeem bonds or other obligations are not required to be budgeted [ORS 294.326(6)].

When voter approval to issue bonds is received during a fiscal year and the bond proceeds will be expended during that same fiscal year, the proceeds do not have to be budgeted. It is recommended that a resolution be prepared establishing a fund for the bond proceeds and appropriating the proceeds. If the bonds are approved in one fiscal year and any of the proceeds are to be spent in the following fiscal year, the proceeds must be budgeted in the regular budget for the following year [ORS 294.326(5)].

Pass-through payments

A local government may impose taxes, fees, or charges that are then paid, on a pass-through basis, to another local government through under an intergovernmental agreement or statute. The local government that imposes the taxes, fees, or charges budgets them as resources. The pass-through payment to the other local government is budgeted as an expenditure and appropriated as a special payment. If the actual amount collected from the taxes, fees, or charges exceeds the estimated amounts in the budget, the local government that imposed the taxes, fees, or charges may appropriate the additional revenue by enacting a resolution or ordinance [ORS 294.450(6)].

Internal services expenditures

The estimated cost to one part of an organization of services provided by another part may be budgeted and appropriated in an internal service fund (ORS 294.470). Such expenditures are a requirement for the unit receiving the service. The estimated amount is a resource for the unit providing the service. If, during a fiscal year, the estimate proves insufficient, the appropriation may be increased by resolution or ordinance.

Budget Detail Sheets

Expenditure and resource detail sheets show in line item detail the planned requirements and resources a local government needs to carry out its purpose. The Department of Revenue has the authority to make rules and prescribe budget forms (ORS 294.495). The department has developed budget and publication forms that meet all of the requirements of the law.

Many budget officers prefer to create their own budget detail sheets in a spreadsheet or accounting program. If you do this, you must follow the format the department prescribes.

First and second preceding years' actual data

The detail sheets must show the actual expenditures and resources for the two preceding fiscal years for each fund (ORS 294.376). This requirement provides a two-year record of what actually happened. It allows a comparison of the earlier actual resources and expenditures with those estimated and budgeted for both the current year and the upcoming fiscal year.

The historical data are figures confirmed by the district's audit or reported in the unaudited financial statements submitted to the **Audits Division of the Secretary of State**. Display the actual revenues and expenditures in the budget at the same level of detail used for the estimates of the current year and coming fiscal year.

A fund dissolved by the governing body must remain a part of the budget's historical record for the following two years. If two funds are created from one previously existing fund, separate the historical data so previous resources and expenditures for each new fund can be identified. The dissolution or combination of funds should be explained in the budget message.

If a budget line item description is changed, an old item is split into two or more new items, or two or more old line items are combined, explain the change in a footnote or the budget message so a historical comparison can be made.

Current year budgeted resources and expenditures

The detail sheets include a column for the estimated resources and expenditures adopted for the current fiscal year. These amounts come from the current adopted budget document, as updated by any changes authorized by governing body resolutions or ordinances and supplemental budgets adopted during the current year.

The historic and current year data provide a basis for comparison to the resources and expenditures for the upcoming fiscal year.

Proposed resources and expenditures for upcoming fiscal year

For each fund, show the proposed resources and expenditures for the upcoming fiscal year. When all funds balance (the fund resources are equal to the fund requirements), the budget officer can submit the budget to the budget committee.

As the budget document moves through the budgeting process, it may be changed. After the budget committee approves the budget for the coming year, update the budget detail sheets to show the amounts approved.

Finally, after the budget is adopted, update the detail sheets once more to show the amounts adopted.

Even if the budget committee or governing body make no changes to the budget, fill out the "Approved" and "Adopted" columns to demonstrate that those steps of the budget process were taken.

The adopted budget eventually includes:

- The actual line item amounts experienced in the first and second preceding years.
- The adopted budget line item amounts for the current year (as amended to date) [ORS 294.376 and 294.435(2)].
- The detailed expenditures and resources estimated for each fund, organizational unit and program, by line item in the proposed budget, the approved budget and the adopted budget for the upcoming year.

Detail Sheets for Schools

The forms described below are for use by non-school local governments. School districts should refer to the *"Program Budgeting and Accounting Manual"*, published by the Oregon Department of Education, for their budget detail format. Community colleges should refer to *"Oregon Community College Accounting Manual"*, published by the Oregon Department of Community Colleges and Workforce Development.

Detail Sheets for Cities, Counties and Special Districts

You can request paper copies of the forms below by contacting the Finance and Taxation Unit of the Department of Revenue at 503-945-8293, or find them on the internet at <http://www.oregon.gov/DOR/PTD/LocalB.shtml>. Most of the forms on the web site can be filled out online and printed, or downloaded in spreadsheet format and saved on your personal computer. Some local governments use other software, and that is fine, as long as the information is presented in the required format.

Form LB-10 is used primarily for special revenue funds. Special revenue includes money from specific-purpose local option taxes, certain grants and other dedicated sources. Resources and expenditures in special revenue funds are generally limited to relatively few line items. Often, all resource and requirement items can be listed and the requirements subtotaled by expenditure category on one page.

Form LB-11 is used to show the resources and requirements of a reserve fund. All or part of the amount in a reserve fund may be budgeted as "reserved for future expenditure." Alternatively, all or part of the amount in a reserve fund may be budgeted for any expenditure items that fall within the purpose for which the reserve fund was created. Expenditure items should be subtotaled by expenditure category and appropriated. The amount reserved for future expenditure should not be appropriated.

Form LB-20 is used to list all estimated budget resources, including the taxes necessary to balance the budget, for the general fund or for any other fund with many resources and requirements. If an LB-20 is used for a fund's resources, a Form LB-30 and/or Form LB-31 is used to list the fund's requirements.

Form LB-30 is designed to show a fund's requirements, with summaries by the major object classifications of personal services, materials and services and capital outlay. Estimates of transfers, contingency and unappropriated ending fund balance are shown separately at the bottom of the form. Whether you use this form or a Form LB-31 depends on the size and complexity of your budget. Unless you modify the form in a spreadsheet, the LB-30 is best used for funds that do not have programs or organizational units. However it can be used unmodified for a fund that has programs or units with relatively few line items and for programs or units that do not have special payments, debt service, or operating expenses that cannot be allocated to a particular program or organizational unit.

Form LB-31 is used for detailed expenditure estimates when a fund, or a program or organizational unit within a fund, has more line items than will fit in the lines provided under each expenditure category on the Form LB-30. Group expenditure line items by object classification and insert a subtotal for each classification, as on the LB-30. The LB-31 may also be used if a fund has special payments, debt service, or capital outlay or operating expenses that cannot be allocated to a particular program or organizational unit (The LB-30 has no place for these types of requirements unless you modify the form in a spreadsheet program). An estimate of unappropriated ending fund balance is shown separately at the bottom of the form.

If you use a spreadsheet or other automated program for your detail requirement listing, group expenditure line items by object classification for each program or organizational unit in a fund, and insert subtotals for each of the object classifications as on the LB-30. Show special payments, debt service, transfers, capital outlay or operating expenses that cannot be allocated to a particular program or organizational unit, operating contingency and unappropriated ending fund balance at the end of each fund's list of requirements.

The objective is to provide easily understood expenditure estimates for each program or organizational unit in a fund, with subtotals by object classification.

Form LB-35 is designed only for bonded debt principal and interest payments. This form can be used for general obligation bond or revenue bond funds. Be sure to check the box on the top of the form to indicate the type of bonds. If a local government has several outstanding general obligation bonds, they may be combined in one debt service fund. Budget revenue bonds in a separate fund from general obligation bonds. ORS 223.285 requires that Bancroft bonds (a type of revenue bond) be budgeted in a fund entitled "*Bancroft Bond Redemption Fund.*" Do not combine general obligation bonds with revenue bonds on the same LB-35.

Each principal and interest payment must be listed individually as a line item, showing the issue date of the bonds, the exact payment due date and the corresponding payment amount. This fully discloses all of the expenditures. Those who use spreadsheets must also show each payment, with its due date, for each issue of bonds.

The "Unappropriated Balance for Following Year" cannot exceed the amount necessary for principal and interest payments that fall between July 1 and when property tax revenues are received in November or December. The amount needed should take into consideration any other resources in the fund.

Interfund loans that were made from other sources of revenue to the debt service fund when tax collections for the debt service levy fall short may be repaid from a debt service fund (ORS 294.381). Such a repayment becomes a requirement of the debt service fund. The repayments should be shown on the LB-35 as "*Loan Repayment to ____ Fund.*"

If the bonded indebtedness is a tax credit bond or other bond that bears interest that is includable in gross income under the Internal Revenue Code, the debt service fund may include the deposits that the municipal corporation has agreed to make in a sinking fund that is dedicated to pay the bonds. Such a reserve becomes a requirement of the debt service fund. The reserve amount should be shown on the LB-35 as "*Tax Credit Bond Reserve.*"

Form LB-36 is a supplement to Form LB-35. If there is not enough room on Form LB-35 to disclose all bond interest and principal payments, use Form LB-36 to show the detailed information. Show the bond issue date, due date, and the exact amount of principal or interest for each payment. Summarize the totals of principal payments, interest payments and unappropriated fund balance on Form LB-35.

Form LB-40 is prescribed for supplemental information only, and not for budget resource or expenditure requirements. It shows total salaries for specific positions that are allocated on a cost basis to more than one fund or organizational unit. For example, portions of a city manager's salary may be allocated to the general fund and the utility fund.

Budget Detail Sheets—Examples

The following examples of budget detail sheets do not represent a complete balanced budget. Funds are displayed to provide a representative example of the most commonly used forms. (See pages 30-32)

Chapter 6—Property Taxes in Oregon

Ad valorem property taxes (taxes calculated as a percentage of a property's value) are available with voter approval to all local governments whose principal act gives them the power to impose such taxes. Each local government should refer to their enabling statutes to determine the type of taxing authority its voters may be asked to authorize. All ad valorem taxing authority must be specifically authorized by a vote of the electorate.

Four types of property tax are available, each fulfilling a specific purpose or function.

- Permanent rate limit taxes.
- Local option taxes.
- Bonded debt taxes.
- Taxes for other qualified obligations.

Definitions of these taxes are found in Oregon Administrative Rule (OAR) 150-294.311. Each type is discussed in more detail later in this chapter.

Both the Oregon Constitution and the Oregon Revised Statutes impose limits on the amount and type of tax a local government may impose. The assessor is prohibited from extending on the tax roll any tax that exceeds these constitutional or statutory limits (ORS 310.070).

Constitutional limitations

The constitution imposes a permanent rate limitation that restricts the operating tax rate that a local government can impose. If a local government has no permanent rate limit or if the permanent rate does not provide enough revenue to meet estimated expenditures, the local government may ask voters to approve a local option tax.

Permanent rate taxes and local option taxes are also subject to the limitation of Article XI Section 11b (Measure 5, 1990). This limitation restricts the amount of tax that can be imposed on a property in any year.

Local governments can impose taxes sufficient to pay the principal and interest on voter approved general obligation bonds or limited tax bonds without annual voter approval of the tax levy. Approval for this "debt service" levy is considered to have been gained when voters originally approved the bonds. Generally, the debt service levy in any year is limited to the amount needed to pay the debt service coming due in that year. Such bond levies are "excluded from limitation" by Measure 5.

Statutory limitations

Certain types of local governments are also subject to statutory tax limitations found in the Oregon Revised Statutes. The maximum amount of tax that these local governments can impose for general operations is the lesser of the amount their permanent rate will raise, or the tax allowed under the statutory limit. Statutory limits are usually a percentage of the local government's real market value. For a listing of local governments with statutory tax limits, see "Appendix C."

Important: Statutory limits do not authorize a local government to impose a tax. Taxing authority comes only from voter approval. Local governments with permanent rates received voter approval at some point in the past. New local governments must get voter approval of a permanent tax rate limitation before they can impose ad valorem property taxes. Local option taxes and bonds must also receive approval from voters. The fact that a district's primary statute imposes a statutory limitation does not by itself convey the authority to impose a tax.

Permanent Rate Limit Taxes

Section 11, Article XI of the Oregon Constitution (Measure 50, 1997) imposes a permanent rate limitation on the rate of ad valorem property taxes a local government may impose. A permanent rate limit is expressed in dollars and cents per thousand dollars of assessed value. This rate may be levied every year against the assessed value of the taxable property in the district to raise taxes for general operating purposes. Local governments can choose to impose less than their full limitation. If a local government reduces its permanent rate levy

one year, future use of its full authority is not affected. If the full authority is needed in subsequent years, the full rate or amount of tax that is allowed under the permanent rate limit can be imposed.

Permanent rate limits were computed by the Department of Revenue for taxing districts levying taxes in 1997-98. These rates are based on the taxing authority that each district had at the time Measure 50 was approved, with reductions required by that ballot measure. New limitations are calculated by formula for local governments that merge, divide, or consolidate. New local governments formed in or after 1998 can ask their voters to approve a permanent rate limitation at the time the district is formed. Once a permanent rate limit is established, no action of the local government or its voters can increase or decrease its limitation.

The Effect on the Permanent Rate Limit When Local Governments Change Their Boundaries

Consolidation or merger

If two or more local governments with the same principal act consolidate or merge, the resulting taxing district gets a permanent rate limit that is calculated according to a formula found in Section 11 (3)(d), Article XI. A merger occurs when two or more districts formed under the same statutory authority and providing the same services agree to combine their territories and operate as one district. One of the districts is the “surviving” district. A consolidation occurs when two or more districts agree to form a new district providing the same services as the old districts.

The limitation in Section 11 (3)(d), Article XI is the tax rate such that the amount of tax raised by the new district does not exceed the amount that would have been raised by the separate districts using the permanent rate authorities they had before the boundary change.

To estimate the permanent rate of the newly merged or consolidated district:

- Step 1** For each district, multiply the old permanent rate of that district by its estimated taxable assessed value to determine the amount that could have been raised. Use the estimated taxable assessed value for the first tax year following the merger or consolidation.
- Step 2** Total the amounts calculated in Step 1 to arrive at the total taxes that could have been raised if the merger or consolidation had not taken place.
- Step 3** Total the estimated taxable assessed values used for each district in Step 1 to arrive at the total assessed value of the new district. Again, use the estimated taxable assessed value for the first tax year following the merger or consolidation.
- Step 4** Divide the total estimated taxes that could have been raised as calculated in Step 2 by the total estimated assessed value of the new district as calculated in Step 3. The result is the estimated new permanent rate of the new district. This is the rate the new district uses during budget preparation and when certifying its tax to the assessor for the first year following the consolidation or merger.
- Step 5** The assessor will repeat the above calculation when the actual assessed value is known. The assessor notifies the district of this actual permanent rate limit and it becomes the district’s limitation thereafter.

The estimated rate determined in Steps 1-4 above will be extended over the value of the new district as long as it is equal to or less than the permanent rate calculated by the assessor. If the rate calculated by the assessor using the actual assessed value is lower than the estimated rate, the lower rate will be used.

A ballot measure to merge or consolidate does not require a double majority vote under Section 11(8) or 11K Article XI, even though it could raise the permanent rate limit for some of the properties in the new district.

Division

When a local government divides, the new entities resulting from the division are limited to a rate that is the same as the rate of the local government before it divided. In addition, the rates of the new districts cannot raise more tax revenue than would have been raised by the local government in the year of division if it had not divided.

Annexation

If territory is annexed by a local government, the new territory becomes subject to the same permanent rate limit and all other property taxes that have been authorized by the voters of the district doing the annexing. If the territory being annexed was subject to a bond levy before the annexation, that obligation may continue, depending on whether the local government doing the annexing makes arrangements with the district that passed the bonds to pay off the obligation of those properties being annexed.

For more information on boundary changes, see the Department of Revenue publication “*Boundary Change Information*,” which is available at http://www.oregon.gov/DOR/PTD/ptd_pubs.shtml.

Local Option Taxes

Local option taxes are a second type of taxing authority in addition to, or instead of, permanent rate authority. Voters can be asked to approve local option taxes for a limited term.⁵ Local option taxes used for general operations can be approved for up to five years. If the local option taxes are to be used for capital projects, they can be approved for up to 10 years or the useful life of the project, whichever is less.

“Capital project” is defined in ORS 280.060. It means:

- The acquisition of land upon which to construct an improvement;
- The acquisition of buildings;
- The acquisition or construction of improvements;
- Additions to a building that increase its square footage;
- Construction of a building;
- The acquisition and installation of machinery and equipment which will become an integral part of a building; or
- The purchase of furnishings, equipment or other tangible property with an expected useful life of more than one year.

Determining the useful life of a capital project is not complicated when only one type of capital project is to be financed by the local option tax. For example, if the tax is for the purchase of a fire truck with a useful life of nine years, the local option tax can be imposed for no more than nine years.

However, if the proposed local option tax is to pay for several capital assets with different useful lives, then the following formula is used to determine the maximum number of years the local option tax can be imposed:

Average useful Life x Cost = Weight

Total weight ÷ Total cost = Maximum years allowed for tax

Example:

Item	Cost	x	Useful Life	=	Weight
5 computers	\$10,000		2 years		20,000
2 patrol cars	<u>80,000</u>		7 years		<u>560,000</u>
Totals	\$90,000				580,000

$$580,000 \div 90,000 = 6.44$$

⁵ Education Service Districts are the only type of local government not allowed to ask their voters for local option authority.

6.44 is rounded **down** to 6 years, which is the maximum number of years for which this local option tax can be proposed. (The result is always rounded down; never up.)

Local option taxes for capital projects with a term of more than 5 years must be submitted to voters separately from local option taxes with a term of 5 years or less [ORS 280.060(4)].

If a school district imposes a local option tax and the resulting “local revenue” exceeds the amount determined by the formula in ORS 327.013, the district’s State School Fund Grant will be reduced.

The authorized period for a local option tax is in consecutive years. If a local government does not utilize its full local option authority or levies no tax for one of those years, the period is not extended. If a local government reduces its local option levy one year, the unused portion of the authority cannot be “carried over” and used in subsequent years. However, future use of the full annual authority approved by the voters is not affected; if the full authority is needed in subsequent years of the local option period, the full annual rate or amount of tax that was authorized by the voters can be imposed.

Article XI, Section 11b (Measure 5) imposes another limitation on property taxes. The taxes on a property that are used for education purposes cannot be more than \$5 per \$1,000 of the property’s real market value. The taxes imposed for all other government purposes cannot be more than \$10 per \$1,000 of RMV. If it is necessary to reduce the taxes on a property to be within these constitutional limits, local option taxes are reduced first, before the taxes imposed under local governments’ permanent rate authorities. If a property is subject to more than one local option tax, the local option amounts are reduced proportionately. If reducing the local option taxes to zero does not reach the limit, then the permanent rate tax amounts of all of the taxing districts to which that property is subject are reduced proportionately.

General Obligation Bond Taxes

Voter approval of a general obligation bond for capital projects or a Bancroft bond issue carries with it the authority to levy taxes to pay the bond principal and interest. However, such a debt service levy cannot exceed the amount necessary to:

1. Pay the principal and interest due in a single fiscal year, plus
2. Reserve the unappropriated ending fund balance necessary to meet principal and interest payments coming due between July 1 and receipt of sufficient tax revenue in the following year, plus
3. Repay any loans made from other funds that were necessary when collections from the debt service levy were insufficient to pay bond principal and interest in the current year, plus
4. May include deposits to a sinking fund that is dedicated to pay a tax credit bond or other bond that bears interest that is includable in gross income under the Internal Revenue Code (ORS 294.381).

These taxes are “excluded from limitation” by Measure 5. No other expenditures may be made from a debt service fund that imposes taxes that are excluded from Measure 5 limitation. Additionally, a local government can impose only the taxes necessary to balance the debt service fund after other fund resources are taken into consideration.

Other Qualified Obligations Taxes

A few local governments are able to impose taxes to pay for other qualified obligations. Some of this debt is referred to as “**gap bonds**.” To qualify, these obligations had to have been in existence before December 5, 1996, and meet certain requirements specified in statute. No new gap bonds can be created. The portion of the district’s taxing authority being used to repay these qualified obligations was not reduced when Measure 50 was implemented in 1997-98. The amount of tax that can be imposed in any year to repay gap bonds is limited to the amount of principal and interest due on the debt.

When the debt is satisfied, the taxing authority for the debt will be incorporated into the local government’s permanent rate. Local governments should contact the Department of Revenue when their gap bonds are satisfied so their permanent rate limit can be adjusted.

Taxes to finance the City of Portland's Police and Fire pension and disability plan are also considered qualified obligations.

Local governments with questions about their bonding authority and limitations should refer to the Oregon Revised Statute under which they are organized.

Urban Renewal Division of Tax

In general, urban renewal agencies do not levy property taxes. Rather, they receive a portion of the taxes levied by other taxing districts. When an urban renewal agency adopts an urban renewal plan and selects **tax increment financing** (TIF), the taxable value of the property within the urban renewal plan area is identified. This value is referred to as the "frozen" value. The growth in value above the frozen base is called "increment" or "excess" value. The amount of revenue available through TIF is the amount determined by multiplying the "excess" value by the combined billing tax rates of taxing districts which overlap the plan area. This is known as "**division of tax**" or "**tax increment**" revenue.

The specific formula used to determine each plan's division of tax amount depends on several factors, including the type of plan, the date on which the plan was adopted, and the dates on which the other districts' levy authority was approved by voters.

As a result of Measure 50, the 1997 legislature created a "**special levy**" in addition to TIF for certain plans in existence at that time. For those plans, an additional amount may be generated through a special levy up to the plan's **maximum authority** (ORS 457.435).

For more detail on urban renewal financing, contact the Finance and Taxation team at 503-945-8293.

Chapter 7—Estimating Property Taxes Available as a Budget Resource

Operating Taxes - Permanent Rate

Most local governments' operating tax revenue comes, at least in part, from property taxes imposed within their permanent rate limitation. In general, the simplest way to estimate the amount of tax revenue that will be generated by your permanent rate is to multiply your district's permanent rate by the estimated assessed value of the property within the boundaries of your local government for the upcoming year, and then adjust for several losses that are explained below. For a listing of permanent rates by district, see "Appendix D."

Each year after property tax statements are mailed out, the county assessor provides each taxing district with a report called *Summary of Assessments and Levies*. This report shows the actual amount of assessed value in your district that year. From this information, you can estimate the amount of assessed value in the coming year. The assessed value of most residential property will grow at approximately 3 percent each year. In areas with substantial new construction, the annual increase in assessed value could be higher than 3 percent. In areas where the real estate market is stable or declining, or where there is a large percentage of existing commercial and industrial property, the assessed value may not increase three percent.

If your local government has annexed new territory, include the estimated assessed value of that territory when estimating tax revenue. Your county assessor can help you estimate that value.

If territory of your local government overlaps an urban renewal plan area, use the "frozen value" of that territory when estimating your tax revenue. Your county assessor can tell you the frozen value.

The amount of tax that could be raised by the permanent rate is not the amount of tax that the local government will actually receive. There are three reasons for this. First, not all taxpayers pay their taxes in the year billed. Second, discounts are given for prompt property tax payments. Third, the Oregon Constitution (Measure 5) sets limits on the amount of property tax that can be collected from an individual property. To estimate the amount of tax revenue that will actually be available for budgeting purposes then, you must consider these losses and estimate the amount that will actually be received. More details on computing this amount are given later in this chapter.

The estimate of property taxes not to be received is shown only in the financial summary that is published together with the notice of the budget hearing. Do not show this estimate in the budget as a negative resource [OAR 150-294.361(1)-(B)].

Imposing less than full taxing authority

A local government may need less tax revenue for operating purposes than its permanent rate is estimated to raise. In that case, the local government may choose to certify to the assessor an amount less than its full taxing authority. There is no penalty for imposing less than your full permanent rate; you can impose your full rate in subsequent years.

A local government may impose its permanent rate tax as a dollar amount instead of a tax rate. The dollar amount of taxes imposed under this method can never be more than the amount requested, even though the full permanent rate could have raised more tax revenue. When an amount is imposed, the assessor computes a tax rate based on the dollar amount requested. The computed rate will be used to compute taxes for that year unless it is more than the local government's permanent rate limit. If the computed rate is higher, the lesser permanent rate will be used to compute taxes.

If imposing a dollar amount less than the amount your full permanent rate would raise, calculate the amount of tax to certify to the assessor by adding together the amount of revenue needed to balance your budget, the amount of tax you estimate will not be collected because of discounts and failure to pay, and the amount you estimate will not be received because of the Measure 5 constitutional limit. This step is necessary because the amount of the tax that is certified to the assessor must be more than the amount needed for budgeting purposes, to offset the losses.

The assessor computes the rate as follows. Divide the tax amount needed for operating purposes, including the expected losses, by the estimated assessed value of the property in the district for the coming year. This will

result in an **operating rate** which is carried out to the seventh decimal place and truncated. Multiply the result by 1,000. This is the rate the assessor will use in place of your permanent rate.

Example:

Operating taxes	\$100,000
Estimated assessed value	\$17,000,000 = 0.0058823 x 1,000 = Operating Rate \$5.8823 per \$1000

The actual assessed value for the upcoming year may turn out to be greater than the assessed value estimated. If this is the case, and a rate was certified, more tax revenue will be generated than the local government needs to balance its budget. This additional revenue can be used to make up for other revenue shortfalls, held to become cash carry-forward, or it may be appropriated through a supplemental budget and spent. However if an amount was certified, only the amount requested, minus losses, will be received.

Measure 5 constitutional limits

Article XI, Section 11b, of the Oregon Constitution (Measure 5, 1990) limits the amount of taxes that can be collected from an individual property. The constitution breaks property taxes down into categories based on the kind of services that the taxes are supporting—education services and general government services. It also excludes certain property taxes from limitation. The unlimited category is usually for voter-approved general obligation bond debt service levies. The Department of Revenue refers to these tax categories as **education, general government, and excluded from limitation.**

The limits are \$5 per \$1,000 of real market value for education, and \$10 per \$1,000 of real market value for general government. A property may not be billed for more tax than these limits. If the tax that is calculated by multiplying assessed value by the combined billing rate of all of the local governments to which a property is subject is more than these limits in either category, the tax is reduced or “compressed” to the limit. The levy of each district in the category being compressed is reduced proportionately with the other levies in that category.

To facilitate this limitation calculation, each local government must certify the categories in which their property taxes should be placed. This is done by a resolution or ordinance at the same time the budget is adopted (ORS 294.435). Governing bodies must also certify the tax categories to the county assessor when they submit their tax certification documents (ORS 310.060).

Figuring loss due to constitutional limits

The simplest method to use for estimating the amount of property taxes that will be lost because of the Measure 5 limits is to use the prior year’s loss as a guide. If you wish, you can make an adjustment for anticipated tax revenue growth and value increases. How do you know the prior year’s loss? After calculating the property taxes each year, the county assessor prepares the “*Summary of Assessments and Levies (SAL)*” report. Table 4a of the SAL report shows how much tax was actually billed for each local government and the amount of compression loss or “loss due to constitutional limit.” If your county does not mail you a copy of the Table 4a for your district, you may ask the assessor’s office for the information.

If the taxing situation for your local government remains the same, the percent of loss due to the constitutional limits should remain stable. However, if the taxing situation is changing, for example because your district or other local governments are losing or gaining taxing authority because of new or expiring local option levies, the percentage of loss could change from year to year. Also, since a loss is more likely if a property’s real market value is closer to its assessed value, more loss could be experienced if market values decline.

Record your estimate of the amount lost to constitutional limits, because it is also used when publishing the financial summary of the budget and notice of budget hearing.

Discounts and other uncollected amounts

Some taxpayers fail to pay their property taxes on time. Others pay on time and receive a three percent discount. It happens each year in all of Oregon’s 36 counties. As a result, local governments that impose property taxes must estimate the amounts lost to “discounts and uncollectables” when they estimate the amount of taxes to be received. The amount of this loss is also used when publishing the financial summary of the budget and notice of budget hearing.

Figuring loss due to discounts and uncollectables

The amount of this loss varies from year to year and from county to county. There is no formula to determine the exact amount that will not be collected each year. One way to estimate the amount of tax that will be lost because of the discounts and failure-to-pay is by using the percentage of taxes collected in the past. The county tax collector may be able to provide tax collection percentages. There is also a table of percent collected by county in the *“Local Budget Law and Notice of Property Tax Forms and Instructions”* booklets at <http://www.oregon.gov/DOR/PTD/LocalB.shtml>. This table shows the collection percentages for each county for the past 5 years. You can use this information to make a “good faith” estimate of your loss due to discounts and uncollectables for the upcoming year.

If you have more than one fund receiving tax revenue, all of your taxing funds should use the same percentage for the loss due to discounts and uncollectables.

Estimating the amount of tax available as a budget resource

To estimate the amount of tax revenue you will have available as a budget resource, start with the amount of taxes estimated to be raised by the tax rate. Subtract any loss you estimate due to constitutional limits. Then multiply the remainder by the tax collection percentage for your county. This gives the amount of taxes estimated to be received. This is the amount available as a budget resource.

The amount not to be received because of discounts and uncollectables is necessary when you publish the notice of budget hearing and financial summary of your budget. To estimate this loss, subtract the amount estimated to be received from the amount the rate would raise.

Example:

1. Permanent Rate Limit		\$4.2379 / \$1000
2. Estimated Assessed Value		\$26,902,950
3. Tax rate (per dollar)	x	.0042379
4. Estimated amount rate would raise	=	\$114,012
5. Estimated Measure 5 loss (from SAL 4a)	-	\$7,981
6. Tax to be billed	=	\$106,031
7. County Percent Collected	x	.96
8. Taxes Est. to be Received	=	\$101,790*
9. Loss due to discount & uncollectables (line 6 minus 8)	=	\$4,241

*This is the amount available as a budget resource

Local Option Taxes

Voter-approved local option taxes are another budget resource. General purpose local options for operations are usually included as a resource in the general fund. Special purpose local option taxes for capital projects require a separate special revenue fund (ORS 280.040), and are budgeted as resources in that fund. Local option taxes are imposed as a dollar amount if the ballot measure in which they were approved by the voters asked for a dollar amount. Local options are imposed as a rate per \$1,000 of assessed value if the question in the ballot measure asked for a rate per \$1,000.

Use the same methodology to estimate the amount of a local option tax that will be available as a budget resource as you would use for your operating taxes under your permanent rate limitation. In other words, reduce the amount your local option rate would raise (or the dollar amount the voters approved) by the loss due to constitutional limitation and by the loss due to discounts and uncollectables. The result is the amount to use as a budget resource.

General Obligation Bond Levies

The amount to budget from a tax levy to pay debt service on general obligation bonds is estimated differently. For one thing, a levy for qualifying bonded indebtedness is not subject to the Measure 5 constitutional limitations, so there will be no loss from that. For another, you are allowed to increase the amount you certify to the assessor for a debt service levy to make up for the losses due to discounts and uncollectables (ORS 294.381).

To calculate the amount to use as a budget resource in your general obligation bond debt service fund, the first step is to determine if the fund will have any other resources besides current year property taxes. Such resources could include amounts from prior year taxes, interest earnings, and a beginning cash balance.

The next step is to determine your debt service requirements. Add up the principal and interest payments coming due next year on the bonds. If there are any payments due between the start of the fiscal year on July 1 and when property taxes are collected and distributed in November and December, you may also include an unappropriated ending fund balance to cover those payments in the following year. If you loaned money to the debt service fund in the past from other revenues because collections from your debt service levy were insufficient to cover the debt service payments, you may also include an amount for repayment of the loan. Total these requirements.

Subtract the total of resources other than property taxes from the total requirements. The result is the amount of current year taxes to use as a budget resource in the debt service fund.

Important: a debt service fund that imposes taxes excluded from Measure 5 limitation cannot include any expenditures other than the ones just described. In particular, you may not pay attorneys' fees, bank charges or other expenses related to the preparation, authorization, issuance and sale of the bonds from a fund that imposes a tax levy that is excluded from limitation.

When you certify your taxes to the assessor, debt service levies are also calculated differently than your operating and local option levies. When you certify your debt service levy, you should add the amount that will be lost due to discounts and uncollectables to the amount you estimated that you need from taxes for debt service. To calculate the amount of a debt service levy, subtract other fund resources from the amount you need for debt service, and then divide the result by the county collection percentage to get the amount to certify to the assessor. This is also the amount for your budget committee to approve.

Example:

1. Principal payment	\$57,000
2. Interest payment total	52,000
3. Unappropriated ending fund balance	27,000
4. Amount to repay interfund loans	0
5. Total debt service	136,000
6. Other fund resources	(42,500)
7. Estimated amount needed from taxes	93,500
8. Divide by county percent collected	÷ _____ .96
Amount of tax to certify	\$97,396

Tax ballot measures and the estimate of tax not to be received

If you write a ballot question to ask your voters for a local option tax, remember to consider the amount that will not be received when determining the amount of tax or rate that you request. You also need to consider these losses if you include an estimated tax rate in a bond measure, or if you estimate the permanent rate limit needed to provide sufficient operating revenue for a new local government. You must ask for more than the exact amount you need. Otherwise, you will receive insufficient revenue for your purposes. You may use the same method of estimating taxes not to be received as discussed above.

Chapter 8—The Budget Committee and Approving the Budget

Budget committee members

The budget committee is a local government’s fiscal planning advisory committee. The governing body of each local government must establish a budget committee (ORS 294.336). The budget committee is composed of the governing body and an equal number of electors appointed by the governing body.⁶ An elector is a qualified voter who, for example, has the right to vote for a ballot measure submitted by the local government.

If, after a good faith attempt, the governing body cannot find a sufficient number of registered voters who are willing to serve, those who are willing and the governing body become the budget committee. If no willing electors can be found, the governing body is the budget committee [ORS 294.336(2)].

The appointive members of the budget committee cannot be officers, agents or employees of the local government [ORS 294.336(4)]. An agent, generally, is someone who is authorized to act for the local government, or who can make commitments or sign contracts in the name of the local government. This is sometimes a grey area if an appointee candidate already serves on other advisory committees or commissions of a local government. If you are in doubt about whether a particular person is an agent, consult your legal counsel.

Spouses of officers, agents or employees of the local government may serve on the budget committee if they are qualified electors and not themselves officers, agents, or employees.

Appointive members of the budget committee are appointed for three-year terms. The terms must be staggered so that about one-third of the terms end each year [ORS 294.336(5)]. When a new local government is appointing its first budget committee, the terms may be for one year, two years and three years for each third of the appointive members. After the first two years, the local government will then be able to appoint all new members to three-year terms.

If a local government prepares a biennial budget, the appointive members have four-year terms, with about one-fourth of the terms ending each year.

Appointed budget committee members may be reappointed for additional terms, at the discretion of the governing body.

If an appointive member of the budget committee is unable to complete the term, or resigns before the term is over, the governing body must appoint another elector to serve out the unexpired portion of the term [ORS 294.336(6)].

There is no provision in budget law for “stand-by” or “alternate” appointed members.

All members of the budget committee have equal authority. Each member’s vote counts the same. Any member can be elected by the committee as its chair.

No member of the budget committee (including governing body members) may receive any compensation for their services as a member of the budget committee [ORS 294.336(3)].

Budget committee members should develop a general understanding of the budget process, the departments or programs included in the budget document, and the legal constraints imposed on the local government’s tax levy after budget committee approval. “*Local Budgeting in Oregon*” (150-504-400) is recommended as a good resource for budget committee members for information on the basics of taxation and budget law. This publication can be found at <http://www.oregon.gov/DOR/PTD/LocalB.shtml>. You can also request copies of the booklet by calling the Finance and Taxation analysts at 503-945-8293.

⁶There is an exception to this in Multnomah County, where there is a tax supervising and conservation commission. There, the governing body serves as the budget committee for any local government with a population exceeding 200,000 (ORS294.341). Another exception is the city of Portland, where the city council performs the duties of the urban renewal agency and its budget committee (OR Law 2009, Chapter 88). Another exception is that the appointive members of the budget committee for an education service district are members of the component school district boards within the education service district or are designees of the school district boards (ORS334.240).

Duties of the budget committee

The budget committee meets publicly to review the budget document as proposed by the budget officer. The committee receives the proposed budget and the budget message and holds at least one meeting in which the public may ask questions about and comment on the budget. Notice of the first meeting held for these purposes must be published in a specific way (See “*Chapter 9 – Publication Requirements*”). The committee must eventually approve the budget and, if ad valorem property taxes are required, approve the amount of tax or the rate per \$1,000 of assessed value for each levy that will be certified to the assessor.

The budget committee may meet from time to time throughout the year at the governing body’s discretion for purposes such as training. All of these meetings are open to the public and notice of the meeting must be given in the same manner as notice for meetings of the governing body, or through one of the local budget law publication methods [ORS 294.406(2)]. Take care not to discuss specifics of the ensuing year’s budget at these informal meetings until the notice requirements for the first budget committee meeting have been satisfied.

Copies of the budget

The budget officer may make the proposed budget available to the budget committee at any time before the first budget committee meeting advertised in the notice. Alternatively, the budget officer may choose to make the budget available at the first budget committee meeting (ORS 294.401). Immediately following the release of the proposed budget to the budget committee, the budget officer must file a copy of the budget in the office of the governing body. This copy becomes a public record. The governing body must provide copies of this budget, or a means of quickly duplicating it, to any interested person. A local government may charge a fee for the copy [OAR 150-294.401(7)].

Budget committee meetings

The budget committee must have a quorum present to hold a meeting [OAR 150-294.336-(B)]. A quorum is a majority of the total membership of the committee. For example, if the budget committee has 10 members, six must be present to hold a meeting.

The budget committee elects a presiding officer from among the members at the first meeting [ORS 294.336(9)]. The budget committee also hears the budget message at its first meeting. One of the committee’s most important duties is to hear and consider any testimony presented by the public about the budget.

The budget committee reviews and, if a majority of the committee feels it is necessary, revises the proposed budget submitted by the budget officer. The committee generally studies the budget by comparing the two previous years’ actual data, the current budgeted data, and the figures proposed by the budget officer. The budget committee may reduce or increase the estimates of resources and requirements proposed by the budget officer. Among the most common items discussed are the questions of taxation (how much?) and allocating revenues and expenditures (where will the spending occur?). If the amount of tax revenue needed to balance the budget exceeds the local government’s existing taxing authority, the committee may decide that the additional amount needed should be requested from the voters in the form of a local option tax. If the committee decides to stay within its existing taxing authority, and other resources cannot be found, then the committee must reduce budgeted requirements to balance the budget. The committee must ultimately balance each fund and approve the budget. Committee members may not discuss or deliberate on the budget outside of a public meeting.

The committee may ask questions of the executive officer or other staff, and request additional information. The committee is entitled to receive any information it needs to make decisions about the budget (ORS 294.406).

Any budget committee action requires the affirmative vote of a majority of the total budget committee membership [OAR 150-294.336-(B)]. For example, if only six members of a 10-member committee are present, they have the quorum necessary to meet, but they all must vote in favor of any proposed action to achieve the required majority.

The budget committee may approve the budget at the first meeting. However, it could take several meetings to do so. When the budget officer prepares the budget calendar, several budget committee meetings can be scheduled. The public notice then can include the date, time and place of each of the meetings. If more meetings are needed than were scheduled, give notice of those meetings in the same manner as notice of meetings of the governing body or by one or more of the publication methods used for the initial budget committee meetings [ORS 294.406(2)].

Approving the taxes

The budget committee sets and approves the amount or rate of property taxes to be imposed. This is a very important responsibility of the budget committee. Less than the full amount of the available tax revenue may be needed to balance the budget. In that event, the budget committee may choose to impose less tax than the local government's full taxing authority. If that is the budget committee's decision, then the amount or rate of tax the committee approves can only be increased later by the governing body after additional process steps. That is, to increase the tax above the rate or amount approved by the budget committee, the governing body must republish the financial summary and hold a second budget hearing (ORS 294.435). To enforce this requirement, a statement certifying that the approved tax has not been increased unless the governing body held a second hearing is included on the tax certification form filed with the county assessor.

The committee's motion to approve taxes under the district's permanent rate authority may state either the tax rate per \$1,000 of assessed value or the amount of taxes that the budget committee wants to impose. It should state separately the tax rate or amount to be imposed under any voter-approved local option authority. It should also state separately the amount of tax for any qualifying bonded debt levy. These statements should be recorded in the minutes of the meeting.

Once the budget committee has approved the budget, it has completed all of the duties required of it by Local Budget Law. However some local governments have a policy of including the budget committee in other parts of the process, such as adopting a supplemental budget. These are local policy decisions that are up to the discretion of the governing body.

After the budget committee approves the budget, it is turned over to the governing body and the process enters into the adoption stage. The governing body has the final responsibility for allocating the resources of the budget to the programs and departments of the local government. This authority is part of the responsibility given the governing body to adopt the budget and to make the appropriations by which the budget is administered [ORS 294.435(1)]. Chapter 11 has more details on adopting the budget and making appropriations.

If any changes are necessary after the budget committee approves the budget, the governing body may make the revisions after the budget hearing and before adopting the budget. The governing body's authority to change the approved budget is limited. It cannot increase expenditures in a fund by more than \$5,000 or 10 percent, whichever is greater, unless it publishes a revised financial summary and hearing notice, and holds another budget hearing. For a biennial budget, this limit is \$10,000 or 10 percent, whichever is greater. Also, it cannot increase the tax amount approved by the budget committee unless it publishes a revised financial summary and hearing notice, and holds another budget hearing.

Chapter 9—Publication Requirements

Publishing meeting notices and a financial summary of the budget are some of the most important parts of the budget process. The budget officer must be familiar with the statutes governing publication of the meeting notices and the budget summary (ORS 294.401, 294.416, 294.418 and 294.421). This chapter explains the statutory publication requirements for fiscal year budgets. For biennial budgets, also see Chapter 14.

Notice of Budget Committee Meeting

Notice of the first meeting of the budget committee held for the purpose of receiving the budget message and budget document, and the first meeting at which questions and comments from the public will be heard must be published in one of three ways.

The budget officer must publish a “*Notice of Budget Committee Meeting*” by:

- Printing it in a **newspaper** of general circulation within the boundaries of the local government, or
- Mailing it by **first-class mail** through the U.S. Postal Service to each street address, PO Box, and rural route number within the boundaries of the local government, or
- **Hand delivery** to each street address within the boundaries of the local government.

The notice must contain the date, time, and location of the first budget committee meeting scheduled for receiving the proposed budget, hearing the budget message, and taking questions and comments from the public.

If the method of publication is by newspaper, the notice must be published **twice, five to 30 days** before the committee meeting. The two publications **must be separated by at least five days**. If the notice is mailed or hand delivered, only one notice is required not later than **10 days** before the meeting [ORS 294.401(5)].

If more than one meeting is planned, the budget committee may decide that the purpose of the first meeting is only to hear the budget message and receive the budget document, and that no public comment will be taken. In that case, a subsequent meeting must be scheduled for the purpose of taking public comment, and notice of both meetings must be published. The published notice must clearly tell people which meeting they should attend if they wish to ask questions or make comments on the budget. If more meetings are needed to take public comment and questions than were initially published, notice of the additional meetings is given in the same manner as required for notice of regular meetings of the governing body under Oregon’s Public Meetings Law (ORS Chapter 192).

If notice is published for an additional meeting to be held for the purpose of taking questions and comments from the public and it is subsequently determined that a meeting is not needed, notice of cancellation of the meeting must also be published [ORS 294.401(3)].

Notice of the first budget committee meeting must be published by one of the three methods listed above. It cannot be “posted.”

Internet posting of proposed budget (Washington County)

Under ORS 294.608 counties with a population of 500,000 or more must either form a tax supervising and conservation commission or require posting of a summary of the proposed budget on the county’s internet web site. Washington County has opted to require this posting. The information must be sent to the county before the first budget committee meeting. Local governments in Washington County should contact the county **Finance Division** for details at <http://washtech.co.washington.or.us/financialsummaries/>.

Local governments in other counties may post their notices and budgets on the internet if they choose to. However this does *not* replace the publication requirements described in this chapter.

Notice of Budget Hearing and Financial Summary

A local government must publish a summary of the budget approved by the budget committee. The summary contains information on the approved budget, the current year’s budget, and the preceding year’s actual resources and expenditures (ORS 294.421). The summary must state the estimated budget resources and expenditures by fund, the outstanding indebtedness and indebtedness authorized but not yet incurred, and an estimate of ad valorem taxes (ORS 294.386).

At the same time you publish the budget summary, you must also publish a notice of the budget hearing. The hearing notice gives the place and time of the hearing (ORS 294.416). The same publication methods described for the notice of budget committee meeting are used:

- Printing it in a **newspaper** of general circulation within the boundaries of the local government, or
- Mailing it by **first-class mail** through the U.S. Postal Service to each street, PO Box, and rural route address within the boundaries of the local government, or
- **Hand delivery** to each street address within the boundaries of the local government.

Unlike the notice of budget committee meeting, if the hearing notice is by newspaper, only one publication is required. The budget summary and hearing notice are published not less than five days or more than 30 days before the budget hearing.

Exception – Posting the hearing notice and financial summary

There is an exception to the publication requirements just described. If no newspaper is published within the boundaries of the local government and the budget expenditures for the coming year do not exceed \$50,000, the notice of the budget hearing may be “posted” (ORS 294.421). Post the notice and budget summary in three conspicuous places within the boundaries of the local government for at least 20 days before the hearing. These are places where many people are likely to go—such as the post office or grocery store.

When the notice and budget summary are posted, the local government is also required to publish in any newspaper of general circulation, by mail, or by hand delivery the following information:

- The date, time and place of the budget hearing,
- The place where the budget document can inspected or obtained by the public during regular office hours,
- The total approved budget requirements and tax amounts, and
- Any change in the tax rate or amount from the prior year.

This notice must appear between five and 30 days before the date of the hearing.

Exception – Counties with tax supervising and conservation commission (Multnomah County)

A local government with a population greater than 200,000 in a county with a tax supervising and conservation commission (TSCC), or one with a population less than 200,000 that requests the TSCC to conduct the budget hearing, does not publish its budget summary and hearing notice as described above. Instead, the local government submits its approved budget to the TSCC 20 days before a public hearing that will be held by TSCC [ORS 294.421(6)].

The local government is required to publish the following information in the newspaper, by first class mail or by hand delivery:

- The date, time and place of the TSCC budget hearing,
- The place where the budget document can inspected or obtained by the public during regular office hours,
- The total approved budget requirements and tax amounts, and
- Any change in the tax amount from the prior year.

This notice must be published five to 30 days before the date of the hearing.

How to count days for publication

ORS 193.060 states: *“The time for the publication of legal notices shall be computed so as to exclude the first day of publication and to include the day on which the act or event of which notice is given is to happen...”*

For example, if your meeting is on May 25, to give 10 days notice your notice must appear in the paper by May 15. In this example, you could count backwards from May 25, counting May 25, and publishing your notice on or before the 11th day prior—May 15.

The Publication Forms

The Department of Revenue provides forms and instructions each year for publishing the notice of the budget committee meeting and the financial summary and notice of budget hearing. *“The Local Budget Law and Notice of Property Tax Forms and Instructions”* booklet contains all the required publication forms. It is mailed every January to every taxing jurisdiction that requested it by the preceding November 15. It is also available online at <http://www.oregon.gov/DOR/PTD/LocalB.shtml>. There are separate booklets for municipal corporations, urban renewal agencies, and education districts, so be sure use the correct booklet.

All types of local governments use the form *“Notice of Budget Committee Meeting.”*

For the financial summary and budget hearing, non-school governments use *“Form LB-1 Notice of Budget Hearing”*. In addition to the LB-1, an LB-2, LB-3, and/or LB-4 may be required to fully publish the financial summary, depending on how many funds you have and the structure of your budget. Urban renewal districts use forms UR-1 and UR-2, which correspond to LB-1 and LB-2. No urban renewal forms correspond to LB-3 and LB-4. For education districts, forms ED-1, ED-2, and ED-3 correspond to LB-1, LB-2, and LB-3. No education form corresponds to LB-4.

“The Local Budget Law and Notice of Property Tax Forms and Instructions” booklets give detailed instructions for completing the forms and samples to use as reference.

Alternatively, the budget summary and notice of budget hearing may be published in a narrative format which is explained later in this chapter.

Notice of budget committee meeting

The form *“Notice of Budget Committee Meeting”* has two formats that can be used. The format option you use depends on the number of committee meetings that are planned and when public input will be received. Option A is used when the budget committee will receive the budget message and take public comment at the same meeting. Option B is used when public comment will be taken at another meeting after the first meeting.

Notice of budget hearing

Form **LB-1, UR-1, or ED-1** *“Notice of Budget Hearing”* notifies the public of the budget hearing date and time and where to obtain a copy of the budget. The notice should give a street address, rather than a post office box, where a copy of the budget can be inspected. Also include the street address where the hearing will be held.

The *“Financial Summary”* portion of the LB-1, UR-1 or ED-1 form has two columns, one for the adopted budget for the current year and one for the budget committee-approved amounts for the coming fiscal year. The two columns allow district patrons to compare the current financial plan and the proposed financial plan for the coming fiscal year.

Form LB-2, UR-2, or ED-2 is used to summarize the amounts approved by the budget committee in each expenditure category in the individual budget funds that do not require property taxes. Requirements must balance with resources. Each form has room for four funds. Only the completed portion of the form must be published.

Form LB-3 or ED-3 is used to summarize the amounts approved by the budget committee in each expenditure category in the individual budget funds that do require property taxes. Requirements must balance with resources. Each form has room for two funds. Only the completed portion of the form must be published. There is no corresponding form for urban renewal agencies.

For each individual fund that levies a tax this form shows the *“Property Taxes to be Received”* and the *“Estimated Property Taxes Not to be Received”*. The tax anticipated not to be received is broken down into two parts. One line shows the amount of tax you anticipate losing due to the Measure 5 *“Constitutional Limit.”* A second line shows the amount of taxes that will not be received because of the 3 percent *“Discount”* and *“Other Uncollected Amounts”* not received because some taxpayers do not pay taxes in the year they are billed.

The “Total Tax Levy” sum of the permanent rate taxes estimated to be received and the permanent rate taxes not to be received cannot exceed the amount estimated to be raised by your permanent rate limitation. More information on figuring taxes not anticipated to be received is in Chapter 7.

The amount of taxes not anticipated to be received is not shown in the budget document itself. The only place this information is provided to the public is on these publication forms. The budget document should show as a resource the amount of tax revenue estimated to be received after these losses are subtracted.

The LB-3 and ED-3 forms also have lines where you indicate the amount or rate of “Permanent Rate Limit Levy” taxes the budget committee approved, the “Local Option Tax” amount or rate the budget committee approved, and the amount of “Bonded Debt” tax the budget committee approved. This is usually the maximum amount of tax or tax rate that the local government can certify to the county assessor for each of these tax levies. However, if the governing body has additional taxing authority and wants to certify more than these amounts or rates, it may hold another budget hearing and republish the financial summary. In that case, the republished LB-3 or ED-3 shows the higher tax amount or rate on these lines.

The financial summary should include any tax that you are planning to submit for voter approval in March or May that, if approved, would be imposed in the year for which you are budgeting. If you are proposing a local option measure in the September election, you have the option of including those taxes or not. See chapter 10 for more on September elections.

The amount of taxes lost because of the constitutional limit may vary among funds. The percentage of taxes not to be collected because of the discount and failure to pay should be the same for all funds.

The resources and the requirements in each expenditure category in all of the funds shown on the forms LB-2 and LB-3, ED-2 and ED-3 or UR-2 are added together and the total of all funds is shown on the LB-1, ED-1 or UR-1. For this reason, we suggest that you complete the “-2” and “-3” forms first.

Form LB-1, UR-1 or ED-1 is amended only if republished. For more information on errors in the publication forms, see “*Correcting Publication Errors*” on page 49.

Form LB-4 is a summary of organizational units or programs within a fund. This form is only used by local governments that have multiple organizational units or programs within a fund, such as a city with police, fire, and administrative departments within the general fund. This form follows the same format as the Form LB-2, except there are no resources shown. Each organizational unit or program is also included by expenditure category in the totals on the LB-2 or LB-3 forms, so do not add the amounts from the LB-4 form when summarizing the entire budget on the LB-1 form.

Statement of indebtedness

All local governments must disclose the status of their indebtedness (ORS 294.386). The lower portion of Form LB-1, UR-1 or ED-1 provides lines for this disclosure. There are lines to show the long-term debt outstanding, the long-term debt authorized, but not yet incurred, and the short term debt that the district expects to incur during the year. If a local government has no debt to disclose, this portion of the form is not required to be published.

Narrative publication—an alternative

As an alternative to the publication forms discussed above, Local Budget Law permits the use of a narrative publication (ORS 294.418). The purpose of a narrative is to give meaning to the budget figures while highlighting significant features in the budget.

The notice must include the time and place (including the street address) at which the budget document may be discussed with the governing body. This is the notice of budget hearing. The notice must show the place where the complete budget document can be inspected by the public during business hours and where copies of the complete budget document may be obtained.

The narrative must include a statement that the same basis of accounting was used as in the current operating year; or, if the basis of accounting was changed, explain the change and its effects.

The narrative must include:

- A summary of the budget approved by the budget committee, compared to a summary of the budget for the preceding year and a summary of the budget for the current year. At a minimum, each summary must include the total requirements for personal services, materials and services, capital outlay, special payments, debt service, transfers, and operating contingencies for the budget.
- A brief narrative description of the major activities or major programs of the local government and the prominent changes from the current year.
- The changes in the personnel requirements for each major activity or major program.
- The major resources for financing each major activity or program and the significant changes from the current year, or state that each major activity or program is financed from general resources of the local government.
- Total budget requirements, total estimated resources other than property taxes, and the estimated property tax revenue for all funds, stated in dollars and cents.
- Estimates of both the taxes to be received and the taxes not to be received, as well as the total imposed.
- The local government's operating tax rate and the amount or rate of any other property taxes to be certified to the assessor. A tax rate must be expressed as a rate per thousand dollars of assessed value. Include local option taxes approved or yet to be approved by the voters, and the tax amount for meeting principal and interest payments on bonds.

The manner of publication and publication time requirements are the same for the narrative publication as they are for the standard financial summary publication described earlier in this chapter (ORS 294.421).

Correcting publication errors

The budget officer should be careful when publishing the financial summary. All anticipated property tax revenues and all expenditures approved by the budget committee must be published. We strongly recommend that the budget officer verify that publication occurred and that the correct numbers were published.

Errors in the published budget summary sometimes occur. Correctable errors include:

- Typographical or scribes' errors,
- Failure to mail or hand deliver the notice and financial summary to every address in the district,
- Arithmetic errors in computing numerical information, including errors in calculating taxes,
- Calculation of ad valorem taxes not made in accordance with law,
- Failure to publish within the time periods required by law (ORS 294.425).

It should be noted that these errors are errors in the published documents. **The budget officer cannot change the expenditures, revenues or taxes approved by the budget committee.** If the budget committee makes a mistake and approves an incorrect total or tax rate or amount, the governing body may reconvene the committee before the financial summary is published and have them approve a corrected total or tax, or the governing body can correct the error after publication, but before adopting the budget (See Chapter 11).

If a correctable error occurs, the budget officer corrects the error as follows. At the first regularly scheduled meeting of the governing body after the error is discovered, the budget officer informs the governing body in writing of the error. The budget officer also corrects the error in testimony before the governing body. If the error relates to a tax amount already certified to the assessor, the budget officer notifies the assessor in writing that an error occurred and submits a corrected tax certification document. Corrected tax certifications must be submitted to the assessor before October 1.

Chapter 10—Tax Elections

Three types of property tax measures may be submitted to the voters:

1. New local governments and ones that have never imposed a property tax before are allowed to seek voter approval for a permanent rate limit [Article XI, Section 11(3)(c)(A)].
2. A local government may request local option tax authority when the revenue needed to balance the budget is more than the government's existing taxing authority or if extra money is needed for a capital project.
3. Some types of local governments may ask their voters for approval to issue general obligation bonds. Approval of such a bond measure carries with it the authority to levy a property tax annually to pay the principal and interest on the bonds.

The tax election process is not tied directly to the budget process. However, the two processes are usually closely coordinated. Taxing authority may be voted on before the budget process begins (in November or March), during the budget process (in March or May), or after the end of the budget process (in September). In general, the budget committee must approve imposition of all tax levies during the budget process.

Voter approval of a tax rate or tax dollar amount sets an upper limit on taxation. An approved ballot measure does not require a taxing district to impose the full rate or amount of tax. The district establishes the need for the tax through the budget process. If the budget for the coming year requires less tax than the voters approved, a lower tax levy may be imposed.

It's very important that the budget committee approve any proposed taxes as part of its approval of the budget. If a tax election is scheduled for March or May, the budget committee should include the revenue from any anticipated additional tax authority in its approved budget. Include the amount of additional tax being requested even if the election has not yet been held. If the tax request passes, no revision to the budget is needed before it is adopted. If the measure fails, the budget can be reduced, or another election scheduled. If the budget committee does not approve the new tax authority, then before the governing body can adopt a budget that includes it, the governing body must publish a revised budget summary that includes the new tax revenue and hold a second budget hearing on that budget.

September election

New taxes proposed in September elections are an exception to the general rule that the budget committee must approve all tax levies. Even if a tax measure is being proposed the following September, the governing body must still adopt and appropriate the budget before June 30. This gives the local government authority to make expenditures beginning July 1. When a local government's taxing authority has not been finally determined by June 30 because of a tax election scheduled September, the governing body has a choice. The governing body can ask the budget committee to approve the proposed levy, and may adopt and appropriate a budget that includes those revenues, anticipating approval of the tax ballot measure. Alternatively, the governing body may adopt a budget that does not include the tax being requested in September. Either way, the governing body may not resolve to impose or categorize taxes until after the election.

Funds from the new levy may be lawfully expended only if appropriated. If the funds from the levy are included in the budget approved by the budget committee and adopted before June 30 and then the September measure passes, no additional budget process is necessary.

If the revenue is not included in the adopted budget and the measure passes, the governing body must adopt a supplemental budget after the election to add that revenue to the budget and resolve to appropriate it (ORS 294.437).

If funds from the levy are included in the budget approved by the budget committee and then the measure fails, the governing body may, after a public hearing, reduce the budget requirements to balance with the existing revenues [ORS 294.435(6)].

Extension of time to certify taxes

If proposing a tax in a September election, the governing body must submit a written request to the assessor for an extension of the July 15 deadline for certifying property taxes. The assessor may grant an extension until after the election. If the district extends into more than one county, the district must request this extension from the assessor of each county in which it is located. The written request must state the reason for the request and if the district will be levying to pay for bonded debt. No other documents need to be submitted to the assessor at this time [OAR 150-294.555(2)-(A)].

After the election, when the local government's taxing authority is finally determined, the governing body must adopt a resolution to impose its taxes and categorize each levy amount or rate as provided in ORS 310.060. File two copies of this resolution and the earlier resolutions adopting the budget and making appropriations, two copies of the tax certification (Form LB-50 or ED-50), and two copies of a successful ballot measure with the assessor by the extension date.

The assessor may extend the filing date up to October 1 [ORS 310.060(8)]. Tax notices submitted after October 1 cannot be placed on the tax roll.

Elections Division

The Oregon Secretary of State Elections Division administers the laws governing the conduct of elections. Elections Division issues administrative rules and distributes a series of election manuals, including the county, city and district "*Referral Manual*," which covers tax ballot measures. The manual includes the required forms, provides current election dates and a calendar showing the final filing dates for various elections and may help answer questions about types of elections, ballot format, and the content required by law.

Local governments must conduct tax elections through the county elections office. The county clerk usually serves as the county elections officer. Contact your county elections office for filing and notification requirements. Submit a "*Notice of Measure Election*" the specified number of days before the election date. This notice includes the text of your ballot measure.

Note that the county clerk and the Secretary of State administer election laws. The Department of Revenue administers property tax laws. A ballot measure requesting new taxing authority must follow both election law and tax law. If a voter-approved measure fails to meet the requirements of tax law, the Department of Revenue may void part or all of the tax (ORS 310.070).

Preparation of a tax ballot measure

The Department of Revenue publishes "*Tax Election Ballot Measures*" (Publication #150-504-421). This booklet can be found at http://www.oregon.gov/DOR/PTD/ptd_pubs.shtml. It contains instructions for writing a tax ballot measure that complies with tax law. Also refer to OAR 150-280.075 for detailed ballot wording requirements.

For additional help on taxing ballot measures, call the **Department of Revenue, Finance and Taxation** team at 503-945-8293.

Election dates for tax purposes (ORS 255.345)

1. Second Tuesday in March.
2. Third Tuesday in May.
3. Third Tuesday in September.
4. First Tuesday after the first Monday in November.

Local option and bond measures may be submitted for any of these dates (ORS 280.070). Measures requesting permission to form a new special district with a permanent rate may only be submitted for the May and November dates in even numbered years (ORS 198.815). Measures requesting a permanent rate for an existing special district that doesn't already have one may be submitted for any of the four dates (ORS 198.815).

Double majority

Article XI, Sections 11(8) and 11K impose additional requirements on some tax ballot measures. To pass, measures in elections held in March or September that request a permanent rate limitation, local option taxing authority, or approval of general obligation bonds must receive “double majority” approval. That is, at least 50 percent of the registered voters eligible to vote must cast a ballot and a majority of those voting must approve the measure. These requirements once applied to more election dates, but were changed with approval of Ballot Measure 56 (2008).

Filing with county assessor

Local governments must submit to the county assessor, along with their tax certification documents (LB-50 or ED-50), two copies of any tax measure that is newly voter-approved and being imposed for the first time. The assessor will forward one copy to the Department of Revenue. Do not send measures that were not approved by voters. Send the ballot measure itself, showing the question and summary that were presented to the voters.

Chapter 11—The Budget Hearing and Adopting the Budget

After the budget committee has approved the budget, the governing body must hold a public hearing on that budget and then adopt the budget.

Budget Hearing

One of the most important steps in the budget process is publishing a summary of the budget that has been approved by the budget committee and a notice of the budget hearing. For information on how to publish this notice of the budget hearing and financial summary, see “Chapter 9 – Publication Requirements”.

After the “Notice of Budget Hearing” is published, the budget hearing must take place at the time and place published or the hearing must be rescheduled and a new notice published. The governing body conducts the hearing and receives testimony from any person present. It gives consideration to matters discussed at the hearing (ORS 294.430). Keep careful minutes of the budget hearing proceedings to document your compliance with these requirements.

The budget committee is not required by law to be present at the budget hearing. However some local governments make it their policy to ask the budget committee to participate.

The hearing must be held on the budget that was approved by the budget committee, even if the governing body intends to modify that version of the budget before adopting it. The published financial summary should also reflect the version of the budget that was approved by the budget committee.

The governing body does not have to adopt the budget at the budget hearing. Formally adopting the budget, making appropriations, and declaring and categorizing the taxes can be done at any regularly scheduled and properly advertised public meeting of the governing body after the budget hearing and before July 1. If the governing body refrains from adopting the budget until June, it allows for adjustments to reflect changes in the resources or expenditures from the amounts estimated earlier.

There is no provision in law for adopting the budget after June 30. Planning ahead and having a budget calendar will help ensure that governing body members do not find themselves operating outside the law.

For information on adopting biennial budgets, see Chapter 14.

Changes to the budget after the budget hearing

Once the budget hearing has been held, the governing body can make changes to the budget that was approved by the budget committee. The governing body must take all available information into consideration when adopting the budget. This information includes the public testimony presented at the budget hearing and any new information affecting the estimates of the upcoming year’s resources or expenditures [ORS 294.435(1)]. For example, if a higher beginning fund balance, additional grants or other new resources are available, the additional monies can be added to the applicable fund balances and additional expenditures planned.

It is important that the governing body carefully consider the budget it adopts. Changes to the budget after it has been adopted often require governing body action, and sometimes require additional publications and public hearings. It is for this reason that all available information should be collected during the budget process.

There are restrictions on the size of certain changes by the governing body that may require additional process steps before the resulting budget can be adopted. Any expenditure in any fund can be reduced as long as resources and requirements in the fund remain in balance. The total budget must also remain in balance. Other than re-balancing if necessary, no additional process steps are required when expenditures are reduced. Any tax levy can be reduced from the rate or amount that was approved by the budget committee. The applicable funds and the total budget must be adjusted to remain in balance. Otherwise, no additional process steps are required when taxes are reduced.

Expenditures may be increased. If the total increase in no fund exceeds \$5,000 (\$10,000 in a biennial budget) or 10 percent, whichever is greater, then no additional process steps are required. However, if the expenditures

in any fund are increased by more than \$5,000 (\$10,000 in a biennial budget) or 10 percent, the governing body must publish notice of a second budget hearing and a new financial summary, and hold the second hearing before the adjusted budget can be adopted.

If taxes are increased at all above the rate or amount approved by the budget committee, a second notice and hearing are required before a budget including those additional revenues can be adopted. Note that taxes can only be increased if the budget committee approved less than the local government's full taxing authority, or if new taxing authority is approved by the voters after the budget committee approved the budget.

Adopting the Budget

Governing body resolution or ordinance

A resolution is a formal expression of the opinion or will of an official body. An ordinance has the character of an enactment of law by an established authority. For purposes of the Local Budget Law, either a resolution or ordinance by the governing body at this stage of the budget process provides the legal authority to establish or dissolve funds, make appropriations for expenditures, adopt the budget, impose and categorize taxes, and all other legal actions pertaining to adopting the budget and making tax levies.

Resolution adopting the budget

After the necessary hearing(s), the governing body must enact a resolution or ordinance adopting the budget (ORS 294.435). The resolution or ordinance adopting the budget should state the total amount of all the budget requirements.

Sample resolutions are shown at the end of this chapter.

Resolution making appropriations

Appropriations provide the local government with legal spending authority throughout the fiscal year. You must make separate appropriations for each fund in which you have budgeted expenditures [ORS 294.435(3)].

The resolution or ordinance making appropriations must identify the appropriations by the categories listed in ORS 294.435.⁷ Those categories correspond to the object classifications (the major expenditure categories) in the budget, which serve as a basis for the appropriations. Each expenditure line item in the budget detail must be classified within one of the object classifications, and thus, into one of the appropriation categories.

There is an exception to the last paragraph for those funds in which you budget by organizational unit or program. For each fund in which you budget by organizational unit or program, you may appropriate one amount for each unit or program. This amount includes the total personal services and materials and services expenditures for that unit or program. If the fund has debt service, special payments, interfund revenue transfers, capital outlay or contingency requirements, or if there are operating expenses (personal services or materials and services expenditures) that cannot be allocated to a specific operating unit or program, separate appropriations must also be made for each of those categories. Chapter 5 explains organizational units and programs.

For funds where the terms "organizational unit" or "program" do not apply, the appropriations must have separate totals for any:

- Personal services,
- Materials and services,
- Capital outlay,
- Debt service,
- Special payments,

⁷Instead of appropriating by the categories in ORS 294.435, schools and ESDs appropriate their expenditures by the "function" categories of the "Oregon Department of Education's Program Budgeting and Accounting Manual." The function categories are Instruction, Support Services, Enterprise and Community Services, Facilities Acquisition and Construction, Interagency/Interfund Transfers, Debt Service and Contingency. At a minimum, there must be one amount appropriated for each function in which monies are being expended in a fund. Community colleges may appropriate by function or by program, with some exceptions that are explained in the "Oregon Department of Community Colleges and Workforce Development's Community College Accounting Manual".

- Interfund revenue transfers, and
- General operating contingency, if applicable for the fund.

Requirements not appropriated

The **unappropriated ending fund balance** and amounts **reserved for future expenditure** are budget requirements. However, they are not appropriated expenditures. Show them as line items in the budget detail. Include them in the total requirements for the fund in the published summary of the budget. But **do not appropriate** the unappropriated ending fund balance or the reserved for future expenditure in the resolution or ordinance making appropriations. They are not intended to be spent and therefore should not be appropriated. They may be shown as a footnote in the resolution or otherwise, as long as it is clear that they are not included in the total appropriations. Many local governments do this to show that these unappropriated amounts, when added to the amounts appropriated, match the total adopted budget amount.

Some common errors to avoid are:

- Combining the appropriations from more than one fund. Appropriate **each fund** separately.
- Not appropriating some expenditures. Appropriate for **every fund** in which you have budgeted expenditures.
- Not specifying appropriation amounts in the resolution or ordinance. Do not simply refer to the adopted budget when making the appropriations in the resolution. For example: *“Be it resolved that appropriations are hereby made as outlined in the adopted budget.”* This is not adequate. You may include appropriations as a separate schedule referred to in the resolution or ordinance making appropriations, as long as the schedule includes the required level of detail.
- Using appropriation categories other than those allowed in ORS 294.435. **Do not** lump appropriations into “miscellaneous,” “other,” or “special” categories. Use only the appropriation categories listed in ORS 294.435.

Significance of the July 1 date

Appropriations are limited to a single **fiscal year** or biennial budget period (ORS 294.311). The budget year or biennium ends on June 30 (every other June 30 for biennial budgets). That means all spending authority of a local government ends on that June 30. A local government does not have legal authority to spend or encumber money for the new fiscal year or biennium until the budget is adopted and appropriated. If expenditures are made without appropriation authority, the officials who allow or authorize such expenditures might be held personally responsible for the repayment of the money (ORS 294.100).

Limits and penalties associated with appropriations

After the budget is adopted, a local government must stay within the appropriations set for the budget period. It is illegal to overspend an appropriation. ORS 294.435(4) states that: when appropriations have been made, *“Thereafter no greater expenditure, or encumbrance . . . of public money shall be made for any specific purpose other than the amount appropriated therefore except as provided in ORS 294.326, 294.440, 294.450 and 294.480.”* (These statutes describe situations in which appropriation authority may be changed during the fiscal year. For more on how appropriations may be adjusted to avoid overspending, see *“Chapter 13 - Budget Changes After Adoption.”*) The fiscal officer must pay close attention to each appropriation throughout the year to avoid overspending.

The penalties for unlawful spending of public money are established by ORS 294.100. *“It is unlawful for any public official to expend any money in excess of the amounts, or for any other or different purpose than provided by law.”* The public official *“shall be civilly liable for the return of the money by suit of the district attorney of the district where the offense is committed, or at the suit of any taxpayer of such district, if the expenditure constitutes malfeasance in office or willful or wanton neglect of duty.”*

Level of appropriation determines the need for changes after adoption

At a minimum, appropriations must be by the categories listed in ORS 294.435. If the governing body desires, it may appropriate to a greater level of detail within those categories. You may appropriate right down to the budget line item level if you wish. However, unless there is a need for an increased level of control, we recommend that you appropriate only to the level required by ORS 294.435.

Whether appropriations must be adjusted during the year sometimes depends on the level of detail to which you have appropriated in the fund. If you have appropriated to the minimum level of detail that is required (for example, one amount for each object classification), it is not necessary for each line item amount within an appropriation category to be strictly enforced in its expenditure. If one line item is over-expended, you can reduce the spending for one or more of the other line items in the same appropriation category to keep expenditures within the limits of the appropriation. In such a situation, no change would be necessary to the budget.

Example:

Budgeted General Fund Requirements (budget detail)

Materials and Services

Office supplies	\$1,000
Contract services	800
Utilities	<u>2,000</u>
Total materials and services	\$3,800

Resolution Making Appropriation

General Fund

Materials and services	\$3,800
------------------------	---------

During the fiscal year, you find that contract services expenses will exceed the budgeted amount by \$100. However, the utilities expenses will be less than budgeted. No governing body action is needed to pay the \$900 contract services expense as long as the total appropriation of \$3,800 for Materials and Services is not exceeded.

Resolution Imposing Ad Valorem Taxes

Governing bodies that are imposing ad valorem property taxes must declare the tax rate or the amount of each levy by resolution or ordinance [ORS 294.435(1)]. Property taxes are imposed for the tax year on the assessed value of all taxable property within the district. Declare each levy as a rate or an amount, not both.

The rate or amount of property taxes certified on the “*Notice of Property Tax*” (Form LB-50/ED-50) must be the same rate or amount declared in the resolution or ordinance. See Chapter 12 for more information on certifying property taxes.

Declaring urban renewal taxes

Every year an urban renewal agency must declare the amount of revenue it wishes to receive from division of tax and/or special levy for each of its urban renewal plans. If the plan is an “existing” plan, the amount the plan can ask for is determined by its “option”. Implementing legislation for Measure 50 (1997) created three options for financing urban renewal indebtedness for plans existing then. The municipality that activated the agency was directed to choose one of the three options for each existing plan. The option chosen by the municipality cannot be changed [ORS 457.435(4)]. New plans authorized since 1996 are not given a choice of options.

As a result of Chapter 700, Oregon Law 2009, plans may each year request less than the full division of tax amount by requesting that only part of the increment value be used. Any increment value that is not requested is returned to the taxing districts and used for calculating their taxes.

In addition, that law also imposes limitations on the amount of increment that can requested if certain conditions exist. For more detail, refer to Or. Law 2009, chapter 700 (HB 3056).

A plan that was an existing plan, but that is substantially amended in certain ways can lose its “existing” status and thereafter receive division of tax, but no more special levy. See ORS 457.010(5) for more on these substantial amendments.

The governing body of the urban renewal agency must pass a resolution declaring that they wish to receive 100% of division of tax, or specifying the amount of increment to use to calculate a lesser amount of division of tax for each plan for the year and submit that resolution and a matching Form UR-50 to the assessor by July 15.

When sufficient division of tax monies have been collected to retire a plan’s maximum indebtedness, the urban renewal agency must notify the assessor and stop receiving division of tax (ORS 457.450).

For more information on declaring urban renewal taxes, see *“Local Budget Law and Notice of Property Tax Forms and Instructions for Urban Renewal Agencies”* (150-504-076) at: <http://www.oregon.gov/DOR/PTD/LocalB.shtml>

Resolution Categorizing the Tax

The governing body must declare through resolution or ordinance the Measure 5 limitation category of each of its taxes (ORS 294.435). This resolution or ordinance is the basis for the certification of tax limitation category that is submitted to the assessor on the LB-50, ED-50 or UR-50 form (ORS 294.555).

The tax limitation categories are required by Article XI, Section 11b, of the Oregon Constitution and further explained in ORS 310.150. There are three categories:

- Taxes imposed exclusively to support the public school system go in the **“Education”** category;
- Taxes imposed to support other government operations go in the **“General Government”** category; and
- Taxes levied to pay exempt bonded indebtedness go in the **“Excluded from Limitation”** category.

The categorization of tax may be included in the resolution or ordinance imposing the ad valorem tax. Such a resolution would show the amount of ad valorem tax by fund by category. For example, a non-school local government could declare the tax by fund and category as follows:

	General Government Limitation	Excluded From Limitation
General Fund	\$200,000	
Debt Service Fund		\$111,000
Category Total	\$200,000	\$111,000

If a tax levy is split, with a portion going to two different categories, then the resolution must state the portion or percentage for each category.

See Chapter 12 for more information about tax limitation categories and certifying ad valorem property taxes to the assessor.

Examples of Resolutions Required by ORS 294.435

Example 1 is for an organization unit-style budget. It contains separate statements for imposing and categorizing taxes. Example 2 is for a program-style budget. It gives an example of a combined resolution statement for imposing and categorizing taxes. It also shows taxes imposed as a rate.

Example 1—Organizational unit budget:

Resolution Adopting the Budget

Be it resolved that the City Council of the City of Baylor hereby adopts the budget for fiscal year 2008-2009 now on file at the City Hall in the sum of \$788,406.*

Resolution Making Appropriations

Be it resolved that the amounts for the fiscal year beginning July 1, 2008, and for the purposes shown below are hereby appropriated as follows:

General Fund

Administration Department	\$50,703
Police Department	131,103
Fire Department	27,170
Capital Outlay	1,000
Transfer to Fire Equipment Reserve	6,500
General Operating Contingency	<u>5,000</u>
Fund Total	\$221,476

Utility Fund

Personal Services	\$112,730
Materials and Services	118,700
Capital Outlay	1,000
Transfer to Debt Service Fund	<u>2,462</u>
Fund Total	\$234,892

Debt Service Fund

Debt Service	\$113,000
Fund Total	<u>\$113,000</u>
Total Appropriations All Funds	\$569,368*

*Note that the total appropriation amount is not equal to the amount of the total adopted budget. This is explained by the fact that there are unappropriated ending fund balances and/or amounts reserved for future expenditure in some of the funds. Such amounts are not appropriated, accounting for the difference.

Resolution imposing taxes

Be it resolved that the City Council of Baylor hereby imposes the taxes provided for in the adopted budget in the amount of \$131,064 for operations and in the amount of \$99,931 for bonds; and that these taxes are hereby imposed for tax year 2008-2009 upon the assessed value of all taxable property within the district.

Resolution categorizing taxes

Be it resolved that the City Council of Baylor hereby categorizes the taxes as follows:

	General Government	Excluded From Limitation
General Fund	\$131,064	
Debt Service Fund		\$99,931

Example 2—Program budget:

Note: Since this district has only one program the appropriations are by object classification.

Resolution Adopting the Budget

Be it resolved that the Board of Directors for Fire District #20 hereby adopts the budget for 2008-2009 now on file at the district fire station in the sum of \$165,661.*

Resolution making appropriations

Be it resolved that the amounts for the fiscal year beginning July 1, 2008, and for the purposes shown below are hereby appropriated as follows:

General Fund

Personal Services	\$26,495
Materials and Services	37,576
Capital Outlay	51,830
Transfer to Equipment Reserve	5,000
General Operating Contingency	4,000
Fund Total	\$124,901

Equipment Reserve Fund

Capital Outlay	\$27,000
Fund Total	\$27,000

Debt Service Fund

Debt Service	\$10,760
Fund Total	\$10,760
Total Appropriations All Funds	\$162,661*
Unappropriated Amounts	\$3,000*
Total Budget	\$165,661*

* This illustrates one way to reconcile appropriated amounts to the budget total when there are unappropriated amounts. It is optional.

Resolution imposing and categorizing taxes—combined

Be it resolved that the Board of Directors for Fire district #20 hereby imposes the taxes provided for in the adopted budget at the rate of \$2.34 per \$1,000 of assessed value for operations and in the amount of \$9,450 for bonds; and that these taxes are hereby imposed for tax year 2008-2009 upon the assessed value of all taxable property within the district and categorized as follows:

	General Government	Excluded From Limitation
General Fund	\$2.34/\$1000	
Debt Service Fund		\$9,450

Chapter 12—Certifying Taxes Imposed

By July 15 each year, every local government that has the authority to impose ad valorem property taxes or another tax on property must give notice of the tax it is imposing to the county assessor [ORS 310.060(1)]. Urban renewal agencies must provide notice to the assessor of the urban renewal division of tax or special levy they desire. In addition to specifying the rates or amounts being requested, the local government must certify to the assessor that it has the authority to place such amounts on the tax roll and that it has complied with ORS 294.435.

These annual notice requirements also apply to local governments that budget on a biennial basis. Every district imposing a tax must certify to the assessor every year.

If the local government needs an extension of time to file its notice of taxes, the extension must be requested in writing by July 15. If a local government fails to certify its taxes by the July 15 deadline or by the date stated by the assessor in response to a request for extension, the assessor is prohibited from extending those taxes on the property tax roll for that year (ORS 310.065).

Notice of Ad Valorem Property Taxes

The form for certifying taxes is Form LB-50 for non-schools or Form ED-50 for education districts. Urban renewal agencies use Form UR-50 to request division of tax or a special levy.

If a paper copy is requested by November 15, these forms and their instruction booklets are mailed each year to the “mailing address of district” that the district provided the prior year when it submitted the form. If that address changes, please notify **Finance and Taxation** at 503-945-8293. You can also contact us for a new booklet or download it from our web site at <http://www.oregon.gov/DOR/PTD/localform.shtml>. The forms and instructions are revised every year. **Use the form for the correct fiscal year** and carefully follow the instructions when completing the forms.

The assessor and the Department of Revenue use the information on the LB-50, ED-50, or UR-50 to verify that the local government’s tax is within constitutional and statutory limits as required in ORS 310.070. If the department finds that the tax certified exceeds the constitutional or statutory limits, the department notifies the local government and the county assessor that the tax must be reduced.

Certification of taxes approved by the budget committee

The “*Notice of Property Tax*” form (LB-50 or ED-50) includes a certification statement regarding the taxes approved by the budget committee. The tax rate or amount approved by the budget committee sets a limit on the taxes that the assessor can extend on the roll, regardless of what the local government’s full taxing authority may be. The governing body can impose more tax than approved by the budget committee only after republishing an amended budget summary and holding another hearing [ORS 294.435(1)]. The statement on Form LB-50 and Form ED-50 certifies that the taxes being certified are within the taxes approved by the budget committee or that the taxes were changed by the governing body and the budget was republished. The certification is in the form of two statements with check boxes with the heading “Certification”. To complete this certification, mark one of the two check boxes. One or the other box must be checked to certify that the local government has complied with ORS 294.435. If a local government does not comply with ORS 294.435 by holding a second budget hearing if required, it cannot impose ad valorem property taxes that year.

Certification of limitation category

Local governments are required to notify the assessor of the Measure 5 constitutional tax limitation category in which their ad valorem tax or other tax on property is to be placed [ORS 310.060(2)(h) & (3)(b)]. The Forms LB-50 and ED-50 are designed so the certification of the ad valorem tax limitation category is built into form. If you use the correct form, your ad valorem taxes will be correctly categorized.

An exception is if a local government imposes a tax that will be split between the Education and General Government categories. In that case, the portion intended for each category must be listed separately. This can be done by submitting separate LB-50 and ED-50 forms for each portion. State the rate or percentage of the whole tax rate that is intended for each category or, if the tax is imposed as a dollar amount levy, state the dollar amount that is intended for each category. The resolution categorizing the tax should also state clearly what portion of a split levy belongs in each category.

Notice of other taxes on property

Part IV of the Form LB-50 is for certifying special assessments, fees, charges, and other non ad valorem taxes that fall within the definition of “taxes on property” given in ORS 310.140(1):

“Tax on Property’ means any tax, fee, charge or assessment imposed by any government unit upon property or upon a property owner as a direct consequence of ownership of that property, but does not include incurred charges or assessments for local improvements...”

Like ad valorem taxes, other taxes on property are subject to the limitations imposed by Article XI, Section 11b, of the Oregon Constitution (the Measure 5 limits). All taxes on property must be certified to the county assessor by July 15 so they can be subjected to the constitutional limitation calculations and collected through the property tax system.

A local government imposing other (non ad valorem) taxes on property must submit to the assessor with Form LB-50 a list of the properties, by assessor’s account number, on which non ad valorem fees, charges, or assessments are to be imposed. It must either state the amount of the fee, charge, or assessment which is imposed uniformly on each property, or if the fee, charge, or assessment is not uniform, it must show the amount imposed on each property [ORS 310.060(3)(a)].

There is a statement in Part IV of the LB-50 that includes a blank line on which to write the Oregon Revised Statute (ORS) number from your principal act that gives your type of local government the authority to certify these assessments to the county assessor for inclusion on the tax roll. You must complete this information or the assessor cannot place these charges on the roll.

What Tax Certification Documents to Submit

Districts subject to local budget law that impose property tax

By July 15, a local government that is **subject to Local Budget Law, and imposes an ad valorem tax** or another “tax on property,” must submit two copies of the following to the county assessor in the county where the principal office of the local government is located and where applicable, the tax supervising and conservation commission.

- The notice of property tax and certification Form LB-50, ED-50 or UR-50.
- The resolution statements that adopt the budget, make appropriations, and declare and categorize taxes.
- The ballot measure for any tax that received voter approval during the current fiscal year [(ORS 294.555(2), ORS 310.060, and Administrative Rule 150-294.555(2)-(B)].

If a local government is located in more than one county, in addition to the distribution described above, one copy of all the documents must be sent to the assessor of each of the other counties in which the government is located [ORS 310.060(7)].

Districts not subject to local budget law that impose property tax

Local governments that impose an ad valorem tax or another tax on property, but that are not subject to Local Budget Law must submit two copies of the LB-50 tax certification document and the resolutions adopting, appropriating, imposing and categorizing to the assessor in the county where the principal office of the local government is located.

Districts subject to local budget law that do not impose a property tax

If a local government that is subject to Local Budget Law does not impose a tax on property, it must file a copy of the resolutions adopting the budget and making appropriations with the Department of Revenue, Property Tax Division, PO Box 14380 NE, Salem OR 97309–5075 [ORS 294.555(1)].

Do not submit your complete budget to the assessor or the Department of Revenue unless requested to do so.

With the exception of those districts that do not impose a property tax, **do not** submit a copy of anything to the Department of Revenue unless requested to do so. The assessor sends the department one of the two copies you submit to the county.

Contents of the complete budget document

OAR 150-310.060(7) lists the contents of the completed budget document as follows:

- (a) A copy of the two notices of the budget committee meeting showing the dates published, or an affidavit of publication, accompanying a copy of the actual publications;
- (b) A copy of the notice of budget hearing showing the date published, or an affidavit of publication, accompanying a copy of the actual publications;
- (c) A copy of all of the budget detail sheets;
- (d) A copy of the resolution statements or ordinance that adopt the budget, and make appropriations;
- (e) If the district is imposing taxes on property subject to ad valorem property taxation, a copy of the resolution statement or ordinance that imposes the tax;
- (f) If the district is imposing taxes on property subject to ad valorem property taxation, a copy of the resolution statement or ordinance that categorizes the tax for purposes of Article XI, section 11(b), of the Oregon Constitution;
- (g) If the district is imposing taxes on property subject to ad valorem property taxation, a copy of the Notice of Property Tax Levy form;
- (h) Sample ballots of any new ad valorem tax authority approved by the voters and being used for the first time by the district.

The budget document may include any other document the district chooses to include.

School districts

School districts must submit hard copies of their complete budget document to the Department of Education and their educational service district by July 15. Schools must also submit an electronic version of their budget to the Department of Education by August 15.

Other

When required, submit one copy of the budget document to the **Tax Supervising and Conservation Commission**.

Furnish a copy of the budget document to the **county treasurer** if the treasurer makes payments for bonds issued by the local government.

Not later than September 30 of each year, local governments that impose property taxes must provide a copy of their **complete budget document** to the **clerk** of the county where the principal office of the district is located. If the district is located in more than one county, provide a copy to the clerk of each county in which any part of the district is located [ORS 310.060(7)].

Copies of resolutions submitted to the assessor must be signed by at least one individual (for example, the budget officer or a governing body member) to indicate their authenticity.

If the Department of Revenue determines that a local government has not complied with Local Budget Law, it can ask the local government to reduce its tax. If the local government contends that Local Budget Law was followed and refuses to reduce its tax, the department may file an appeal with the **Oregon Tax Court**. The department has 30 days from the time the notice of tax is submitted to the county assessor to file an appeal (ORS 294.485).

Chapter 13—Budget Changes After Adoption

An appropriation establishes the authority of the governing body to make expenditures and to incur obligations for specific purposes. It is limited to one fiscal year or biennial budget period [ORS 294.311(3)]. Appropriations are a legal limitation on the amount of expenditures that can be made during the fiscal year and on the purposes for which expenditures can be made [ORS 294.435(4)]. A local government's appropriations are detailed in the resolution or ordinance making appropriations. Examples are shown at the end of Chapter 11. After the beginning of the fiscal year or biennial budget period, when a local government is operating with the adopted budget, changes in appropriated expenditures sometimes become necessary. Appropriations may be increased or decreased, or transferred from one appropriation category to another.

Budget reduction

If a local government will not realize the amount of resources it estimated, and this shortfall will not be offset by receipts of another resource in the same fund, the amount of the appropriations and expenditures may be reduced. A shortfall in revenue can be revealed by periodic financial reports, a procedure which should be a fundamental administrative practice of all local governments. After holding a public hearing, the governing body can adjust budgeted resources and reduce appropriations by ordinance or resolution to reflect a decrease in resources [ORS 294.435(6)].

Resolution transfers

The adopted budget may include budgeted transfers of resources between funds. In addition, it often becomes necessary after the budget is adopted to transfer appropriation authority (and in some cases, resources) from one fund to another or between appropriation categories within the same fund. The governing body may authorize some transfers of appropriation authority by passing a resolution or ordinance. A transfer of appropriation authority is a decrease of one existing appropriation and a corresponding increase of another existing appropriation, with no net change in the total amount of all appropriations [OAR 150-294.450(3)(1)]. In general, a resolution may not be used to authorize the creation of a new appropriation category that does not already exist. That requires a supplemental budget. See more on supplemental budgets later in this chapter.

The resolution or ordinance authorizing a transfer must state the need for the transfer, the purpose of the expenditure, and the amount to be transferred [ORS 294.450(1) & (3)].

Transfers authorized by resolution can occur either within a fund, or from one fund to any other fund.⁸

Intrafund transfers

Appropriations can be transferred within a fund from an existing appropriation category to another existing appropriation category by resolution or ordinance. For example, appropriation authority can be transferred from a fund's existing materials and services appropriation to the fund's existing capital outlay appropriation. The materials and services category is decreased and capital outlay is increased by an equal amount. The net change in the fund's total appropriations is zero.

Intrafund resolution transfers do not require the transfer of resources. No additional revenue is received by the fund; the expenditures are just shifted from one appropriation category to another.

Contingency transfers

A common situation in which appropriations are transferred from one category to another within a fund is when a specific need is identified for money that was budgeted and appropriated as operating contingency. To make the expenditure, the appropriation authority must be transferred from the contingency category to the appropriation category from which it will be expended. The contingency appropriation is reduced and the receiving appropriation category is increased by the same amount so the fund remains in balance.

The amount which may be transferred from contingency by resolution is limited to 15 percent of the total appropriations in the fund [ORS 294.450(2)]. Transfers of contingency which in total exceed 15 percent in a year may be made only after adopting a supplemental budget for that purpose. If there is no existing appropriation

⁸ This is a recent change in Local Budget Law made by SB 916 (Oregon Law 2009, chapter 477).

in the category in which the desired expenditure falls, a supplementary budget is required to create the new appropriation.

Example of the 15 percent calculation: If the appropriations in a fund total \$100,000, including \$20,000 for general operating contingency, only 15 percent, or \$15,000, of the appropriations, may be transferred from the contingency appropriation by resolution or ordinance. The remaining \$5,000 of contingency can be transferred only through a supplemental budget.

Interfund transfers

Appropriations can be transferred during the fiscal year from one fund to another fund by a resolution or ordinance. A transfer of resources is also sometimes required when appropriations are moved between funds. Resources by themselves cannot be transferred between funds by resolution. If the fund does not have an appropriation category for “transfer to other funds,” one may be created as part of the resolution or ordinance [OAR 150-294.450(3)(4)]. This is the only circumstance in which a budget appropriation category may be created by resolution or ordinance during the fiscal year.

Appropriations in the receiving fund are increased by the amount of the transfer, and the resources available to that fund are also increased by the amount of resources transferred from the originating fund. Appropriations in the originating fund are reduced, as are the resources. Expenditures in the originating fund are then limited by the reduced appropriation authority and reduced resources.

Example:

As the fiscal year begins, the city has made its general fund and utility fund appropriations as follows:

Existing Appropriations

General Fund		Utility Fund	
Administration	\$50,703	Materials & Services	118,700
Police	131,103	Capital Outlay	<u>1,000</u>
Fire	27,170	Utility Fund Total	\$119,700
Transfers Out	7,500		
Contingency	<u>5,000</u>		
General Fund Total	\$221,476		

Total Appropriations All Funds \$341,176

Scenario: Because of the required repair of a major water leak, \$2,000 of contingency in the general fund will be transferred to the utility fund materials & services.

Step 1—Intrafund transfer of contingency appropriation

	Existing	Changes	Adjusted
Administration	\$50,703	-0-	\$50,703
Police	131,103	-0-	131,103
Fire	27,170	-0-	27,170
Transfers Out	7,500	2000	9,500
Contingency	<u>5,000</u>	<u>(2,000)</u>	<u>3,000</u>
Total	\$221,476	-0-	\$221,476

\$2,000 of the general fund contingency appropriation is transferred to the appropriation category “transfers out.” This \$2,000 of the general fund appropriation and resources can now be transferred to the utility fund.

Step 2—Interfund transfer (appropriation received in Utility Fund)

	Existing	Changes	Adjusted
Materials and Services	\$118,700	2,000	\$120,700
Capital Outlay	<u>1,000</u>	<u>-0-</u>	<u>1,000</u>
Total	\$119,700	2,000	\$121,700

The utility fund material & services appropriation is increased \$2,000 so the additional expenditures can be made. The fund's resources are also increased by the same amount, so the fund remains in balance.

Total Appropriations After Transfers

General Fund	\$221,476
Utility Fund	<u>121,700</u>
Total Appropriations All Funds	\$343,176

The total appropriations in all funds have increased \$2,000 because of the new amount of capital outlay appropriation in the utility fund.

Appropriation vs. line item transfers

Notice that this discussion has been of transferring appropriation authority. It has been about changing the amounts in the appropriation categories within a fund, not necessarily the amounts budgeted for individual line items. A governing body may choose to appropriate all the way down to the level of line item detail, but that is not common. More often, a local government appropriates only to the level of detail that is required by ORS 294.435. That is, in each fund, most local governments appropriate only to the level of organization unit or program or by the major object classifications of personal services, materials and services, capital outlay, debt service, transfers, contingencies, and special payments. Schools generally appropriate only to the "function" level of detail in each fund. The function categories are: instruction, support services, enterprise and community services, facilities acquisition and construction, interagency/interfund transfers, debt service and contingency.

Assuming that a local government appropriates only to the level required by ORS 294.435, the amounts expended for an individual budget line item within each of those appropriation categories can exceed the budgeted amount for that individual line item without the necessity of transferring or otherwise changing appropriations, as long as some other budgeted line item expenditure is reduced, so the total for the appropriation category is not exceeded. In other words, the limitation is the amount of the appropriation, not the amount budgeted for an individual line item.

Interfund loans

A local government may loan money from one fund to another, provided the loan is authorized by an official resolution or ordinance (ORS 294.460). The resolution or ordinance must state the fund from which the loan is made, the fund to which the loan is made, the purpose of the loan, and the principal amount of the loan. If the loan is an operating loan (that is, to pay for operating expenses), it must be repaid to the fund from which it is borrowed by the end of the fiscal year, or the repayment must be budgeted and made in the next fiscal year.

If the loan is a capital loan (that is, for the acquisition of a capital asset), it must be repaid in full within 10 years of the date of the loan. The resolution must set forth a schedule under which the principal and interest is to be budgeted and repaid. It must also state the rate of interest. The rate of interest may be the current rate of return on monies invested in the local government investment pool under ORS 294.805 to 294.895, or may be such other rate as the governing body determines.

If the loan will be repaid in the current fiscal year, no action by the governing body is necessary in regard to the budget. The current budget is not adjusted to show the loan transaction. The local government's accounting records will show the loan and the repayment.

If the loan will be repaid in one or more future fiscal year(s), the loan repayment must be budgeted and a separate debt service appropriation made for the expenditure. Do not show the loan amount as a deficit resource [OAR 150-294.361(1)(B)]. This is not an acceptable budgeting practice.

With two exceptions, loans may be made from most funds. Loans may not be made from debt service funds. Loans made from debt service reserve funds created to provide additional security for outstanding bonds or other borrowing obligations are limited to amounts in the fund that are in excess of the amount the local government has covenanted to maintain in reserve.

Loans may not be made from moneys credited to any fund when there are constitutional provisions that restrict those moneys to specific uses, unless the purpose for which the loan is made is a use allowed under such constitutional provisions [ORS 294.460(1)(c)]. An example of such a constitutional provision is the restriction in Art. IX, Section 3a on the use of revenue from the state taxes on motor vehicle ownership, use and fuel. Generally, these monies may only be used to pay for roads, highways and related projects. This money is distributed to counties and cities through revenue sharing. You could not loan these monies for any use other than the uses specified in Art. IX, Section 3a.

Supplemental Budget

A supplemental budget is most often required when new appropriation authority is needed. For example, circumstances may require expenditures that were not budgeted, or you may receive revenue you did not plan for in your budget, but that you want to spend in the current fiscal year. A supplemental budget is usually not required if appropriations are not being changed.

Although a supplemental budget is usually associated with the expenditure of new appropriations and increased revenues, it can also be used for other purposes. For example, a supplemental budget is usually required to create a new fund during the fiscal year or when transferring appropriation authority to an appropriation category that doesn't already exist in the adopted budget.

Supplemental budgets are good only through the end of the fiscal year or biennium in which they are adopted. They cannot be used to authorize changes in a prior year's budget. Preparing a supplemental budget does not authorize the governing body to impose additional ad valorem taxes [ORS 294.480(5)].

When can a supplement budget be prepared?

A local government may prepare a supplemental budget if one or more of the following circumstances exists (ORS 294.480):

- An occurrence or condition that was not known at the time the budget was prepared requires a change in financial planning or creates a pressing necessity for prompt action.
- Funds are made available by another unit of federal, state or local government and the funds were not known for certain at the time the budget was prepared.
- A request for services or facilities is received and the cost will be paid for by a private individual, corporation or company, or by another governmental unit, and the amount of the request could not have been known for certain at the time the budget was prepared.
- Proceeds from the involuntary destruction, involuntary conversion, or sale of property has necessitated the immediate purchase, construction or acquisition of different facilities to carry on the governmental operation.
- A sufficiently greater amount of ad valorem taxes than estimated are received during the fiscal year, and the difference will significantly affect the level of government operations to be funded by those taxes for the current year.

There are also specific circumstances when a supplemental budget is not required to make expenditures that are not in the adopted budget. See *"Exceptions to Local Budget Law"* at the end of this chapter.

When is a supplemental budget not allowed?

A supplemental budget cannot authorize spending an unappropriated ending fund balance, except when necessitated by involuntary conversion or a civil disturbance or natural disaster (ORS 294.371, 294.455). It also cannot be used to spend the tax raised above the estimated amount stated in the ballot for a rate local option tax [ORS 280.075(2)].

Process and preparation

A supplemental budget may adjust one fund or several. If a supplemental budget is necessary, the process for preparing it must be determined. The process depends on the size of the change in the adopted expenditures. For the purpose of determining which process to use, fund expenditures in the adopted budget do not include unappropriated ending fund balance, interfund transfers, or contingency amounts. The amount of the adopted expenditure is the amount in the budget adopted before June 30, before any preceding supplemental budgets or other changes that have already been made during the current fiscal year. The 10 percent is in aggregate; you must include any changes made previously when computing the percentage of change.

Less than 10 percent

When the supplemental budget will adjust fund expenditures by less than 10 percent of the fund's adopted expenditure total, the process used to adopt the supplemental budget is fairly simple. If the supplemental budget is adjusting more than one fund, the adjustment to each fund must be less than 10 percent to use the simple process. The simple process for adjustments of less than 10 percent is:

- The supplemental budget may be adopted by the governing body at a regularly scheduled meeting of the governing body. The budget committee is not required to be involved.
- Notice of the regular meeting at which the supplemental budget will be adopted must be published by one of the publication methods used to give notice of the first budget committee meeting (See "*Chapter 9 - Publication Requirements*"). The notice must be published not less than five days before the meeting. The notice must include the name of each fund being adjusted, the amount of change in each fund's total expenditures, and the fund's revised total resources and requirements after the changes (OAR 150-294.480).
- At the meeting, the governing body approves a resolution adopting the supplemental budget and making any necessary appropriations.

10 percent or more

When the supplemental budget will adjust any fund's expenditures by 10 percent or more or will create a new fund or a new appropriation category, then a longer process must be used to adopt the supplemental budget.

- A public hearing must be held and public comment taken before adoption of the supplemental budget. The hearing is held by the governing body. The budget committee is not required to be involved. At the hearing, the governing body must hear comments and questions from any person who wishes to speak.
- **Five to 30 days** before the hearing, a notice of hearing and a summary of the proposed supplemental budget must be published using one of the publication methods used to give notice of the first budget committee meeting. The notice must include for each fund being adjusted: the name of the fund, the new total for each resource line item or appropriation category being changed, added or deleted, and the fund's revised total resources and requirements (OAR 150-294.480). The Department of Revenue provides a form that can be used to publish the summary of the supplemental budget. The form is titled "*Notice of Supplemental Budget Hearing*," and is included in the packet of budget forms available at: <http://www.oregon.gov/DOR/PTD/localform.shtml>. The form number for municipal corporations is 150-504-073-8, for education districts is 150-504-075-7 and for urban renewal agencies is 150-504-076-6. A paper copy of the form is available if you call 503-945-8293.
- Following the hearing, the governing body must pass a resolution or ordinance to adopt the supplemental budget and make any necessary appropriations.

Note that the amount by which fund expenditures are being changed has no effect on whether a supplemental budget is required. The "10 percent rule" only determines the *process used to adopt* a supplemental budget; not *whether* a supplemental budget is required. It is common to need a supplemental budget even if the expenditures are changing by less than 10 percent. Whether a supplemental budget is required is determined by the criteria in ORS 294.480 and by whether some other "exception to Local Budget Law" can be found that describes the situation and allows the contemplated change without a supplemental budget. See "*Exceptions to Local Budget Law*" on page 68.

Completing the notice of supplemental budget hearing

The form provided by the Department of Revenue for publishing notice of a supplemental budget is designed to provide summary information on the *changes* being made by the supplemental budget. Prepare a summary for each fund that is changing. For each fund, indicate the *new total* of any resource item that is being changed, the new total for each appropriation category that is being changed, and the *new fund total* resources and requirements. Do not show resource items or appropriation categories that are not changing. Note that the new fund total may not equal the amount of the changes shown in the summary because there could be other resources or requirements in the fund that are not changing.

Reflecting a supplemental budget in next year's budget document

When preparing the budget detail sheets for the coming fiscal year, revise the figures in the column "*Adopted Budget This Year*" to include the changes made by any supplemental budgets during the current year.

Exceptions to Local Budget Law

To lawfully spend money, a local government must follow the requirements of Local Budget Law [ORS 294.326(2)]. Often this means adopting a supplementary budget before making expenditures that exceed existing appropriation authority. However, certain situations allow an exception to the general requirements of Local Budget Law. If one of the following descriptions applies to your situation, then a supplementary budget may not be required. Refer to the statute cited for complete details.

Specific purpose grants and gifts

Expenditure in the year of receipt of grants, gifts, bequests or devises transferred to the local government in trust for a *specific purpose* may be made after enactment of a resolution or ordinance authorizing the expenditure [ORS 294.326(3)]. However, expenditure in the year of receipt of undesignated *general purpose* grants, gifts, bequests or devises that exceed budgeted appropriations can only be made after adoption of a supplemental budget. Specific purpose grants, gifts, bequests or devises that will be spent, in whole or in part, in a fiscal year following the year in which they are received must be included as a resource in the regular budget for that future year and the expenditure must be appropriated.

Unforeseen occurrence or condition / nontax funds

If the governing body declares the existence of an unforeseen occurrence or condition that could not have been foreseen at the time of the preparation of the budget, or the existence of an unforeseen pressing necessity for an expenditure, or if it receives a request for services or facilities for which the cost will be paid by another entity, then the governing body may appropriate for that purpose by resolution or ordinance, to the extent that nonproperty tax funds are available for the expenditure [ORS 294.326(4)].

Bond proceeds

Unbudgeted expenditures of proceeds from the sale of revenue bonds, bonds approved by the voters during the current fiscal year, or refunding bonds may be made during the current year without a supplemental budget [ORS 294.326(5) and 294.483(1)]. A resolution or ordinance may be enacted to establish a special revenue fund or a capital project fund for the bond proceeds if none exists, and to appropriate the proceeds.

Bond debt service

Expenditures to pay debt service on certain bonds which are authorized and issued during the fiscal year may be made without adopting a supplemental budget [ORS 294.325(5) and 294.483(2)]. A resolution or ordinance may be enacted to establish a debt service fund if a suitable fund does not already exist, and to appropriate the principal and interest payments.

Other bond exceptions

Expenditure of funds from the sale of conduit revenue bonds, or funds irrevocably placed in escrow for the purpose of defeasing and paying bonds, or of prepaid assessments to redeem bonds, or of debt service reserves used to pay or defease debt service may be made without adopting a supplemental budget [ORS 294.326(6)].

Local improvement assessments

Expenditure of funds received from assessments against benefited property for local improvements may be made without adopting a supplemental budget [ORS 294.326(7)].

Deferred employee compensation

Expenditure of funds accumulated to pay deferred employee compensation may be made without adopting a supplemental budget [ORS 294.326(8)].

County tax refunds

The county tax collector may pay property tax refunds under ORS 311.806, including refund interest, without those payments being budgeted by the county [ORS 294.326(9)].

Purchase refunds

Expenditures of money refunded after a purchase has been returned may be made after a public hearing and enactment of a resolution or ordinance authorizing the expenditure [ORS 294.326(10)].

New districts

A newly formed municipal corporation is not required to prepare a budget for the fiscal year in which it is formed. If a new district is formed between March 1 and June 30, it is not required to prepare a budget for the following fiscal year either [(ORS 294.326(11)].

School emergency

If the governing body of a school district or community college declares that an emergency exists, and that additional expenditures are necessary to provide adequate facilities, supplies or personnel for the proper instruction of pupils for the remainder of the budget year, and additional money is available from the federal government or the ESD under ORS 334.370, the board may make such expenditures without adopting a supplemental budget (ORS 294.440).

Natural disasters

Expenditure of funds to deal with involuntary conversion or damage or destruction from a civil disturbance or **natural disaster** may be made from any available source of revenue after the governing body enacts a resolution or ordinance authorizing the expenditure or after it adopts a supplemental budget (ORS 294.455).

Pass through payments

An appropriation for pass through payments that are made to another organization from taxes, fees or charges may be increased by resolution if the actual amount collected exceeds the budgeted estimate [ORS 294.450(6)].

Internal service expenditures

An appropriation for internal service payments made from one part of an organization to another may be increased by resolution (ORS 294.470).

Abolish unnecessary fund

A fund may be declared unnecessary and abolished during the fiscal year by resolution or ordinance. Any monies remaining in the fund are transferred to the general fund (ORS 294.475).

Chapter 14—Biennial Budgets

Biennial Budgets

Municipal corporations have the option of budgeting for a 12-month fiscal year or for a 24-month “biennial” budget period. The governing body, by ordinance, resolution or charter, may provide that the budget and budget documents be prepared for a budget period of 24 months. Unless specified in this chapter or elsewhere in this manual, all provisions of local budget law remain the same for both fiscal year and biennial budgets except the length of the budget period.

For local governments with the authority to levy tax upon property, the biennial budget period begins on July 1 and ends on June 30 of the second ensuing calendar year (ORS 294.311). School districts that adopt a biennial budget are required by the Oregon Department of Education to use a biennial period that is the same as the biennial period used by the state of Oregon.

Budget Committee

Appointed members of a budget committee that approves a biennial budget serve for a term of four years. The terms must be staggered so that, as near as practicable, one-fourth of the terms end each year (ORS 294.336).

If an existing local government adopts a biennial budget period, there will be a period of transition from fiscal year budgets to biennial budgets. During this period, appointive members of the budget committee who are already serving may serve out their three-year terms. New members or members who are reappointed to another term may receive four-year terms. However, the governing body may decide to appoint some of these new or returning members for shorter terms or to shorten the terms of sitting members to less than three years to establish the staggered schedule with one-fourth of the terms ending each year.

Proposed Budget Document

Estimating expenditures and resources

All estimates of resources and expenditures and other budget requirements in a proposed biennial budget must be for the entire 24-month budget period. Total resources must equal total requirements. Estimates of cash carry forward, beginning balance or net working capital should be the estimated ending fund balance from the preceding budget period.

If resources include revenue from property taxes, the budget should include the amount expected to be received from both tax years covered by the budget period. When estimating the amount to be received, estimate the amounts for both years separately, as provided in ORS 294.381. Estimates of prior year taxes, interest earnings and other resources to be received should include the total amount expected during both years of the coming biennium.

Grants must be budgeted if there is a reasonable expectation that they will be received any time during the coming biennium and the amount of a grant can be ascertained in good faith.

First and second preceding budget period’s data and current year data

Resource and expenditure amounts in the “Actual” columns of the budget detail should be the actual resources and expenditures for the two preceding 24-month budget periods (two biennia). The “Adopted Budget This Year” column should show the estimated data for the current biennial budget period.

During the transition from fiscal year to biennial budgets, the detail sheets should show a mixture of single-year budget data and two-year budget data. Do not attempt to “double” the actual or estimated data from a fiscal year budget to make it comparable to the proposed budget. Explain the discrepancy between fiscal year and biennial figures in a footnote and in the budget message.

Debt service on bonds (ORS 294.483)

A municipal corporation that has outstanding general obligation or Bancroft bonds, then adopts a biennial budget should take care to budget and appropriate amounts sufficient to pay the debt service on those bonds in both years of the succeeding 24-month budget period.

If bonds are approved by the voters and sold during a biennial budget period, a supplemental budget is not necessary to pay debt service on the bonds during that budget period [ORS 294.326(5)]. A governing body resolution or ordinance is recommended to document the appropriation of the debt service payments or if a new debt service fund is created.

If new bonds are approved during a biennium but the budget committee did not approve a debt service levy for those bonds for the second year of the biennium, a governing body resolution or ordinance is sufficient to impose and categorize the tax in the second year [ORS 294.437(2)].

Bond proceeds (ORS 294.483)

If bonds are approved by the voters and sold during a biennial budget period, and proceeds from the bonds will be expended during that same budget period, a supplemental budget is not necessary to appropriate that expenditure [ORS 294.326(5)]. A governing body resolution or ordinance is recommended to document the appropriation. If bonds are approved in one budget period and the proceeds will be spent in a subsequent budget period, those proceeds must be included in the budget for the subsequent budget period and appropriated.

Method of accounting (ORS 294.445)

Any change in the basis of accounting must be clearly set forth in the biennial budget message. Once a new basis of accounting is adopted, it must be followed for the entire biennial budget period. Examples of basis of accounting are cash, accrual, and modified accrual. Changing from fiscal year budgeting to biennial budgeting is not a change in the method of accounting.

Budget committee approves tax levies for entire biennium

The budget document as approved by the budget committee must specify the amount or rate of ad valorem taxes for each fund for both years of a biennial budget period. The amount or rate of tax for each fund must be stated separately for each tax year. The amount or rate of tax for each fund need not be the same for both years. In particular, the amount of tax levied for a debt service fund is highly unlikely to be the same for two consecutive years because principal and interest payments tend to fluctuate as the debt is paid down.

An exception to the requirement that the budget committee must approve the tax levies for both years of a biennium is when a local option or bond measure is approved by the voters in an election held after the budget is adopted. See *“Imposing New Taxes Approved After Adoption”*, on page 72.

Publication Requirements

Budget summary (ORS 294.416, 294.418)

The summary of the budget document that is approved by the budget committee must be published as provided in ORS 294.416 or 294.418 (ORS 294.421). In that notice, the resources and expenditures approved by the budget committee for the entire biennium must be compared to the actual expenditures and resources of the preceding budget period and to the budget summary of the current budget period.

During the transition from fiscal year to biennial budgets, the published budget summaries should show a mixture of single-year budget data and two-year budget data. Do not attempt to double the actual or estimated data from a fiscal year budget to make it comparable to the proposed budget. Explain the discrepancy between fiscal year and biennial figures in a footnote and in the budget message.

Posting the budget summary and notice of budget hearing (ORS 294.421)

If the budget approved by the budget committee is for a biennial budget period, and

- there is no newspaper of general circulation published in the district, and
- the total estimated expenditures in the ensuing budget period do not exceed \$100,000, then

the district may post the budget summary and notice of budget hearing in three conspicuous places within the district for a period of at least 20 days before the hearing, in lieu of publishing in a newspaper, or by hand delivery or first-class mail. If the budget summary is posted, a notice must also be published by newspaper, by hand delivery or by first class mail, giving the date, time and place of the hearing, the place where the budget document is available for inspection, and the total amount of budget resources and taxes to be levied.

Governing Body Actions After Approval by Budget Committee

Adopt budget and make appropriations (ORS 294.435)

After the budget hearing, the governing body must enact ordinances or resolutions to adopt the budget, to make appropriations, and to levy and to categorize the property taxes. The amount of the adopted budget and of appropriations must be the amount budgeted for all 24 months of the ensuing budget period. Taxes must be levied and categorized separately for both years of the ensuing year of budget period (ORS 310.060).

Changes to expenditures or taxes before adoption (ORS 294.435)

The budget estimates and proposed amount or rate of ad valorem property tax shown in the approved budget may be amended by the governing body before the start of the budget period. If the governing body increases the estimated expenditures approved by the budget committee for any fund in a biennial budget by more than \$10,000 or 10 percent, whichever is greater, or if the governing body increases the amount or rate of ad valorem taxes for either year, the amended budget must be republished and another public hearing held.

Once a biennial budget has been adopted, the governing body cannot increase the tax amount for either year of that budget period unless the voters approve new taxing authority for this district.

Imposing new taxes approved after adoption (ORS 294.437)

If a new local option tax or bond levy is approved by the voters during a biennium, and the tax levy for it was not included in the budget approved by the budget committee or added by the governing body before adoption by republishing the budget summary and holding another hearing, to levy the tax the governing body must adopt a resolution or ordinance imposing the tax and categorizing it as to its Measure 5 category (ORS 294.437). The tax must be certified to the assessor under ORS 310.060. These two steps may only be taken after the election.

If the election is in September of the first year of the biennium, ask the assessor for an extension of time to certify your taxes for that year and follow the same procedure for including September-approved taxes as with fiscal year budgets (See "*Chapter 10 – Tax Elections*").

If the election is other than September of the first year, the new tax may only be imposed during the second year of the biennium. When you certify your other taxes in the second year, separately state the new tax levy in the resolution or ordinance imposing the tax and categorizing it. Budget committee approval is not required. Adopt a supplemental budget to appropriate the additional revenues.

Governing Body Actions After Adoption

Contingency (ORS 294.450)

A supplemental budget is required before transfers during a biennial budget period of general operating contingency appropriations in excess of 15 percent of the total appropriations in the fund. This applies to transfers that were not budgeted, but are made after the budget has been approved. That is, it applies to those transfers of contingency that are made during the budget period for which the contingency appropriation was made. Unbudgeted transfers from contingency totaling 15 percent or less during the biennium can be made by resolution or ordinance.

Pass-through payments (ORS 294.450)

When one local government must pass through revenue from taxes, fees or charges to another local government, the pass-through payments must be budgeted. The local government making the pass-through of revenue must include in its budget the amount estimated to be received during both years of the biennial budget period and appropriate the entire amount to be passed through during the budget period. If the actual amount collected during the budget period exceeds the estimated amount, the governing body must pass a resolution or ordinance to appropriate the excess.

Interfund loan (ORS 294.460)

If an interfund loan is for the purpose of paying operating expenses, the ordinance or resolution authorizing the loan must provide that the loan be repaid in the same biennial budget period or in the ensuing budget period. If it is to be repaid in the ensuing budget period, then the payment must be budgeted as an expenditure in the ensuing period and be appropriated.

Capital loans must be repaid within 10 years from the date the loan is made, whether the budget is fiscal year or biennial. Capital loans not repaid in the budget period in which they are made must be budgeted as an expenditure in the ensuing period(s) and be appropriated.

Internal service fund (ORS 294.470)

If a local government includes an internal service fund in a biennial budget, it must budget and appropriate the anticipated expenditure for the entire biennial budget period. The governing body may increase appropriations of an internal service fund during the current budget period by resolution or ordinance.

Supplemental budget (ORS 294.480)

A supplemental budget that amends a biennial budget is for the remainder of the 24-month budget period in which it is adopted. When determining the process for adopting a supplemental budget under ORS 294.480(3) and (4), the governing body must consider whether the estimated expenditures being changed by the supplemental budget differ by 10 percent or more from the total appropriated for the biennium in any of the funds being changed. If the supplemental budget will adjust all of the changing funds' current biennial expenditures by less than 10 percent, the governing body may use the simple process described in Chapter 13, in which the supplemental budget is adopted at a regular meeting of the governing body. If the supplemental budget will adjust any fund's current expenditures by 10 percent or more, a public hearing and notice according to ORS 294.416 is required.

A supplemental budget cannot authorize an increase in a local government's total ad valorem property taxes above the amount or rate published with the original biennial budget and certified to the assessor for either fiscal year of the budget period.

File budget document with Department of Revenue (ORS 294.555)

A local government that does not levy an ad valorem property tax but that is subject to Local Budget Law and that prepares a biennial budget must file with the Department of Revenue a copy of the resolutions adopting the budget and making appropriations. This copy must be filed on or before July 15 of the first fiscal year of the budget period.

File budget document with Department of Education

School districts that prepare a biennial budget must file an electronic version of their budget with the Oregon Department of Education annually. This version of the budget must be annualized, to show the estimated resources and requirements for the single upcoming year only. If you are a school district and have questions about what is required, please contact the Office of School Finance at 503-947-5916.

File budget document with tax supervising and conservation commission (ORS 294.635)

A municipal corporation that is subject to a tax supervising and conservation commission and that adopts a biennial budget must submit its detailed estimates of the biennial budget to the commission on or before May 15 of the first fiscal year of the budget period. The commission will certify any objections it has to the adoption of the biennial budget on or before June 25 of the first fiscal year of the budget period.

Retention (ORS 294.555)

A local government that is subject to Local Budget Law and that prepares a biennial budget must retain a true copy of its budget until the end of the second budget period following the budget period for which the biennial budget was prepared.

Appendix A—Glossary

Accrual basis. Method of accounting recognizing transactions when they occur without regard to cash flow timing [ORS 294.311(1)].

Activity. That portion of the work of an organizational unit relating to a specific function or class of functions, a project or program, a subproject or subprogram, or any convenient division of these [ORS 294.311(2)].

Adopted budget. Financial plan that is the basis for appropriations. Adopted by the governing body (ORS 294.435).

Ad valorem tax. A property tax computed as a percentage of the assessed value of taxable property.

Agent. Generally, someone who is authorized to act for the local government, or who can make commitments or sign contracts in the name of the local government. Agency is the fiduciary relationship that arises when one person (a ‘principal’) manifests assent to another person (an ‘agent’) that the agent shall act on the principal’s behalf and subject to the principal’s control, and the agent manifests assent or otherwise consents so to act.

Appropriation. Authorization for spending a specific amount of money for a specific purpose during a fiscal year. It is based on the adopted budget, including supplemental budgets, if any. It is presented in a resolution or ordinance adopted by the governing body [ORS 294.311(3)].

Approved budget. The budget that has been approved by the budget committee. The data from the approved budget is published in the Financial Summary before the budget hearing (ORS 294.406).

Assessed value. The value set on real and personal property as a basis for imposing taxes. It is the lesser of the property’s maximum assessed value or real market value.

Assessment date. The date on which the value of property is set, January 1 (ORS 308.210, 308.250)

Audit. The annual review and appraisal of a municipal corporation’s accounts and fiscal affairs conducted by an accountant under contract or the Secretary of State (ORS 297.425).

Audit report. A report in a form prescribed by the Secretary of State made by an auditor expressing an opinion about the propriety of a local government’s financial statements, and compliance with requirements, orders and regulations.

Balanced budget. A budget in which the resources equal the requirements in every fund.

Bequest. A gift by will of personal property; a legacy.

Biennial budget. A budget for a 24-month period.

Billing rate. The tax rate used to compute ad valorem taxes for each property.

Budget. Written report showing the local government’s comprehensive financial plan for one fiscal year. It must include a balanced statement of actual revenues and expenditures during each of the last two years, and estimated revenues and expenditures for the current and upcoming year [ORS 294.311(5)].

Budget committee. Fiscal planning board of a local government, consisting of the governing body plus an equal number of legal voters appointed from the district (ORS 294.336).

Budget message. Written explanation of the budget and the local government’s financial priorities. It is prepared and presented by the executive officer or chairperson of the governing body (ORS 294.391).

Budget officer. Person appointed by the governing body to assemble budget material and information and to physically prepare the proposed budget (ORS 294.331).

Budget period. For local governments on a biennial budget, the 24-month period beginning July 1 and ending June 30 of the second following calendar year. See also “Fiscal year.”

Budget transfers. Amounts moved from one fund to finance activities in another fund. They are shown as expenditures in the originating fund and revenues in the receiving fund.

Capital outlay. Items which generally have a useful life of one or more years, such as machinery, land, furniture, equipment, or buildings [ORS 294.352(6)].

Capital projects fund. A fund used to account for resources, such as bond sale proceeds, to be used for major capital item purchase or construction [OAR 150-294.352(1)].

Cash basis. System of accounting under which revenues are accounted for only when received in cash, and expenditures are accounted for only when paid [ORS 294.311(9)].

Category of limitation. The three categories in which taxes on property are placed before the constitutional limits can be tested—education, general government, excluded from limitation (ORS 310.150).

Glossary (continued)

Consolidated billing tax rate. The combined total of the billing rates for all taxing Districts in a code area. Does not include the billing rate for any urban renewal special levies or non-ad valorem taxes, fees, or other charges.

Constitutional limits. The maximum amount of tax on property that can be collected from an individual property in each category of limitation (Art. XI, sect. 11b, OR Const.).

Debt service fund. A fund established to account for payment of general long-term debt principal and interest [OAR 150-294.352(1)].

Devise. A gift by will of the donor of real property.

District. See "Local government."

Division of tax. Division of tax refers to the process of, and revenue from, apportioning tax to urban renewal agencies based on the relationship of the excess to frozen value, a.k.a. tax increment revenue.

Double majority. A term that refers to an election where at least 50 percent of the registered voters eligible to vote in the election cast a ballot and more than 50 percent voting approve the question.

Education category. The category for taxes that will be used to support the public school system and are not used to pay exempt bonded indebtedness [ORS 310.150(2)].

Encumbrance. An obligation chargeable to an appropriation and for which part of the appropriation is reserved [ORS 294.311(10)].

Enterprise fund. A fund established to account for operations that are financed and operated in a manner similar to private business enterprises. They are usually self-supporting. Examples of enterprise funds are those for water, gas, and electric utilities, swimming pools, airports, parking garages, transit systems, and ports [OAR 150-294.352(1)].

Estimate. (v) To arrive at a rough calculation or an opinion formed from imperfect data. (n) The resulting amount.

Excluded from limitation category. The category for taxes used to pay principal and interest on exempt bonded indebtedness [ORS 310.150(2)].

Exempt bonded indebtedness. 1) Bonded indebtedness authorized by a specific provision of the Oregon Constitution, or 2) bonded indebtedness issued as a general obligation on or before November 6, 1990, incurred for capital construction or capital improvements, or 3) bonded indebtedness issued as a

general obligation after November 6, 1990, incurred for capital construction or capital improvements with the approval of the electors of the local government. Bonded indebtedness issued to refund or refinance any bonded indebtedness described above is also included [ORS 310.140(7)].

Existing plan. An existing urban renewal plan is defined as a plan that existed in December 1996, and, 1) chose an option and, 2) established a maximum amount of indebtedness by July 1998 and has not been amended to increase the land area or maximum indebtedness [ORS 457.101(4)(a)].

Expenditures. Total amount incurred if accounts are kept on an accrual basis; total amount paid if accounts are kept on a cash basis [ORS 294.311(16)].

Fiscal year. A 12-month period to which the annual operating budget applies. The fiscal year is July 1 through June 30 for local governments [ORS 294.311(17)].

Fund. A fiscal and accounting entity with self-balancing accounts to record cash and other financial resources, related liabilities, balances and changes, all segregated for specific, regulated activities and objectives.

Fund balance. The fund equity of government funds.

Fund type. One of nine fund types: General, special revenue, debt service, capital projects, special assessment, enterprise, internal service, trust and agency, and reserve [OAR 150-294.352(1) and ORS 280.100].

Gap bonds. Any portion of a local government's property tax levy that is used to repay qualified taxing district obligations. This portion was exempted from the calculation of the permanent rate limit. When the debt is paid, the permanent rate is adjusted. Qualified obligations include principal and interest on certain bonds or formal, written borrowings of moneys issued before December 5, 1996, and pension and disability plan obligations that commit property taxes to fulfill those obligations.

General fund. A fund used to account for most fiscal activities except for those activities required to be accounted for in another fund [OAR 150-294.352(1)].

General government category. The category for taxes used to support general government operations other than schools that are not for the purposes of paying exempt bonded indebtedness [ORS 310.150(1)].

Glossary (continued)

Good Faith. The standard for estimating budget resources and requirements. Good faith estimates are reasonable and are reasonably likely to prove accurate, based on the known facts at the time.

Governing body. County court, board of commissioners, city council, school board, board of trustees, board of directors, or other managing board of a local government unit [ORS 294.311(15)].

Grant. A donation or contribution in cash by one governmental unit to another unit which may be made to support a specified purpose or function, or general purpose [ORS 294.311(19)].

Interfund loans. Loans made by one fund to another and authorized by resolution or ordinance (ORS 294.460).

Internal service fund. A fund used to account for fiscal activities when goods or services are provided by one department or agency to other departments or agencies on a cost-reimbursement basis (ORS 294.470).

Legal opinion. The opinion as to legality rendered by an authorized official, such as the Oregon attorney general or city attorney.

Levy. (v) To impose a property tax. (n) Ad valorem tax certified by a local government.

Local government. Any city, county, port, school district, education service district, community college, special district, public or quasi-public corporation (including a municipal utility or dock commission) operated by a separate board or commission; a municipality or municipal corporation under ORS 294.311(25).

Local option tax. Voter-approved taxing authority that is in addition to the taxes generated by the permanent tax rate. Local option taxes can be for general operations, a specific purpose or capital projects. It is limited to five years unless it is for a capital project, then it is limited to the useful life of the project or 10 years, whichever is less [Art. XI, section 11(4)].

Maximum assessed value (MAV). A constitutional limitation on the taxable value of real or personal property. It can increase a maximum of 3 percent each year. The 3 percent limit may be exceeded if there are qualifying improvements made to the property, such as a major addition or new construction.

Maximum authority. The limitation on the amount of revenue an existing urban renewal plan may raise from the property tax system [ORS 457.435(3)].

The assessor calculated this amount for the 1997-98 tax year for each existing plan based on the taxes each urban renewal plan area would have been entitled to prior to Measure 50. This amount is adjusted each year based on the growth of excess value in the plan area.

Maximum indebtedness. The amount of the principal of the indebtedness necessary to complete an urban renewal plan. This does not include indebtedness incurred to refund or refinance existing indebtedness [ORS 457.010(10)]. It is specified in dollars and cents and based on good faith estimates of the scope and costs of the anticipated project or projects. All existing plans are required to have an ordinance which establishes a maximum indebtedness.

Measure 5. A constitutional amendment (Art. XI, section 11b) passed in 1990 that limits the amount of operating tax that can be imposed on a property to \$5 per \$1,000 of real market value for education and \$10 per 1,000 for general government.

Measure 50. A constitutional amendment (Art. XI, section 11) passed in 1997 that limits the growth in a property's assessed value to 3% per year. It also limits a local government's taxing authority by creating permanent rate limits.

Municipal corporation. See "Local government."

Municipality. See "Local government."

Net working capital. The sum of the cash balance, accounts receivable expected to be realized during the ensuing year, inventories, supplies, prepaid expenses less current liabilities and, if encumbrance method of accounting is used, reserve for encumbrances [ORS 294.311(26)].

Object classification. A grouping of expenditures, such as personal services, materials and services, capital outlay, debt services, and other types of requirements [ORS 294.311(28)].

Operating rate. The rate determined by dividing the local government's operating tax amount by the estimated assessed value of the local government. This rate is needed when a local government wants to impose less tax than its permanent rate will raise.

Option, urban renewal. Financing arrangement chosen by existing urban renewal plans. Cannot be changed. The options are as follows:

Option 1 [ORS 457.435(2)(a)], allows the plan to collect division of tax as computed under ORS 457.440. If the amount collected from the division

Glossary (continued)

of tax is insufficient, a special levy may be imposed against all taxable property of the municipality that activated the urban renewal agency. Option 1 plans are “reduced rate” (do not divide local option or bond levies approved by voters after October, 2001).

Option 2 [ORS 457.435(2)(b)]. The Cascade Locks Plan in Hood River County was the only Option 2 Urban Renewal Plan, and that plan has been completed. May impose a special levy, but does not collect division of tax.

Option 3 [ORS 457.435(2)(c)], provides that Option 3 plans can obtain funds from both the division of tax and a special levy. Like Option 1, the agency may limit the amount to be received from the special levy, but unlike Option 1 the agency limited the amount of funds received from the division of tax when the Option was chosen. Option 3 plans are “standard rate” (divide all tax levies).

Other “standard rate” plan was adopted between December 1996 and October 2001. Receives division of tax, but no special levy.

Other “reduced rate” plan was adopted after October 2001, or was an Option 1 or 2 plan that was substantially amended. Receives division of tax only.

Ordinance. A formal legislative enactment by the governing board of a municipality.

Organizational unit. Any administrative subdivision of the local government, especially one charged with carrying on one or more specific functions (such as a department, office or division) [ORS 294.311(30)].

Personal services expenses. Expenses related to the compensation of salaried employees, such as, health and accident insurance premiums, Social Security and retirement contributions, civil service assessments.

Permanent rate limit. The maximum rate of ad valorem property taxes that a local government can impose. Taxes generated from the permanent rate limit can be used for any purpose. No action of the local government or its voters can change a permanent rate limit.

Principal act. The Oregon Revised Statutes that describe how a certain type of municipal corporation is formed and selects its governing body, and the powers it may exercise and the types of taxing authority that its voters may authorize.

Prior years’ tax levies. Taxes levied for fiscal years preceding the current one.

Program. A group of related activities to accomplish a major service or function for which the local government is responsible [ORS 294.311(32)].

Program budget. A budget based on the programs of the local government.

Property taxes. Ad valorem tax certified to the county assessor by a local government unit.

Proposed budget. Financial plan prepared by the budget officer. All funds must balance. It is submitted to the public and the budget committee for review.

Publication. Public notice given by publication in a newspaper of general circulation within the boundaries of the local government; mailing through the U.S. Postal Service by first class mail to each street address within the boundaries of the local government; and hand delivery to each street address within the boundaries of the local government [ORS 294.311(34)].

Real Market Value (RMV). The amount in cash which could reasonably be expected by an informed seller from an informed buyer in an arm’s-length transaction as of the assessment date. For most properties, the value used to test the constitutional limits (ORS 308.205).

Reserve fund. Established to accumulate money from year to year for a specific purpose, such as purchase of new equipment (ORS 294.525).

Resolution. A formal order of a governing body; lower legal status than an ordinance.

Resource. Estimated beginning funds on hand plus anticipated receipts (ORS 294.361).

SAL Report. Summary of Assessments and Levies (ORS 309.330).

Special levy. A special levy is an ad valorem tax, imposed for an urban renewal plan on the entire municipality that adopted the plan. It is not a result of a division of tax.

Special revenue fund. A fund used to account for the proceeds of specific revenue sources (other than special assessments, expendable trusts, or major capital projects) that are legally restricted to expenditure for specific purposes [OAR 150-294.352(1)].

Glossary (continued)

Special payment. A budget expenditure category for pass-through payments, grants made to other organizations and other one-time or unusual expenditures that do not fall into the other categories of personal services, materials and services, capital outlay, etc.

Supplemental budget. A financial plan adopted during a budget period to meet unexpected needs or to appropriate revenues not anticipated when the regular budget was adopted. It cannot be used to authorize a tax (ORS 294.480).

Tax increment financing. A financial mechanism for urban renewal plans which captures the tax from the growth in property value within a designated geographical area by dividing the taxes of local governments.

Tax on property. Any tax, fee, charge or assessment imposed by any government unit upon property or upon a property owner as a direct consequence of ownership of that property [ORS 310.140(1)].

Tax rate. The amount of tax stated in terms of a unit of tax for each \$1,000 of assessed value of taxable property.

Tax roll. The official listing of the amount of taxes imposed against each taxable property.

Tax year. The fiscal year from July 1 through June 30.

Trust fund. A fund used to account for fiscal activities of assets held in trust by a local government.

Unappropriated ending fund balance. Amount set aside in the budget to be carried over to the next year's budget. It provides the local government with cash until tax money or other revenues are received later in the year. This amount cannot be transferred by resolution or used through a supplemental budget, unless necessitated by a qualifying emergency (ORS 294.371, ORS 294.455).

A. Coming year budget shown:	294.376
1. Proposed	
2. Approved	
3. Adopted	
B. Current year budget shown.	294.376
C. First preceding year actual resources and expenditures.	294.376
D. Second preceding year actual resources and expenditures.	294.376
E. Each fund to contain estimates of expenditures for:	150-294.352(1)
1. Personal services	294.352
2. Materials and services	294.352
3. Capital outlay	294.352
4. Special payments and interfund transfers	294.352
5. General operating contingencies	294.352
	150-294.352(8)
IV. Budget Resources	150-294.361(1)
A. Estimate of beginning cash balances for the ensuing year.	
B. Estimate for delinquent tax collection included if fund has been tax-supported.	294.361(2)
C. Transfers budgeted as requirements in other funds.	294.361(2)
D. Resources must be equal to requirements.	150-294.352(1)(B)
E. Excess of actual revenues over actual expenditures in second preceding year must equal the beginning balance in first preceding year.	
V. Debt Service Fund	
A. Each issue identified for principal and interest payments.	294.352(7)
B. Requirement shown in unappropriated ending fund balance. (For payments between end of coming fiscal year and receipt of taxes in second coming year.)	294.371
	150-294.371

Appendix B (continued)

	ORS/OAR
VI. Budget Committee	
A. A budget committee is established by each local government subject to Local Budget Law.	294.336(1)
B. Committee shall consist of the members of the governing body and an equal number of qualified electors.	294.336(2)
C. Committee shall at its first meeting elect a presiding officer from its members.	294.336(8)
D. The purpose of the budget committee is to receive the budget document and budget message, and to provide the public with an opportunity to ask questions and comment on the budget.	294.401(1)
E. Duty of the committee to review, or revise and approve the budget document.	294.406(1)
F. Committee may compel any official or employee of the municipality to furnish information regarding the budget.	294.406(3)
VII. Financial Summary	
A. Items in Financial Summary, LB-1, UR-1, or ED-1 agree with amounts on LB-2, UR-2, or ED-2, plus LB-3/ED-3.	294.386(1)
B. Items on LB-2, UR-2, or ED-2 and LB-3 or ED-3 agree with amounts on budget detail sheets.	
C. Summary of indebtedness is shown on Form LB-1, UR-1, or ED-1.	294.386(2)&(3)
VIII. Publication of Notice of Budget Hearing	
A. Notice of budget hearing advertised five to 30 days prior to hearing.	294.421(2)
B. If budget requirements do not exceed \$50,000 and no newspaper is published in district, the financial summary and notice of hearing can be posted for at least 20 days prior to the hearing.	294.421(3)
C. If notice is posted, a special notice of hearing must be published.	294.421(4)
IX. After Public Hearing of Budget	
A. Changes, if made after hearing, cannot increase estimated expenditures of any fund more than \$5,000 or 10 percent, whichever is greater, of the amounts approved by the budget committee.	294.435(1)
B. Budget adopted prior to June 30.	294.396
C. Levy the taxes.	294.435(1)
	150-294.435(1)-(A)
D. Make appropriations:	294.435(3)
	150-294.435(3)
1. By organizational unit or program.	
2. When organizational unit or program do not apply by;	
a. personal services	
b. materials and services	
c. capital outlay	
d. transfers	
e. general operating contingency	
f. debt service	

Appendix B (continued)

	ORS/OAR
X. Certify Tax to Assessor by July 15	150-310.060(A)
A. Two copies of the notice of tax; LB-50, UR-50, or ED-50.	294.555(2)(a) 310.060(2)
1. Total tax certified can not exceed amount approved by the budget committee.	294.435(1)
2. Local option taxes are detailed on LB-50 or ED-50 showing:	150-294.435(1)-(A) 310.060(2)(b), (c)
a. Purpose of tax.	
b. Date of approval by voters.	
c. Total amount or rate to be imposed.	
d. Amount to be imposed each year.	
e. First year of tax.	
f. Last year of tax.	
3. Levies for the payment of bond principal and interest.	310.060(2)(d), (e)
4. Categorization of tax.	294.555(2)(a)
B. Two copies of the resolutions adopting the budget, making appropriations, levying tax, and categorizing tax.	
C. Two copies of successful tax ballot measures.	
D. File a copy of the budget with the county clerk by September 30.	310.060(7)
E. School districts file a budget with the county Educational Service District (ESD) and State Department of Education.	
 XI. Supplemental Budgets	 150-294.480
A. One or more of the following circumstances must exist:	
1. An occurrence, condition or need which had not been ascertained at the time the budget was adopted.	294.480(1)(a)&(b)
2. Funds were made available by another unit of federal, state or local government or the costs are to be born by a private individual corporation or company, and the availability of funds could not have been known at the time the budget was adopted.	294.480(1)(c)
3. Proceeds from the involuntary destruction, involuntary conversion, or sale of property has necessitated the immediate purchase, construction, or acquisition of different facilities in order to carry on the government operation.	294.480(1)(e)
4. Ad valorem taxes are received during the fiscal year in an amount greater than the amount estimated to be collected.	294.480(1)(f)
B. A supplemental budget shall not authorize any levy of taxes.	294.480(5)
C. A supplemental budget shall not extend beyond the end of the fiscal year during which it is submitted.	294.480(2)
 XII. Other	
A. Interfund Transfers.	294.450 150-294.450(3)
1. Transfers may be made between appropriations within a fund by board resolution.	
2. Contingency appropriation transfers not to exceed 15 percent of total fund without supplemental budget.	294.450(2)
3. Transfers of appropriations, or appropriations and a like amount of resources, may be made from the general fund to any other fund by board resolution.	294.450(3)
B. Basis of accounting.	294.445
1. Cash	
2. Accrual	
3. Modified Accrual	

Appendix C

Taxing Authority, by Type of Local Government

This table lists the Oregon Revised Statute (ORS) that gives each type of local government its authority to impose ad valorem property taxes. That authority may be in the form of a permanent rate limitation, local option authority, or the authority to impose taxes to pay the debt service on certain qualifying forms of indebtedness (usually general obligation bonds). In addition, some local government taxes are subject to both constitutional (Article XI, Section 11 permanent rate) and statutory limitations. Whichever limit produces the lower amount of tax is the limit that applies. Voter approval is required before any local government can impose an ad valorem tax, whether it has a statutory limitation or not. See Chapter 6 for more on property taxes in Oregon. Unless noted, all types of local governments may ask their voters for local option authority. RMV means real market value.

Local Government	Assessment (A), Tax (T), or Bond (B)	ORS Ref.
1. Airport district	T: Permanent rate limit. Statutory limit of 1/2 of 1% (.005) of RMV. Within permanent rate limit.	838.060(1) 838.015
	B: General obligation bonds limited to 10% (0.1) OF RMV	838.060 (1) 838.065
2. Cemetery district	T: Permanent rate limit.	265.140(9)
3. Cities	T: Permanent rate limit.	Art. XI, sec. 11 223.235
	B: General obligation bonds limited to 3% of RMV or as limited by city charter. Bancroft bonds.	223.295 287A.050
a. Community houses	T: Local option tax or voter approved bonds.	276.736
b. Park commission	T: Statutory limit of 1/2 mill (.0005) of assessed value within permanent rate limit.	226.200
c. Park property	T: Local option tax for land purchases, 1/2 mill of assessed value.	226.220
d. Parking facilities	B: General obligation bond within city's debt limit, or revenue bonds.	223.825
e. Energy improvement loans	A: Assessment for loan repayment	OR Law 2009 Ch. 753
4. Community colleges	T: Permanent rate limit.	341.305
	Local option taxes limited to amount of loss resulting from Measure 50 implementation in 1997-98. (See Appendix E)	280.057
5. Councils of Government (ORS Chapter 190 intergovernmental entity for transportation facilities)	T: Permanent rate limit.	190.083(5)
	B: General obligation bonds limited to 2% of RMV.	190.083(2)

Appendix C (continued)

Local Government	Assessment (A), Tax (T), or Bond (B)	ORS Ref.
6. Counties	T: Permanent rate limit. B: General obligation bonds limited to 2% of RMV or as limited by county charter.	Art. XI, sec. 11 287A.100 287A.140
a. County fair maintenance	T: Statutory limit 1/160 of 1% (.0000625) of RMV within permanent rate limit unless approved by voters in local option.	565.330
b. General Road fund	T: Within permanent rate limit or local option.	368.705
c. Veterans' service officer	T: Statutory limit 1/80 of 1% (.000125) of RMV.	408.720
7. County fair district	T: Permanent rate limit.	565.275
8. County service district	T: Permanent rate limit.	451.547
a. Facilities	B: General obligation bonds within debt limit. T: Statutory limit 50 cents per year per \$1,000 of RMV for a period not to exceed five years within permanent rate limit. B: General obligation bonds and revenue bonds together limited to 13% of RMV.	451.490 451.540(1) 451.545
9. Diking district	A: Assessment based on amount needed to maintain dikes and dams.	551.100(2)
10. Drainage district	A: Assessment on benefitted property.	547.455
11. Education service district	T: Permanent rate limit. No authority to impose a local option tax.	334.270 280.040
12. Emergency 911 communications district	T: Permanent rate limit. Statutory limit 1/10 th of 1% (0.001) B: GO bonds outstanding limited to 1% of RMV.	401.847 401.845
13. Geothermal heating district	T: Permanent rate limit. Statutory limit of 1/4 of 1% (0.0025) of RMV. B: Go bonds limited to 2.5% of RMV.	523.410 523.460
14. Health district	T: Permanent rate limit. Statutory limit of 1/4 of 1% (.0025) of RMV. B: General obligation bonds.	440.395
15. Heritage district	T: Permanent rate limit. Statutory limit of 1/4 of 1% (0.0025).	198.986
16. Highway lighting district	A: Assessments on all real property on any reasonable basis. Limit is \$1.00 per year per front-foot. May also levy a special assessment to pay initial construction and installation cost.	372.170

IMPORTANT: Beginning in 2009, The Department of Revenue will no longer mail a paper copy of the annual booklet *"2010-2011 Local Budget Law and Notice of Property Tax Forms and Instructions for Municipal Corporations"* or the corresponding booklets for education districts or urban renewal agencies, unless the local government requests a paper copy. If you want a paper copy of the 2010-11 annual forms booklet, you must request one by November 15, 2009. Otherwise we will assume that you will download your 2010-11 forms from our web site at <http://www.oregon.gov/DOR/PTD/LocalB.shtml>. You may request your paper copy by calling 503-945-8293, or by e-mail at finance.taxation@state.or.us. Be sure to give your district's name and the mailing address where your forms booklet should be sent. You will need to request a paper copy every year that you desire one.
