

THE News Note

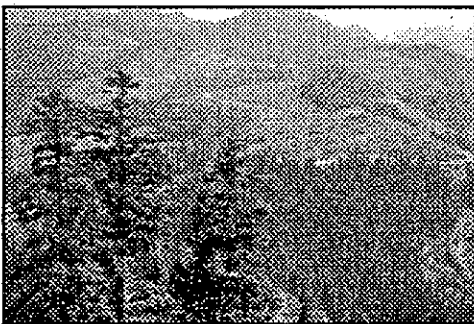

IF YOU HARVEST AND SELL TREES, YOU NEED TO KNOW THESE REQUIREMENTS of the Forest Practices Act and rules, administered by the Oregon Department of Forestry:

Reforestation is required by Oregon Administrative Rule **629-610-020** if after your operation, the residual number of trees is below rule-listed minimum levels of seedlings, saplings, or trees. *Refer to the Summary of Oregon's Reforestation Requirements.*

Oregon Revised Statute **527.675** requires that cut-over areas larger than **25 acres** be left with wildlife habitat trees and logs. If the number of large trees remaining after harvest are below specified minimum numbers, two large standing snags or green trees and two downed logs per acre harvested must be left for wildlife use. *Refer to the Summary of Wildlife Tree and Downed Log Retention Requirements.*

Oregon Revised Statute **527.740** requires limiting harvested areas to **120 acres** under certain post-harvest conditions. When the post-harvest stand has so few remaining trees that reforestation and wildlife tree and log retention are required, the acreage limit also applies. *Refer to the Summary of Harvest Unit Size Limitations.*

For more information about the Oregon Forest Practices Act or the Forest Practice Rules, please contact your local Oregon Department of Forestry office listed below or the headquarters office at 2600 State Street, Salem, Oregon 97310. (503) 945-7470
